

PRIVACY IMPACT ASSESSMENT (PIA) For the

Automation of DLA EEO Complaint Files	
Defense Logistics Agency	

SECTION 1: IS A PIA REQUIRED?

a. Will this Department of Defense (DoD) information system or electronic collection of information (referred to as an "electronic collection" for the purpose of this form) collect, maintain, use, and/or disseminate PII about members of the public, Federal personnel, contractors or foreign nationals employed at U.S. military facilities internationally? Choose one option from the choices below. (Choose (3) for foreign nationals).

one option from the choices below. (Choose (3) for foreign nationals).
(1) Yes, from members of the general public.
(2) Yes, from Federal personnel* and/or Federal contractors.
(3) Yes, from both members of the general public and Federal personnel and/or Federal contractors.
(4) No
* "Federal personnel" are referred to in the DoD IT Portfolio Repository (DITPR) as "Federal employees."
b. If "No," ensure that DITPR or the authoritative database that updates DITPR is annotated for the reason(s) why a PIA is not required. If the DoD information system or electronic collection is not in DITPR, ensure that the reason(s) are recorded in appropriate documentation.
c. If "Yes," then a PIA is required. Proceed to Section 2.

	No		

- f. Authority to collect information. A Federal law, Executive Order of the President (EO), or DoD requirement must authorize the collection and maintenance of a system of records.
 - (1) If this system has a Privacy Act SORN, the authorities in this PIA and the existing Privacy Act SORN should be the same.
 - (2) Cite the authority for this DoD information system or electronic collection to collect, use, maintain and/or disseminate PII. (If multiple authorities are cited, provide all that apply.)

- (a) Whenever possible, cite the specific provisions of the statute and/or EO that authorizes the operation of the system and the collection of PII.
- (b) If a specific statute or EO does not exist, determine if an indirect statutory authority can be cited. An indirect authority may be cited if the authority requires the operation or administration of a program, the execution of which will require the collection and maintenance of a system of records.
- (c) DoD Components can use their general statutory grants of authority ("internal housekeeping") as the primary authority. The requirement, directive, or instruction implementing the statute within the DoD Component should be identified.

DDFORM2930NOV 2008 Page 3 of 16

- g. Summary of DoD information system or electronic collection. Answers to these questions should be consistent with security guidelines for release of information to the public.
 - (1) Describe the purpose of this DoD information system or electronic collection and briefly describe the types of personal information about individuals collected in the system.

Purpose is to digitize Defense Logistics Agency (DLA) Equal Employment Office (EEO) records to provide protection against threats to data integrity, and maintain backup plans. The backup strategy is implemented through Defense Logistics Agency Document Services scanning all the material and transferring all data electronically to the DLA EEO offices which can be accessed through the internet with a Common Access Card (CAC). Records will be accessible only by EEO. These records are stored in DACS.

The database relies on these personal identifiers: Individual name, home address, home telephone number, work telephone number, and information about the alleged discrimination claim (basis[es]), issue[s] and requested relief).

(2) Briefly describe the privacy risks associated with the PII collected and how these risks are addressed to safeguard privacy.

The risks associated with maintaining data in an electronic environment have been mitigated through administrative, technical, and physical safeguards as described below.

Administrative: Users, including individuals responsible for system maintenance, receive initial and periodic refresher Privacy Act and Information Assurance training. Users are warned through logon procedures of the conditions associated with access and the consequences of Improper activities. Users are required to accept those conditions/consequences before logon completes.

Physical: The data resides on a computer system that is connected to the World Wide Web. Central Processing Units are located in a secure computer facility with strong physical access controls required for entry. Within the secure facility, central processing units are kept in locked or controlled access areas. Electronic records are backed up periodically. Areas housing central processing units, servers, and work stations are configured with a fire suppression system. Should the system fall, the lost data could be constructed from the back-up records, paper files, and input sources.

Technical: The electronic records are deployed on accredited systems with access restricted via CAC. The Web-based files are encrypted in accordance with approved information assurance protocols. The system uses built-in virus detection software with notifications to alert administrator of new viruses. Computer terminals are password controlled with system-generated forced password change protocols. Computer screens automatically lock after a preset period of inactivity with reentry controlled by password. Systems manually locked by the user also require password for reentry. Shutdown compliance is periodically checked.

h. With whom will the PII be shared through data exchange, both within your DoD Component and outside your Component (e.g., other DoD Components, Federal Agencies)? Indicate all that apply.

Within the DoD Component.

NOTE:

Sections 1 and 2 above are to be posted to the Component's Web site. Posting of these Sections indicates that the PIA has been reviewed to ensure that appropriate safeguards are in place to protect privacy.

A Component may restrict the publication of Sections 1 and/or 2 if they contain information that would reveal sensitive information or raise security concerns.
