

Logistics Information Services

Tailored Data Products (TDPs)

Imagine working a logistics project with a short suspense and wondering how you will be able to research hundreds to thousands of NSNs for an upcoming pre-deployment thus ensuring mission success. Tailored Data Products (TDPs) might be a solution. TDPs are extracts of data mined from many systems that Logistics Information Services manage. Data products often include one or more combinations of the following systems:

- Federal Logistics Information System (FLIS)
- Commercial and Government Entity (CAGE) Codes
- Military Engineering Data Asset Locator System (MEDALS)

The Tailored Data Products Team works with government customers and is committed to transforming data into information to support logistics information requirements.

- Assistance in determining the best solution to obtain all key data elements
- Design the information solution to allow maximum flexibility for data analysis

Logistics Data information available includes:

- Identification Data
- Major Organizational Entity (MOE) Rule Data
- Reference Number Data
- Item Standardization Data
- Management Data
- Coded or Decoded Characteristics Data

TDP reports are used to support a variety of functions, such as:

- technical support for various special projects
- DLA DEMIL review
- engineering practice studies
- database establishment/validation
- tool development and item upgrades

Private Industry without government sponsorship:

If you are not a part of a Defense or Military Supply Center, Military Services, Civilian Agencies, other DOD affiliates or Foreign Governments, you are not eligible for a TDP Extract. However, if you wish to obtain FLIS or System for Award Management (SAM), please view the Freedom of Information (FOIA) page or contact the DLA Customer Interaction Center for assistance.

DEFENSE LOGISTICS AGENCY

360° approach to Life Cycle Logistics **CUSTOMER SUPPORT:**

DLA Customer Interaction Center

The DLA Customer Interaction Center (CIC) began servicing customers in 2009, averaging 400K+ contacts annually leveraging technology to provide world class customer service geared towards logistics and supply needs. The CIC provides solutions to the Armed Services, Federal Agencies, State and local governments, government contractors, allied foreign military and the general public.

Email: dlacontactcenter@dla.mil Web: <http://www.dla.mil/CustomerSupport.aspx>

Training

Logistics Information Services offers comprehensive training and education on several DLA products and services. Many of our courses offer classroom instruction as well as delivery by Computer Based Training (CBT), Web Based Training (WBT), Satellite/VTC Training, and Webinar. Tailored courses are developed to meet individual service or agency needs.

Customer Outreach

Informing and delivering information regarding DLA Products and Services to the internal and external customer group. Utilizing Web, E-mail, and Face-to-Face engagement to represent DLA to high/mid-level, product user and private industry customers worldwide.

Email: customeroutreach@dla.mil Web: <http://www.dla.mil/HQ/InformationOperations/Offers/Services/CustomerOutreach.aspx>

Demilitarization

In coordination with the Military Services, Defense Agencies, and other Federal Government entities the DOD Demilitarization Coding Management Office ensures validation of the DEMIL code for every item of supply.

Federal Logistics Information System (FLIS) Process Management

The FLIS Process Management is responsible for facilitation of the creation, maintenance, dissemination, and viewing of National Stock Number data within the FLIS Portfolio Suite of Systems. The sharing of this data amongst DLA systems (FED LOG, WebFLIS, DOD EMALL), DOD, Federal Agencies, and International Allies ensures data is available and actionable for military supply chains worldwide.

Logistics Information Services – Electronic Reading Room

PUB LOG FLIS Search

The Electronic Reading Room is a location where the public is able to download documents and data to assist in their logistics research. Files that can be downloaded include Public Federal Logistics Information Services (FLIS) data or PUB LOG FLIS Search, CAGE code listings, decoded characteristics data, Master Cross Reference List (MCRL) and more.
