BROCHURE INSIDE LEFT PANEL

Are you looking for DATA extracts of Federal Logistics Information System Data?

Tailored Data Products (TDPs) are extracts of data mined from the many systems that DLA Logistics Information Services manages. TDPs can include data from one or more combinations of the following systems:

- FLIS - Federal Logistics Information System
- CAGE - Commercial And Government Entity
- MEDALS - Military Engineering Data Asset Locator System
- SAM - System Award Management

The TDP team works with government customers to:

- Determine the best solution to their logistics data requirements

- Specifically design the information solution to allow greater flexibility for analysis

The TDP team is committed to trans-forming data into information to support the customer's logistics information needs.

BROCHURE INSIDE MIDDLE PANEL
