

DLA Aviation's Industrial Gas Support Program for Europe

(This program does NOT include Class 1 Ozone Depleting Substances (ODS)!!! – Continue to use established ODS Program procedures and Points of Contact)

DLA Aviation, Richmond awarded an industrial gas support contract to International Gas and Services (IGS) in Willebroek, Belgium, to supply industrial compressed and liquefied gases to Military and Federal activities in Europe. The European Industrial Gas Support Program includes:

- Supplying various types and grades of compressed and liquefied gases in a variety of cylinder sizes.
- Delivering full cylinders to the customer's site.
- An exchange program that includes delivering full cylinders and picking up empty cylinders from the customer's site.

An AE302 form is required with every cylinder delivery and empty cylinder pick up. Instructions will accompany this form and are also located on our website. The AE302 is a customs form required by EU regulations to allow our US Government cylinders to travel throughout the EU without being taxed or ceased. It is imperative that customers sign and return the AE302 to the customs office in Belgium.

Continue to order your Industrial Gas requirements using your Service/Government agency automated ordering systems using MILSTRIP/FEDSTRIP (Standard Form 344) or shop online through DoD E-Mall.

POC: For additional information call the Gas and Cylinder Program Manager, at (804) 279-3674 (DSN 695).
