k. Select your 2nd level authentication method: 'TEXT or VOICE MESSAGE'

- i. We recommend using TEXT if possible
- ii. Do not use web based VOIP phones

Note: If you choose to use a different authentication method, we cannot provide any further guidance for you.

- iii. You will be required to use this 2nd level of authentication each time you log into LESO FEPMIS.

1. Select 'Continue'

The screenshot shows the 'Authentication method setup' page. It has a title 'Authentication method setup' and a subtitle 'Add a second layer of security so only you can sign in to your account.' Below this is a warning box: 'Keep this information safe. You will be locked out and have to create a new account if you lose your authentication method.' Then, it says 'Select an option to secure your account.' There are three options, each with a radio button and a description: 'Security key' (Use a security key, which is a small physical device that you plug into your computer or phone. It often looks like a USB drive. Recommended for high security. More resistant. MORE SECURE), 'Government ID' (Insert your government ID, such as a driver's license, ID card, or CAC card and enter your PIN. MORE SECURE), and 'Authentication app' (Get codes from an app on your smartphone, tablet, or computer. Recommended for high security. Harder to intercept. MORE SECURE). All three options are marked with a large red 'X'. Below these is the 'Text or Voice Message' option, which is highlighted with a red rectangle. It says 'Get security codes by text message (SMS) or phone call. Please do not use web-based (VOIP) phone services. LESS SECURE'. At the bottom, there is a 'Continue' button, which is also highlighted with a red rectangle.

m. Phone Authentication

- i. Login.gov will send you a security code each time you sign in, so ensure you use a phone number you have access to
- ii. Message and data rates may apply. Do Not use a web based VOIP phone service

- n. Enter your phone number
- o. Select Text Message or Phone Call 'We recommend text'
- p. Select send code

Note: The Code Will Expire in 10 Minutes.

A DEMO website of the United States government [Here's how you know](#)

USDA
 U.S. FOREST SERVICE
FORE AND WILDLAND MANAGEMENT -
INFORMATION MANAGEMENT (FAM-ISM)

INAP Integrated National Application Portal

Review and accept rules of behavior

In compliance with USDA and federal security policies, you must accept the following rules of behavior annually, prior to being granted access to FAMAuth applications. Please read and confirm your acceptance before proceeding.

Statement of Information Security Responsibilities for Associate Forest Service Users of FS Systems

I acknowledge that I understand and agree to comply with Forest Service (FS) and USDA information security policies and procedures, as well as with federal, state, and local laws. I understand that as an FS associate, I may not be entitled to the same limited personal use privileges as FS employees, and that my use of FS information systems and equipment is limited to that which is specifically described in my contract or other agreement with the FS.

I understand that my contract or other agreement may specify additional information security responsibilities or requirements, such as the need for a signed confidentiality statement. Key elements of Forest Service Manual (FSM) Chapter 6680, Security of Information, Information Systems, and Information Technology (both 66S01-66S02 and 66S03-66S04), for which I am responsible, are summarized below. I understand and agree that I must periodically review the FSM Chapter 6680 for changes.

I am also responsible to:

- Take appropriate measures to protect information from unauthorized access, including seeking out and applying security measures to protect sensitive information stored on my computer, on other electronic devices, or on other media such as CDs, DVDs, magnetic tape, and paper.
- Not store any classified information on any computer.
- Encrypt, using agency authorized encryption methods, any government sensitive or confidential information or information subject to the Privacy Act that is stored on any personal electronic device or removable storage medium.
- Sign off or electronically lock the computer before leaving it unattended.
- Comply with physical security standards and procedures, including taking appropriate measures to protect computer equipment and other electronic devices from theft, damage, or unauthorized use.
- Comply with password standards and procedures specified in the FSM and USDA's password policy.
- Verify that automatic virus protection is enabled on the computer in use (e.g., Symantec).
- Ensure if I am working remotely (those who operate portable computer systems in an alternate workplace, e.g., cell phone, PDA (BlackBerry) or home computers), I take the same precautions as required of users of stationary systems located at FS facilities to protect the FS systems' hardware, software, and information.
- Ensure that Agency sensitive information to which I have access is securely maintained, disseminated, and protected from disclosure, release, or extraction to unauthorized individuals or groups. In the instance of information protected by specific laws, such as the Privacy Act or the Health Insurance Privacy and Portability Act (HIPAA), users must be aware of the confidentiality protection procedures required of them in their handling of Agency sensitive data as required by law.
- Being aware of retention and disposal requirements of data to which I have access privileges.
- Promptly report all suspected security incidents to the FS Computer Incident Response Team (CIRT@fs.fed.us) and/or my supervisor or other appropriate management officials).

I understand findings of culpability will result in disciplinary action consistent with the provisions of FSM 6170 and USDA's DPM 751, which may include the loss of use or limitations on use of equipment, disciplinary or adverse action, criminal penalties, and/or financial liability for the cost of improper use. If I have an FS issued computer, I am also responsible to:

- Store corporate data within the corporate filing system, where it is backed up routinely. The FS defines corporate data as information owned, collected, maintained, or generated by the enterprise that has inherent value to and is intended for consistent, shared use within the enterprise.
- Install only that software for which I have obtained authorization, and when my privileges are elevated to allow installation of authorized software to perform only those activities that are specifically authorized.
- Refrain from installing on FS computer equipment any software, including "freeware" and "shareware," that does not have technical approval from the Chief Information Office.
- Verify that the automatic virus definition file updates to the enterprise antivirus tool (currently, Symantec AntiVirus) occur as scheduled.
- Be aware of the proper procedures for the sanitization and disposal of Agency information and data. Users shall be aware that data can be retrieved from media (diskettes, tapes, hard drives, or other memory devices) even after being erased or deleted. To properly sanitize media of residual data, users must contact the Forest Service Help Desk for assistance in degaussing, overwriting, or otherwise ensuring media is purged prior to disposal.
- Not remove hardware containing Agency sensitive information from FS without following appropriate media protection (encryption) or sanitization and disposal (overwriting, degaussing) procedures.
- Take FS computer equipment from an FS facility only for official business purposes.
- Only use computer equipment for which I have authorization.
- Not install computer equipment unless I am an authorized technician and the action has been approved by the appropriate IT System Owner or supervisor.
- Ensure if I am working remotely to follow the remote access requirements, which may include two-factor authentication and additional restrictions on portable computer systems to ensure these devices do not compromise the integrity or confidentiality of FS information or data.
- Not change the configuration settings or attempt to modify or disable any of the security programs installed on their FS information system, including virus protection software and the password-protected screen saver.
- Ensure all software in use by a user on FS equipment must have a valid license on file with purchasing.

Personally Identifiable Information (PII) is any piece of information that can potentially be used to uniquely identify, contact, locate, or impersonate a single person. If I have access to PII, I am responsible to:

- Never access PII unless absolutely necessary to perform my job.
- Never disclose PII to another person within FS unless they have verified that the other person is entitled to the information.
- Never remove PII from FS premises unless it is encrypted using a FS-approved method unless they have a copy of a memorandum waiving the encryption requirement that has been signed by a Business Unit Manager and that applies to this circumstance.
- Verify that any time I extract any PII from an IT system into a computer readable form, e.g., into a spreadsheet or report, that this act has been properly logged so that the location of the PII may be tracked.
- Ensure that after having finished using any extracted PII, or after 90 days, whichever comes first, I will erase the PII or receive written permission from my supervisor to retain it for longer.
- Ensure when erasing PII, that this act is properly logged so that the location of the PII will no longer be tracked.
- Never access PII from computers or devices outside of FS premises without advance authorization for remote access.
- Never attempt remote access without using approved FS access methods, which generally require the use of a SecurID device (called a "token").
- Never store their token with or near a laptop or other portable computer that contains PII or is used for PII access.
- Never mark their token with any information such as name or password.
- Promptly report any possible, suspected, or actual loss of PII or any device containing PII to the appropriate point of contact. Hence, I must ensure that I know how to make a report, and that I keep a record of the reporting point of contact separately from any device, so that a report is made if the device is missing.
- Report any possible, suspected, or actual loss of PII or any device containing PII within 15 minutes of discovery of the incident, regardless of the time of day.
- Physically secure all portable devices containing PII. I will lock up laptops using a cable lock when they are not in use, including when they are within their home, vehicle, or hotel room. I will lock small devices into secure containers when they are not in their possession.
- Encrypt PII when it is placed onto removable media such as CDs, "thumb drives," or memory sticks, and when it is removed from agency premises.
- Ensure that if PII is lost or stolen, it is reported to the Forest Service Help Desk within 24 hours.

I understand that any use of FS communications resources generally is not secure, that it is not private, and that it is not anonymous, and that system managers do employ monitoring tools to detect improper use. I understand that there is no right to privacy when using government information systems (tobon warning banner).

GOVERNMENT WARNING

The Rules of Behavior (RoB) for Use of a U.S. Government (USG) Information System (IS) provides the rules that govern the appropriate use of information resources for Department users, including federal employees, contractors, and other system users. All users of USG information resources must read and accept the RoB before accessing data or other information, systems, and/or networks. This acknowledgement must be completed annually thereafter. By accepting the RoB users reaffirm their knowledge of, and agreement to adhere to, the USG RoB. The USG RoB cannot account for every possible situation. Therefore, where the USG RoB does not provide explicit guidance, personnel must use their best judgment to apply the principles set forth in the standards for ethical conduct to guide their actions.

You are accessing a USG IS that is provided for USG-authorized use only.

All USG IS may be monitored for all lawful purposes, including but not limited to, ensuring that use is authorized, for management of the system, to facilitate protection against unauthorized access, and to verify security procedures, survivability and operational security. Any information on this computer system may be examined, recorded and copied and used for authorized purposes at any time.

All information, including personal information, placed or sent over this system may be monitored, and users of this system are reminded that such monitoring does occur. Therefore, there should be no expectation of privacy with respect to use of this system.

By logging into this Information System, you acknowledge and consent to monitoring of this system. Evidence of your use, authorized and unauthorized, collected during monitoring may be used for civil, criminal, administrative, or other adverse action. Unauthorized or illegal use may subject you to prosecution.

By using this IS (which includes any device attached to this IS), you consent to the following conditions:

- USG may intercept and monitor communications on this IS for purposes including, but not limited to, penetration testing, COMSEC monitoring, network operations and defense, personnel misconduct (PM), law enforcement (LE), and counterintelligence (CI) investigations.
- Communications using, or data stored on, this IS are not private, are subject to routine monitoring, interception, and search, and may be disclosed or used for any USG-authorized purpose.
- This IS includes security measures (e.g., authentication and access controls) to protect USG interests—not for your personal benefit or privacy.

As a User:

1. I will NOT attempt to access information or information systems for which access has not been authorized;
2. I will NOT share passwords;
3. I will NOT provide my password to anyone, including system administrators;
4. I will NOT use another person's account, identity, password/passcode/PIN, or PIV card;
5. I will protect passwords and access numbers from disclosure;
6. I will promptly change a password whenever its compromise is known or suspected to have occurred;
7. I will NOT attempt to bypass access control measures;
8. I will protect sensitive information from disclosure to unauthorized persons or groups;

☒ I understand that failure to comply with the Rules of Behavior could result in verbal or written warning, removal of system access, reassignment to other duties, criminal or civil prosecution, or termination.

You have successfully created a LESO FEPMIS account and your login.gov, iNAP and LESO FEPMIS accounts are all linked together. The next time you login you will go directly into the LESO FEPMIS application from login.gov.

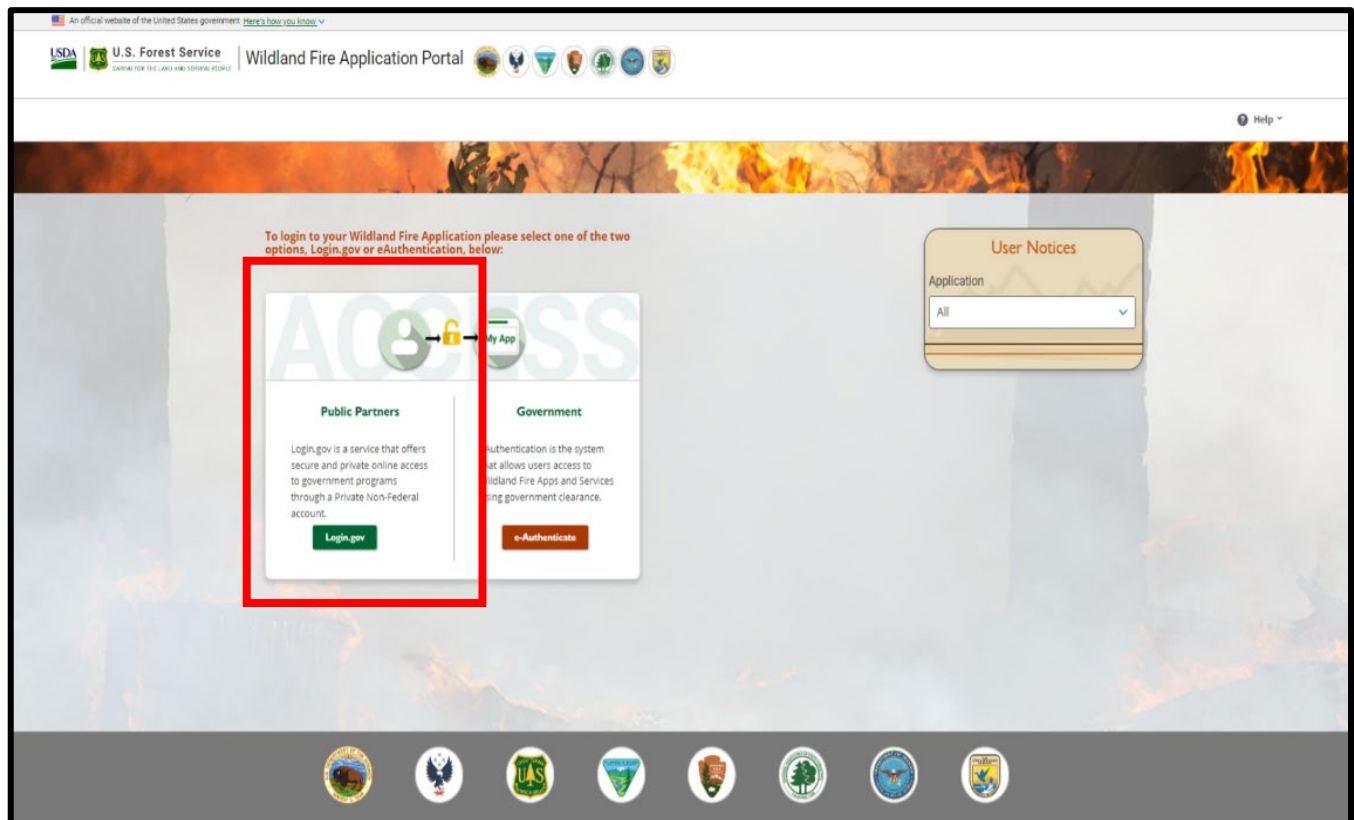

You Must now....

Close your browser completely or you might have browser cache issues.

Contact your State Point of Contact to assign you to a Station and new user roles.

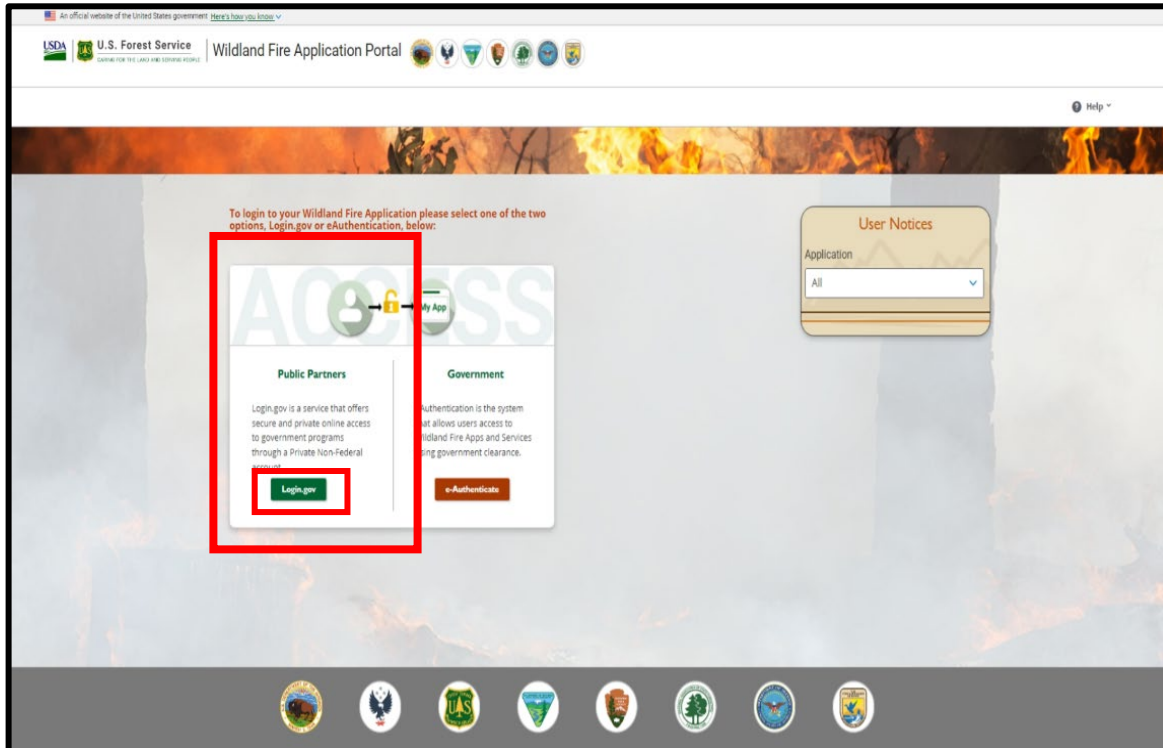

Note: This will be your access point for LESO FEPMIS from now on so you can bookmark this page: <https://famauth.wildfire.gov/>.

3. Logging into FEPMIS account for first time after setup.

Note: This will be your access point for a LESO FEPMIS from now on so you can bookmark this page.

- a. Go to: <https://famauth.wildfire.gov/>
- b. Select Public Partners 'Login.gov'

Note: If you have not created a login.gov account yet stop and go to step 1 to create an account.

- c. Enter your login.gov Email address
- d. Enter your login.gov Password
- e. Select 'Sign in'

Note: A new one-time security code will be sent to your phone, this is your 2nd level of authentication.

An official website of the United States government [Here's how you know](#)
