Message from the Director

MESSAGE FROM THE DIRECTOR DECEMBER 2017

For more than five decades, we have a proud history of providing the right support, to the right place, at the right time, across the globe. Our Nation has a powerful military force, capable of swiftly responding to any challenge, at a moment's notice. Our Soldiers, Marines, Sailors, and Airmen rely on the men and women of the Defense Logistics Agency (DLA) to accomplish their mission. Through continued collaboration and innovation, we continue to be the standard-bearer for joint logistics and acquisition - delivering world-class support to the Warfighter.

Through the issuance of the National Defense Authorization Act of 2010, Congress mandated that the entire Department of Defense assert auditability of its financial statements by the end of Fiscal Year (FY) 2017. Knowing that DLA was up to the challenge, the Agency voluntarily accelerated our audit readiness goal to the end of FY 2015. We are now in the midst of our first enterprise-wide full financial statement audit and stand ready to continue the annual audit cycle; this is not a one-and-done exercise.

We have entered the initial year of audit in FY 2017 and have been advised by the Independent Public Accountant (IPA) of the intent for disclaimer of opinion for the Agency's Working Capital Fund, General Fund and Transaction Fund (TF) financial statements. We have been transparent with our challenge areas and identified material weaknesses and critical corrective action plans where necessary. Each audit report will help DLA build a better foundation and act as iterative stepping stones towards the eventual attainment and sustainment of a clean audit opinion.

While DLA's audit journey is far from over, the Agency has made tremendous strides from audit readiness to audit advancement. As we enter FY 2018, I am confident in our abilities to support our Warfighters and Whole of Government Agencies with reliable financial information and resources while meeting the Department's challenges, no matter how difficult or complex. Our ability to become more effective and efficient with the resources we have is critical to moving forward, especially as we are asked to do more with less. With a solid foundation, an agile, professional workforce, and a constant desire to improve our support to the Warfighter around the globe, we will continue to be the Nation's best Combat Logistics Support Agency. I am proud of where we have come and where we are headed into the future of audit advancement.

A handwritten signature in black ink, appearing to read 'Darrell K. Williams'.

DARRELL K. WILLIAMS
Lieutenant General, USA
Director

Management's Discussion and Analysis

The *Management's Discussion and Analysis* is required supplementary information to the financial statements and provides a high-level overview of the Defense Logistics Agency. This is required per OMB Circular A-136 and Statements of Federal Financial Accounting Standards (SFFAS) No. 15.

The *Overview* section describes the DLA's organization, its missions and goals, and provides an overview of our DLA Commands.

The *Performance Overview* section provides a summary of each DLA mission, selected accomplishments, key performance measures, and future initiatives to strengthen the DLA's efforts in supporting Department of Defense (DoD) objectives and missions.

The *Financial Overview* section provides a summary of DLA's financial data explaining the major sources and uses of funds and provides a quick look at our Balance Sheet, Statement of Net Cost, Statement of Changes in Net Position, Statement of Budgetary Resources, and Limitations of Financial Statements.

The *Management Assurances* section provides the Director's Assurance Statement related to the Federal Managers' Financial Integrity Act and the Federal Financial Management Improvement Act. This section also describes the DLA's efforts to address our financial management systems to ensure systems comply with applicable accounting principles, standards, requirements, and with internal control standards.

Overview

Our Organization

Mission and Organizational Structure

DLA reports to the Office of the Under Secretary of Defense (OUSD) for Acquisition, Technology and Logistics (AT&L) through the Deputy Under Secretary of Defense for Logistics and Materiel Readiness. DLA provides support around the clock and around the world to meet the needs of America's Armed Forces and other designated customers in times of peace, national emergency, and war. America's national defense strategy depends on DLA's support to feed, clothe, fuel, medicate, treat, and sustain U.S. and many allied nations' troops. DLA supports DoD objectives and missions with involvement in the full range of military operations from participation with multi-national forces engaged in large-scale combat operations, weapons and spares provisions, peacekeeping efforts, emergency support, to humanitarian assistance.

DLA sources and provides nearly all consumable item used by American military forces worldwide. DLA manages nearly 5.1 million separate line items of inventory for land and maritime parts for weapon systems, fuel, and critical troop support items involving food, clothing and textiles, medical, industrial hardware, and construction equipment and materiel. Additionally, DLA provides a broad array of associated supply chain services that include storage and distribution; reutilization or disposal of surplus military assets; providing catalogs and other logistics information, services; and, document automation and production services.

DLA's Mission Vision and Values

Mission	Vision	Values
Provide effective and efficient global solutions to Warfighters and our other valued customers	Deliver the right solution on time, every time	Integrity, Resiliency, Diversity, Innovation, Accountability, Excellence

DLA employs approximately 24,700 civilian personnel, 520 active duty military personnel, and 570 reserve personnel who operate a \$42.0 billion global enterprise in 28 countries. DLA manages nine supply chains and supports more than 2,300 weapon systems. The nine supply chains are: DLA Aviation, DLA Land, DLA Maritime, DLA Energy, Subsistence, Medical, Clothing, and Textiles, Construction and Equipment, and Industrial Hardware. Agency leaders are committed to the continuous assessment and transformation of the organizational culture, size, structure, and alignment through enterprise integration and partnering with the private sector. Organizing as a single, integrated business enterprise enables DLA to focus on supporting the DoD's supply chains, enhancing the Armed Forces' readiness, and providing for the Warfighter during contingency operations.

This Agency Financial Report (AFR) is prepared for the DLA's General Fund (GF). Information is provided for GF, where applicable, and other information is for the DLA Enterprise-Wide.

WHO'S WHO IN DLA

Figure 1, the DLA Organizational Chart

DLA Major Subordinate Commands (MSCs)

DLA AVIATION, headquartered in Richmond, Virginia, is the primary source for over 1.1 million repair parts and operating supply items for more than 1,340 major weapon systems. The DLA Aviation Supply Chain provides mapping, kitting, chemical, petroleum packaging, gases, and cylinder items to the Military Services. In addition, DLA Aviation provides engineering, sustainability, ozone depleting substances reserve, and industrial plant equipment services.

DLA DISPOSITION SERVICES, headquartered in Battle Creek, Michigan receives excess, obsolete, and unserviceable (EOU) DoD property, providing ultimate disposition through reutilization, transfer, donation, and sales. In FY 2017, DLA Disposition Services received an estimated \$29.0 billion of EOU inventory, \$1.4 billion was reutilized and issued back to the Military Services. The reutilization of excess property provides the Services an opportunity to get property at no cost. DLA Disposition Services sales generated approximately \$119.0 million of revenue in FY 2017, offsetting operational costs.

DLA DISTRIBUTION, headquartered in New Cumberland, Pennsylvania, is responsible for the receipt, storage, issuance, packing, preservation, and transportation of more than 4 million items worldwide. It operates a network of 26 distribution centers around the world that provide timely and quality support to the Warfighters. Its Global Stock Position Plan ensures rapid distribution of critical military items. DLA Distribution's overseas distribution operations are located in Europe, Middle East, and Pacific Asia regions.

DLA ENERGY, headquartered at Fort Belvoir, Virginia, serves as the DLA's executive agent for the bulk petroleum supply chain. DLA Energy business includes sales of petroleum and aerospace fuels; arranging for petroleum support services; providing facility/equipment maintenance on fuel infrastructure; performing energy-related environmental assessment and cleanup; storage and transportation for bulk and aerospace products; and performing quality surveillance functions for petroleum for the Military Services, as well as for the privatization of their utility systems.

DLA LAND AND MARITIME, headquartered in Columbus, Ohio, is the primary source for over 420,000 repair parts and 1.5 million operating supply items, for land and sea-based weapon systems. The DLA Land and Maritime Supply Chains provide product testing, engineering, and technical support to the Military Services. In addition, the DLA Land and Maritime Supply Chains support Navy Surface and Subsurface and Army and Marine Corps customers through dedicated customer relations while working with numerous suppliers to fulfill requirements for assigned stock classes across the DoD. Furthermore, the DLA Land and Maritime Supply Chains provides logistical services directly to Navy shipyards and Army/United States Marine Corps industrial sites.

DLA TROOP SUPPORT, headquartered in Philadelphia, Pennsylvania, is DLA's lead center for troop and general support. Troop Support is responsible for managing food, clothing, medical supplies, construction and equipment, and general and industrial supplies worldwide. DLA Troop Support has the following Supply Chains: Subsistence, Clothing & Textile, Construction & Equipment, Medical, and Industrial Hardware.

DLA J/D Codes

DLA GENERAL COUNSEL provides legal services and guidance to the DLA Director, senior leadership, and staff.

DLA OFFICE OF THE INSPECTOR GENERAL leverages audit and investigative expertise to provide DLA leadership with timely facts to make informed decisions that improve efficiency, accountability and warfighter support.

DLA INSTALLATION SUPPORT (DS) provides enterprise-wide agency policy, program, and worldwide operational support in environmental management; safety and occupational health; installation management; public safety; forms and policy management; and morale, welfare, and recreation for DLA.

DLA TRANSFORMATION (DT) manages the Agency's strategic plan, executive governance forums, and the agency-wide deployment of Enterprise Process Management, Continuous Process Improvement (CPI), Enterprise Organizational Alignment, and Enterprise Policy Management programs.

DLA HUMAN RESOURCES (J1) provides the full range of human resources services, both policy and operational, for DLA's civilian and active duty military employees. DLA Human Resources (HR) recruits, hires, trains, and sustains a mission-ready workforce for DLA and our HR customers, using world class policies, processes, programs, and tools.

DLA LOGISTICS OPERATIONS (J3) manages DLA's supply chains by providing logistics and materiel management policy, guidance, oversight, and monitoring of supply chain performance.

DLA INFORMATION OPERATIONS (J6) as DLA's knowledge broker, provides comprehensive, best practice technological support to the DoD/DLA logistics community for information systems; efficient and economical computing; data management; electronic commerce; telecommunication services; and transaction services. The Director of Information Operations also serves as DLA's Chief Information Officer. J6 manages DLA's Research and Development program.

DLA ACQUISITION (J7) is responsible for planning, organizing, directing, and managing the procurement and contract administration functions for DLA acquisition in support of both internal operations and other supported activities. The Director of DLA Acquisition, also serves as the Agency’s Component Acquisition Executive. DLA Acquisition provides oversight of DLA Contracting Services Office. Additionally, J7 provides the oversight of DLA Strategic Materials.

DLA FINANCE (J8) is responsible for obtaining and allocating resources, analyzing execution, providing fiscal guidance and advice to support the Agency, its business areas, and its MSCs in accomplishing DLA's mission. DLA Finance prepares the DLA financial statements and guides DLA in its Audit Advancement efforts. The Director of Finance also serves as DLA’s Chief Financial Officer.

DLA JOINT RESERVE FORCE (J9) provides DLA with trained, ready, and available reservists from all Service components for worldwide contingency operations and support of peacetime operations, wartime surge requirements, and logistics planning.

Figure 2, the locations of the major DLA offices

Our Strategic Framework

Agency Goals and Objectives

DLA is committed to achieving significant savings for its customers. In April 2015, the former DLA Director, Lieutenant General Andrew Busch, refreshed the Agency's long-term strategy to concentrate on attaining savings while continuing to identify new opportunities to reduce cost. Our current Director, Lieutenant General Darrell Williams, is updating the Agency's strategic plan to reflect the current environment and anticipates publishing the updated plan near the beginning of FY 2018. DLA's Director's annual guidance is derived from the Agency's long-term strategy and serves to align DLA's support to DLA's goals and objectives. DLA continues to provide world-class support to the Warfighter – delivering the right solution on time, every time – through pursuit of the five goals described in Figure 3: Agency Goals and Objectives, which support the Agency's strategic plan. This report is based on Lieutenant General Busch's strategic plan for the Agency.

Warfighter First: *Deliver innovative and responsive solutions to Warfighters first, DoD components and our other valued customers.*

DLA's top priority is Warfighter support. The current threat environment is complex, and we must be a trusted and responsive partner to the Warfighter as well as one that is able to anticipate changing and future needs. We ensure our organization's goals, processes, and performance are innovative, responsive, and synchronized with the current and future needs of the Warfighters, DoD components, other mission partners, and stakeholders.

People and Culture: *Hire, develop, and retain a high-performing, valued, resilient, and accountable workforce that delivers sustained mission excellence.*

DLA has always been a high-performing organization, and our workforce is our greatest asset. To further increase performance, we use innovative approaches to attract and retain mission-focused people. We foster an environment that unlocks the full potential of our workforce, enabling them to achieve peak performance and meet future challenges. To accomplish this, we continue to attract and hire highly-talented individuals, develop their competencies, and cultivate and retain the next generation of the DLA workforce.

The key to mission success is to continue our focus on people and culture. Our success depends on the readiness of our workforce to meet changing mission requirements in an evolving technological environment.

Partnering with our labor unions to communicate and implement positive change to maintain our standing as an employer of choice is vital to an invigorated, sustained, and resilient workforce.

Strategic Engagement: *Engage industry and other partners in the delivery of effective and affordable solutions.*

Figure 3, the Agency Goals and Objectives

Strong relationships with external partners are vital to achieve DLA's mission. We are, and continue to be, focused on developing innovative business relationships with our industry and DoD partners. We need to engage more closely with industry providers of materiel and to anticipate and meet the demands. As the relationships with our partners deepen, we become more knowledgeable about their strengths, challenges, and priorities. Through this knowledge, we make informed decisions in the development and delivery of the right solutions for our Warfighters. Increased communication and collaboration will benefit DLA, our industry partners, DoD, and, above all, the Warfighters.

Financial Stewardship: *Deliver effective and affordable solutions.*

Providing support to the Warfighter is our top priority. We acquire new capabilities and eliminate non-value-added processes to optimize Warfighter readiness, meet future threats, and reduce their total equipment and system ownership costs. We aggressively drive costs out of operations and materiel acquisitions to ensure an agile capability that can surge as needed to provide global military and humanitarian support.

Accountability is the foundation of good stewardship. We are steadfast in maintaining our financial commitments to our customers while ensuring value, efficiency, and effectiveness in every program. We partner with our customers to improve pricing transparency and to collaboratively develop solutions to minimize costs. We offer more discrete and flexible pricing options to allow customers to select the type of service and performance that best meets their mission and affordability needs.

Process Excellence: *Achieve Enterprise Process Excellence.*

DLA optimizes processes to obtain the most effective and efficient outcome. We obtain this goal through rigorous examination of end-to-end, core, and enabling processes coupled with the use of continuous process improvement tools. The teams are composed of individuals from diverse functional backgrounds to ensure we optimize, standardize, and implement process improvements as well as advance auditability. We achieve Process Excellence by requiring every level of leadership to evaluate, manage, and seek to improve the processes within their scope of responsibility. We systematically reassess and implement Process (Innovation) to reduce costs, increase speed, improve quality, and become a more agile organization. This is accomplished, as appropriate, within each organization and at the enterprise level. Through our governance structure, DLA enables, prioritizes, and integrates process innovation.

Process Excellence encourages simplification, improves performance, and helps DLA better achieve the outcomes Warfighters expect. At its essence, Process Excellence moves beyond the success of achieving and sustaining a positive financial statement audit and optimizes process change to bring forth the most effective and efficient outcomes in support of Warfighters, the Whole of Government, and our Nation.

DLA continues to pursue initiatives that improve Warfighter support with even greater fiscal responsibility. To accomplish its strategic goals to support the Warfighter in an evolving environment, DLA established new governance forums to report progress against its goals. Figure 4 depicts how the new structure informs decision makers to enable them to optimize the use of DLA's resources.

Leading and Managing the Agency

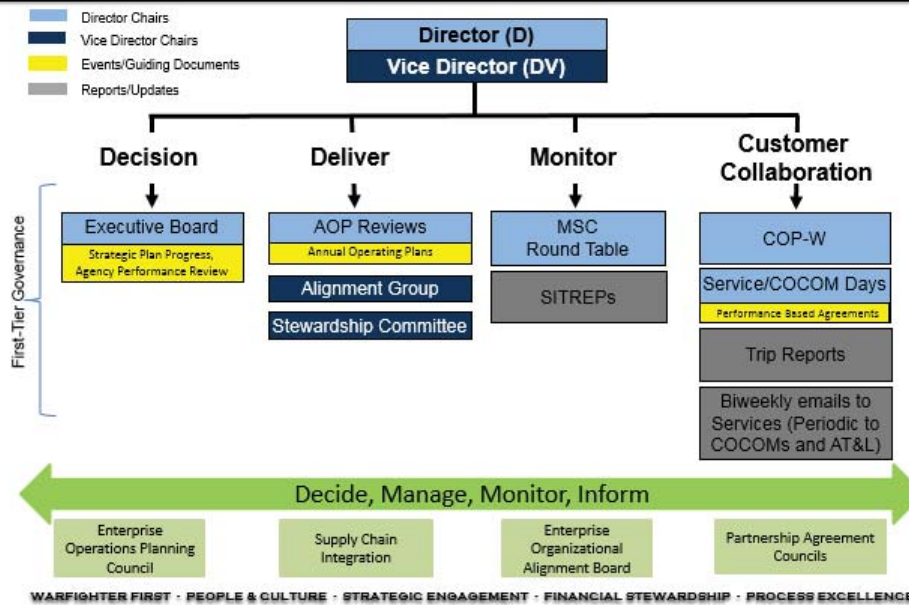

Figure 4, Leading and Managing the Agency

Analysis of DLA’S Financial Statements and Stewardship Information

The following analysis provides an overview of DLA’s funding mechanisms and the information presented in the financial statements and notes.

DLA’s Funding Sources

DLA receives funding through its Working Capital Fund (WCF), General Fund (GF), and Transaction Fund (TF). DLA prepares financial statements and notes for the WCF, GF and TF. The GF Financial Statements are presented only for FY 2017. The Financial Statements and the notes are not presented on a comparative basis because there are known misstatements in the FY 2016 balances that were corrected in FY 17. Therefore, presenting comparative statements would not provide additional value to the reader. The Management’s Discussion and Analysis (MD&A) covers all three funds due to the interrelationship between the funds.

General Fund

The General Fund (GF) is appropriated by Congress, which also grants authority to the Office of the Secretary of Defense (OSD) and its Components to obligate those funds to support mission requirements. Both detail and summary-level financial reports are used to ensure funds are executed in an amount and time consistent with the type of appropriation. In addition, the reports allow management to determine whether reprogramming or transfer actions are necessary to best utilize the funding consistent with law. In FY 2017, DLA received just over \$815.7 million in GF direct appropriations. These funds account for approximately 2.5 percent of DLA’s total budget program; DLA’s total budget programs includes WCF, GF and TF. The GF includes five appropriation categories: Operations and Maintenance, Research, Development, Test and Evaluation, Procurement, and Family Housing, and Military Construction, The five major appropriation categories are represented below:

- **Operations and Maintenance (O&M)** received \$358.0 million. Funding provided core development and sustainment support to five major programs, to include: (1) Contingency Logistics, (2) Warstoppers, (3) Defense Mapping, (4) the Procurement & Technical Assistance Program, and (5) Morale, Welfare and Recreation. In addition, funding supports the high visibility Law Enforcement

Support Office (LESO) military equipment reutilization 1033 Program. DLA also supported OSD sponsored programs, managed by approximately ten program offices, for which DLA either provided administrative support or has program oversight. These include: (1) Defense Property Accountability System, (2) Continuity of Operations Program, (3) Business Process Reengineering Center, (4) Purchase Card Online System program and (5) DoD Enterprise Business System (DEBS). DEBS is a compilation of approximately five programs, including the Defense Agency Initiative (DAI), Defense Retired Annuitant System (DRAS), and the Standard Procurement System.

- **Research, Development, Test & Evaluation (RDT&E)** received \$188.2 million. Funding supported: (1) DLA's Industrial Preparedness Manufacturing Technology (IP ManTech), (2) Logistics Research & Development (Log R&D), (3) DEBS, and the Defense Microelectronics Activity (DMEA). IP ManTech supports the development of a responsive, world-class manufacturing capability, and is further aligned into three Strategic Focus Areas of (1) Improving Industrial base manufacturing processes, (2) maintaining viable sources of supply, and (3) improving technical and logistics information. Log R&D focuses on improving the quality of DLA managed parts and utilizing maturing technology. DEBS RDT&E provides funding primarily to support audit readiness efforts, support DRAS system development, and provide the Department with an automated funds distribution system to improve funds control and visibility of all appropriated funds passing through the enterprise. DMEA supports the development, using modern technology, of electronic components for aged systems where a commercial manufacturing base no longer exists.
- **Military Construction (MILCON)** received \$266.5 million (\$238.9 million for construction and \$27.6 million for Planning and Design). MILCON funding primarily replaces/modernizes aging and deteriorated infrastructure for DLA Supply Chains. For FY 2017, DLA Energy projects, both CONUS and OCONUS, consumed \$194.2 million (81.3%) of construction funding. The Program supported (1) 8 fuels infrastructure projects that replace fuel tanks, hydrant systems and storage tanks and (2) the construction of a covered warehouse and open storage hardstand in support of DLA Distribution operations at DLA's depot at Red River Army depot in Texas.
- **Procurement Defense-Wide (PDW)** received \$2.1 million. Funding supported (1) the replacement of agency-owned and commercially leased passenger carrying motor vehicles at DLA overseas locations not available from the General Services Administration (GSA), (2) Warstoppers' Program procurement requirements for the purchase of fully automated metrology equipment for wafer test and inspection of emulated microcircuits, and (3) OSD Contingency Operations logistic support activities.
- **Family Housing O&M** received \$963,000. Funding supported 124 units at New Cumberland, PA for (1) management, (2) utility costs and (3) replacement of household appliances/furniture and cyclical maintenance requirements such as painting, and window and carpet replacement.

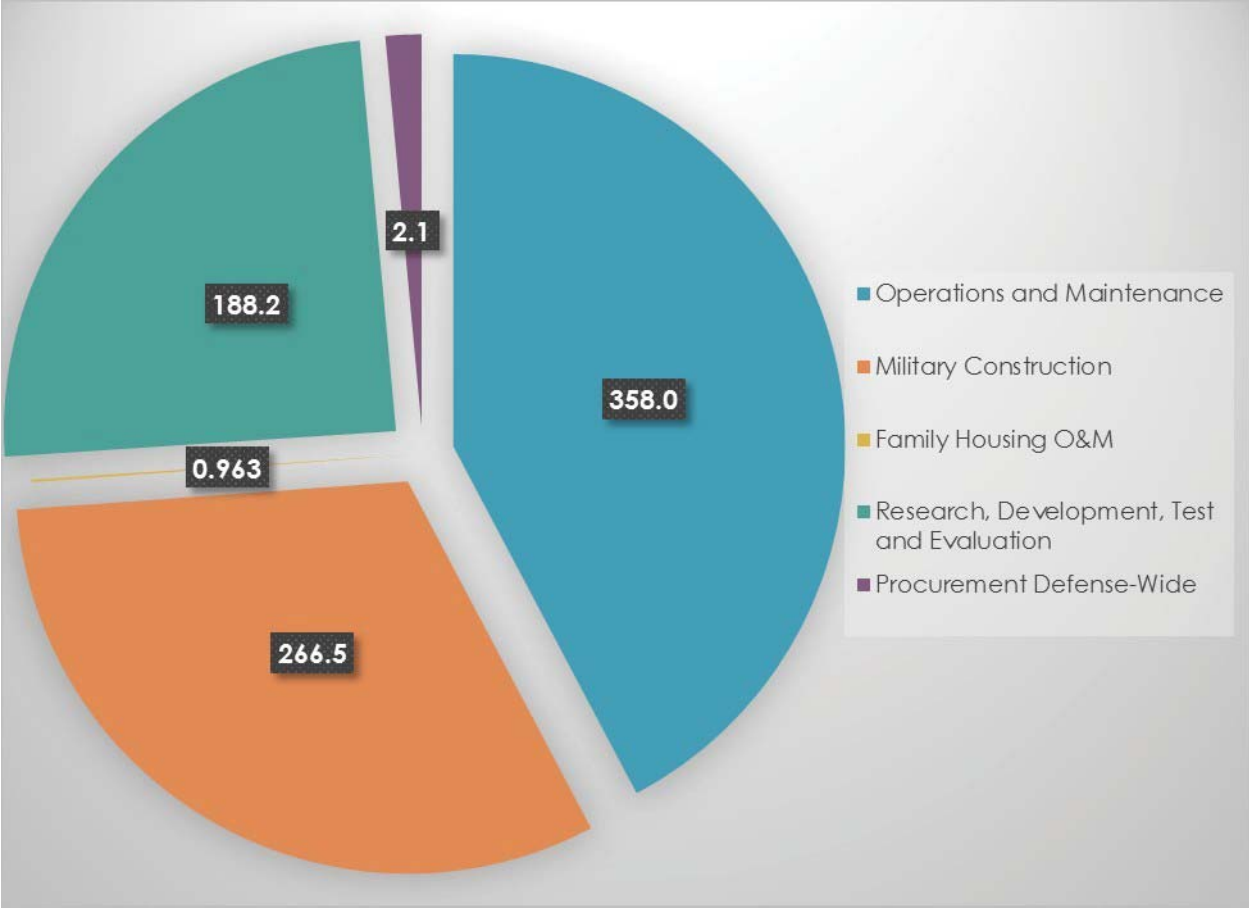

Figure 5, the distribution of GF appropriations in FY 2017.

Performance Overview

The Performance Overview provides a summary of DLA's mission, selected accomplishments, key performance measures, and forward looking initiatives to strengthen the DLA's efforts in achieving a safer and more secure nation. This performance overview encompasses mission activities that are DLA Enterprise-wide.

Performance Management in DLA

Research and Development (R&D) is continuing to monitor financial execution to support and adhere to OSD-C prescribed goals for Obligations and Expenditures. In order to continue to optimize efficient and effective management of resources, R&D is improving upon program management review with the development and implementation of a comprehensive performance measurement process. The performance measurement process supports the development of more detailed performance goals and metrics that encompass cost, schedule, and technical performance, which will provide a comprehensive view of the portfolio of projects for each program. The implementation of the performance measurement process will continue throughout FY 2018.

Warfighter First

DLA's goal was to deliver innovative and responsive solutions to the Warfighters and our other valued customers. We have achieved considerable success in this area, including several significant accomplishments in our R&D funded Manufacturing Technology program as follows:

Subsistence Network: Microwave Assisted Thermal Sterilization (MATS) - Developed new military and commercial production capability for low cost production of U.S. Food & Drug Administration (FDA) approved sterile group-sized rations processing. MATS provides improved quality food, a 53% reduction in cycle time, and an 80% reduction in processing time compared to the conventional methods.

Forgings: Improved Process and Performance with Intensive Quenching (IQ) - IQ involves quenching steel parts in violently agitated water with a cooling rate that is significantly faster than quenching in oil, with high-pressure gas in vacuum furnaces, or in the air. IQ will increase the performance of parts, minimize distortions, and reduce heat treatment costs. In addition, IQ provides an estimated 20-30% reduction in product lead time.

Small Business Innovative Research (SBIR): 3D Printing Prosthetic Components - In partnership with DLA SBIR and the Scientific Program Manager for Rehabilitation Engineering and Prosthetics/Orthotics Rehabilitation, U.S. Department of Veterans Affairs, this effort focuses on production of prosthetics, making custom sockets — the part that fits around an amputee's leg.

Battery Network: Lithium-ion technology for missile guidance system - Designed a replacement lithium-ion power system for the TOW2 anti-tank missile guidance system. This approach utilizes standardized components for low cost manufacturing and enhanced operations. It replaces a heavier, lower performance nickel-cadmium battery and charger. U.S. Army AMCOM plans to meet immediate needs for 100 units with this product.

Our Advanced Microcircuit Emulation program successfully developed, validated and qualified a new, 128 kilobit RAM/ROM manufacturing capability which can produce a wide variety of previously discontinued memory chips. It has already re-established a source of supply for 4 part types which are used in over 90 DoD weapon systems, resulting in a potential redesign cost avoidance of almost \$100 million. This unique manufacturing capability has transitioned to full-scale production at SRI International and is available to redesign and produce hundreds of additional memory part types to help mitigate the readiness and cost impact

of microcircuit obsolescence. The benefit of this project is two-fold; improving readiness and avoiding the cost to replace or redesign systems or sub-systems in DoD weapon systems. Although the value of readiness is hard to quantify, the Diminishing Manufacturing Sources and Material Shortages (DMSMS) Guidebook estimates that over \$1 million in costs are incurred each time an electronic next-higher-assembly is redesigned due to obsolescence.

Improve Counterfeit Parts Identification; Prevent Commercial and Government Entity Code (CAGE) Hopping: Automated processes carry risks and DLA has taken major steps to reduce and mitigate those risks. We have improved our ability to identify fraudulent suppliers and counterfeit parts with improved Business Decision Analytics and advanced testing and Deoxyribonucleic acid marking.

People and Culture

DLA's goal for this year is to hire, develop and retain a high-performing, valued, resilient and accountable workforce.

In FY 2017, DLA was able to achieve the following:

- Implemented DoD Performance Management and Appraisal Program to approximately 24,700 employees across the enterprise;
- Improved hiring timeliness by 5 percent;
- Spearheaded the Agency's culture/climate program addressing challenges respective to organizational effectiveness and climate;
- Executed a 2.5 day leadership development forum for 135 high potential future leaders;
- Implemented a succession management framework to ensure continuity while mitigating knowledge gaps due to personnel attrition of key positions; and,
- Revamped the Human Resources Annual Operating Plan and cascading strategic initiatives.

DLA continues to monitor respective performance metrics and trends to ensure the Agency continues to successfully hire, develop and retain a high-performing workforce.

Strategic Engagement

Prior to the beginning of the formal Program Budget Review (PBR) process, R&D Program Managers conduct annual strategic assessments of established and disruptive technologies in order to determine potential opportunities to further or begin new R&D explorations. The assessments are presented to the R&D Chief, stakeholders and senior management in order to approve the technical priorities and resource requirements for the Five Year Defense Plan (FYDP), resulting in R&D's PBR Proposal.

In addition to meeting regularly with stakeholders and sponsors, R&D further engaged with industry and academic partners through implementing "R&D Industry Day", first held in September 2016, and recently the second day held October 2017, to share about DLA's logistics mission and how the R&D program supports across all supply chains.

Financial Stewardship

DLA's goal was to deliver effective and affordable financial solutions that support the DLA Strategic Plan, to include better cost visibility to our customers, more customer rate options that better reflect the drivers of cost, and improved analytical capabilities to evaluate new or improved business processes.

Additionally, DLA must program and justify resource requirements to the Office of the Under Secretary of Defense, Comptroller (OUSD(C)), execute resources efficiently and effectively, and achieve financial execution benchmarks. For the General Funds, DLA executed 98 percent of O&M, 97 percent of first year RDT&E, and nearly 50 percent of first year MILCON budget authority in 2017, performing very well against

these benchmarks. DLA General Funds also responded to Independent Public Accounting firm requests for information in support of DLA financial statement audit and identified key focus areas for FY 2018.

Process Excellence

R&D conducts monthly reviews via Strategic Focus Area calls and quarterly Program Management Reviews (PMRs), which provide opportunities for Program Managers and the R&D Chief to review the programmatic and financial health of R&D programs. The Strategic Focus Area Calls are centered on financial activities and contract actions. The PMRs support the review of the overall health of programs and include program performance in terms of schedule, technical performance and financial management.

R&D utilizes the Knowledge Management (KM) SharePoint Portal to facilitate the execution of the R&D budget. The Funds Request Module supports the R&D approval process for budget execution and is the main tool for supporting auditable, standard, and repeatable processes. The KM Portal serves as a repository for evidentiary material. In addition to supporting budget execution, the KM Portal is the primary collaboration tool for program managers and staff across various DLA offices.

R&D Staff conduct periodic reviews of tools, processes and procedures to ensure that they align with DLA and DoD policy as well as support the most efficient and effective use of resources. The reviews in FY 2017 resulted in the development of enhancements to the KM Portal, such as a module to capture Unfunded Requirements as well as improved decision-making process such as the R&D Financial Execution Board.

The Total Obligation Authority Integrator (TOAI) role was implemented in FY17 for PBR 19. The J3 TOAI collaborated with the O&M and R&D program managers to ensure tracking on overarching schedule and exhibit formats; which optimized the J3 Total Obligation Authority (TOA) baseline through internal trade-offs in order to develop and submit the strongest, integrated J3 PBR 19 Proposal to J8. The TOAI provided J8 a single J3 POC for TOA PBR, and reported status, impact to J3 stakeholders throughout the PBR cycle.

Financial Overview- DLA General Fund

The Financial Statements presented in this AFR relate solely to DLA’s GF. The Financial Statements for WCF and TF are located in their respective AFRs. The DLA’s budgetary resources were approximately \$1.7 billion for FY 2017. The budget represents our plan for efficiently and effectively achieving the strategic objectives set forth by Director, Lieutenant General Williams to carry out our mission and to ensure that the DLA manages its operations within the appropriated amounts using budgetary controls. The DLA prepares its Balance Sheet, Statement of Net Cost, and Statement of Changes in Net Position on an accrual basis; meaning that economic events are recorded as they occur, regardless of when cash is received or disbursed. These financial statements provide the results of our operations and financial position, including long-term commitments and obligations. Budgetary accounting principles require recognition of the obligation of funds according to legal requirements, which in many cases occurs prior to the occurrence of a transaction under the accrual basis. The recognition of budgetary accounting transactions is essential for compliance with legal constraints and controls over the use of federal funds, and are reported in the Statement of Budgetary Resources. Ernst & Young, LLP performed the audit of the DLA’s principal financial statements.

Balance Sheet

The Balance Sheet presents the resources owned or managed by the DLA that have future economic benefits (assets) and the amounts owed by DLA that will require future payments (liabilities). The difference between the DLA’s assets and liabilities is the residual amount retained by DLA (net position) that is available for future programs and capital investments.

Assets – What We Own and Manage

Assets represent amounts owned or managed by the DLA that can be used to accomplish its mission. As of September 30, 2017, the GF had \$2.1 billion in assets.

Fund Balance with Treasury (FBWT) is the GF’s largest asset, comprises 63 percent of the total assets. FBWT balances are primarily appropriated funds remaining at the end of the fiscal year.

General Property, Plant, and Equipment (PP&E), Net is the second largest asset, comprising 36 percent of total assets. The major items in this category include internal use software (IUS) under development and Construction in Progress (CIP). In acquiring these assets, the DLA either spent resources or incurred a liability to make payment at a future date; however, because these assets should provide future benefits to help accomplish the DLA mission, the DLA reports these items as assets rather than expenses. PP&E is recorded at cost, and depreciated over the estimated useful life of the asset. PP&E is presented net of accumulated depreciation.

Liabilities – What We Owe

Liabilities are the amounts: owed to the public or other federal agencies for goods and services provided but not yet paid for; to DLA employees for wages and future benefits; and for other liabilities. As of September 30, 2017, the GF reported approximately \$201.3 million in total liabilities.

The DLA’s largest liability is for *Accounts Payable*, representing 50 percent of total liabilities.

Environmental and Disposal Liabilities represents 43 percent of total liabilities, and is comprised of environmental cleanup costs associated with restoration of environmental sites. These environmental sites may include, but are not limited to, decontamination, decommissioning, site restoration, site monitoring, clean closure of assets, and post-closure costs related to the Agency’s operations that result in hazardous waste.

Other liabilities, comprising 7 percent of the GF’s liabilities, includes amounts due to the Other Federal Employment Benefits and other.

Statement of Net Cost (SNC)

Net cost of operations before gains and losses represents the difference between the costs incurred and revenue earned by GF programs. The GF SNC is broken into four appropriation categories: Operations and Maintenance, Research, Development, Test and Evaluation, Procurement and Family Housing & Military Construction. The major appropriation categories are represented below:

Operations and Maintenance represents 53 percent of the DLA’s net cost of operations and includes: Administration and Service-Wide Activities (DoD programs, DoD Enterprise Business Systems, and HQ DLA programs) and Environmental Programs. These programs are associated with DLA logistics mission as well as programs assigned to DLA from the DoD for budget administration purposes. Research, Development, and Test and Evaluation represents 36 percent of total net costs and includes: development of major upgrades that increase the performance of existing systems, the purchase of test articles, and the developmental testing and/or initial operational test and evaluation prior to system acceptance. The remaining appropriations, Procurement, and Military Construction and Family Housing, represent 11 percent of total net costs.

During FY 2017, the GF earned approximately \$58.0 million in exchange revenue. Exchange revenue arises from transactions in which the DLA provides value and the other party receives value. These exchanges are directly related to DLA operations.

Statement of Changes in Net Position (SCNP)

Net position represents the accumulation of revenue, expenses, budgetary, and other financing sources since inception, as represented by GF’s balances in unexpended appropriations and cumulative results of operations on the Statement of Changes in Net Position. Financing sources increase net position and include, but are not limited to, appropriations and user fees. The net costs discussed in the section above as well as transfers to other agencies decrease net position. Total net position is \$1.9 billion.

Statement of Budgetary Resources (SBR)

This statement provides information on the status of the approximately \$1.7 billion in budgetary resources available to the DLA during FY 2017.

The authority was derived from appropriations of \$815.5 million, \$808.4 million in authority carried forward from FY 2016, and \$49.0 million in offsetting collections.

As of September 30, 2017, \$456.5 million of the \$1.7 billion was not yet obligated. The \$330.8 million represents apportioned funds available for future use, and \$126 million in expired and unobligated funds. Of the total budget authority available, the DLA incurred a total of \$1.2 billion in obligations from salaries and benefits, purchase orders placed, contracts awarded, or similar transactions. These obligations will require payments during the same or future period.

Limitations of Financial Statements

The principal financial statements were prepared to report the financial position and results of operations of GF, pursuant to the requirements of 31 U.S.C. 3515(b). While the statements were prepared from DLA's books and records in accordance with the formats prescribed by the OMB, the statements are in addition to the financial reports used to monitor and control budgetary resources.

To the extent possible, the financial statements were prepared in accordance with Federal accounting standards. At times, the DLA is unable to implement all elements of the standards due to financial management systems limitations. The DLA continues to implement system improvements to address these limitations.

DLA and the Defense Finance and Accounting Service (DFAS) prepared the FY 2017 DLA financial statements from available automated finance, accounting, and feeder systems (such as acquisition, logistics, and personnel systems) and manual processes. Due to system deficiencies, there are limitations in collecting the data needed to prepare financial statements that comply with Federal standards. To prepare the financial statements, DFAS made numerous adjustments during the compilation process in an attempt to overcome these deficiencies.

DLA has several corrective actions underway that are intended to improve the underlying systems, business processes, and internal controls.

Other Key Regulatory Requirements

See the Other Information section for Prompt Payment Act and Debt Collection Improvement Act of 1996.

Management Assurances

The following section provides an overview of DLA's Management's Assurances related to FY 2017.

DEFENSE LOGISTICS AGENCY
HEADQUARTERS
8725 JOHN J. KINGMAN ROAD
FORT BELVOIR, VIRGINIA 22060-6221

July 21, 2017

MEMORANDUM FOR SECRETARY OF DEFENSE

THROUGH: UNDER SECRETARY OF DEFENSE (ACQUISITION, TECHNOLOGY, AND LOGISTICS)

SUBJECT: Annual Statement Required Under the Federal Managers' Financial Integrity Act (FMFIA) for Fiscal Year 2017

As Director of the Defense Logistics Agency (DLA), I recognize that DLA is responsible for managing risks and maintaining effective internal control to meet the objectives of Sections Two and Four of the FMFIA of 1982. DLA conducted its assessment of risk and internal control in accordance with the Office of Management and Budget (OMB) Circular No. A-123, *Management's Responsibility for Enterprise Risk Management and Internal Control*. Based on the results of the assessment "*Internal Control Evaluation – Management Control Testing*" (Attachment 1), DLA can provide a modified statement of reasonable assurance that internal controls over operations, reporting, and compliance were operating effectively as of September 30, 2017. Detail for the 16 material weaknesses and four non-conformances are reported in the "*Material Weaknesses and Corrective Action Plans Template*" (Attachment 3) and *Risk Management Template*" (Attachment 4). "*Significant Managers' Internal Control Program Accomplishments*" (Attachment 2) and "*Reportable Anti-Deficiency Act Violations Template Response*" (Attachment 5) (support the complete assertion package.

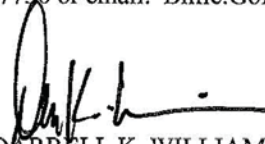

DLA conducted its assessment of the effectiveness of internal controls over operations in accordance with the FMFIA and the OMB Circular No. A-123. "*Internal Control Evaluation Management Control Testing*" section provides specific information on how DLA conducted this assessment (Attachment 1). Based on the results of the assessment, DLA can provide a modified statement of reasonable assurance, except for the five material weaknesses reported in the "*Material Weaknesses and Corrective Action Plans Template*" (Attachment 2) that internal controls over operations, reporting, and compliance were operating effectively as of September 30, 2017.

DLA conducted its assessment of the effectiveness of internal controls over reporting (including external financial reporting) in accordance with OMB Circular No. A-123, Appendix A. "*Internal Control Evaluation Management Control Testing*" section provides specific information on how the DLA conducted this assessment (Attachment 1). Based on the results of this assessment and the intent to Disclaim by Ernst & Young, Independent Public Accounting firm, DLA is unable to provide assurance that internal control over operations, reporting, and compliance (including external financial reporting) were operating effectively due to material weaknesses identified for the Working Capital Fund and General Fund as of June 30, 2017.

DLA can provide a modified statement of reasonable assurance that internal controls over operations, reporting, and compliance for the Transaction Fund were operating effectively as of September 30, 2017. Detail for the 11 material weaknesses reported can be found in the “*Material Weaknesses and Corrective Action Plans Template*” (Attachment 2).

DLA also conducted an internal review of the effectiveness of the internal controls over the integrated financial management systems in accordance with Federal Financial Management Improvement Act (FFMIA) of 1996 (Public Law 104-208) and OMB Circular No. A-123, Appendix D. “*Internal Control Evaluation – Management Control Testing*” section provides specific information on how DLA conducted this assessment (Attachment 1). Based on the results of this assessment, DLA can provide a modified statement of reasonable assurance, except for the **four** system non-conformance that the internal controls over the financial systems are in compliance with the FFMIA and OMB Circular No. A-123, Appendix D, as of June 30, 2017. Detail for the **four** non-conformances reported can be found in the “*Material Weaknesses and Corrective Action Plans Template*” (Attachment 2).

Point of contact for this action is Ms. Billie Sue Goff, Financial Compliance & Audit Readiness Operations, (703) 767-7736, DSN 427-7736 or email: Billie.Goff@dla.mil.

JUL 14 2017

MEMORANDUM FOR DIRECTOR, DEFENSE LOGISTICS AGENCY

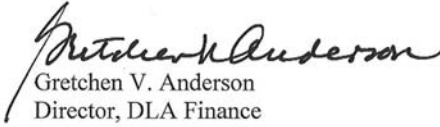

SUBJECT: Annual Statement Required Under the Federal Managers' Financial Integrity Act
For Fiscal Year 2017

Each Enterprise Business Process Owner is responsible to provide the Defense Logistics Agency (DLA) Director their informed judgement as to the overall adequacy and effectiveness of internal controls within their respective business processes related to operations, reporting, and compliance. DLA Finance recognizes the responsibility for establishing and maintaining effective internal controls to meet the objectives of the Federal Managers' Financial Integrity Act. DLA Finance assessed risk management and internal controls, in accordance with Office of Management and Budget Circular A-123, Management's Responsibility for Enterprise Risk Management and Internal Control, Appendix A, and Government Accountability Office Standards for Internal Control (**TAB A**). Based on the results of this assessment, DLA Finance is unable to provide assurance that internal control over operations, reporting, and compliance was operating effectively due to the material weaknesses identified for the Working Capital Fund (WCF) and General Fund (GF).

DLA Finance can provide a modified statement of reasonable assurance that internal controls over operations, reporting and compliance were operating effectively for the Transaction Fund (TF). Details of Financial Reporting/Financial System Material Weaknesses, Financial Reporting/Financial System Corrective Action Plans and Milestones are provided at (**TAB B**).

Ernst & Young (EY), Independent Public Accounting Firm, notified the Department of Defense Office of Inspector General of the intent to issue a disclaimer of opinion of the WCF and GF Fiscal Year 2017 Financial Statement (**TAB C**). EY is auditing DLA's Transaction Fund for Fiscal Year 2017 and, as of the date of this report, DLA has not received any TF observations from EY.

Point of contact for this action is Mr. Damon Hawkins, Chief, Financial Compliance, (703) 767-6607 or email: Damon.Hawkins@dla.mil.

Gretchen V. Anderson
Director, DLA Finance
Chief Financial Officer

Attachments as stated

Federal Financial Management Improvement Act

The Federal Financial Management Improvement Act of 1996 (FFMIA) requires federal agencies to implement and maintain financial management systems that comply substantially with:

- Federal financial management system requirements;
- Applicable federal accounting standards; and,
- The U.S. Standard General Ledger at the transaction level.

In assessing compliance with FFMIA, the DLA uses OMB guidance and considers the results of the Office of Inspector General's annual financial statement audits and Federal Information Security Modernization Act (FISMA) compliance reviews. As reported in the Chief Financial Officer's Management Assurance Statement, significant system improvement efforts are underway to modernize, certify, and accredit all financial management systems to conform to government-wide requirements.

DLA has developed and is implementing an Enterprise FFMIA Concept of Operations (CONOPs) that addresses critical activities towards achieving FFMIA compliance. The key components of the CONOPs include an FFMIA implementation approach, with a governance structure, roles and responsibilities to manage requirements, and activities for systems, controls, and processes. Additional activities include assessing OMB Circular A-123 test results to identify potential gaps in FFMIA compliance; continuous monitoring and reporting mechanisms to replace annual system testing (to provide an early warning for potential FFMIA compliance issues and inform the enterprise risk management process); and an annual FFMIA assessment and reporting process to support the DLA's Statement of Assurance. Over the next fiscal year several actions will be addressed to support the implementation of the FFMIA Enterprise CONOPs. These activities include establishing, maintaining and communicating policy, training and SOPs relating to OMB Circular A-123 and FFMIA. The approach includes the implementation of the FFMIA Monitoring Continuum, which encompasses ERM, Financial Risk Management, risk-based testing, data profiling and monitoring, and core operational activities that impact financial systems and processes. A key element will be the establishment of a charter governing the relationship between the CFO and the Chief Information Officer (CIO) defining the communication between J8 and J6.

Financial Management Systems

DLA Information Operations (J6) is the DLA knowledge broker, providing comprehensive, best practice Information Technology support to the DOD/DLA Logistics Business Community, resulting in the highest quality information systems, customer support, efficient and economical computing, data management, electronic business, telecommunication services, key management, and secure voice systems for DOD, DLA, and geographically separated operating locations. J6 endeavors to improve the control posture of systems and processes by testing and correcting deficiencies to ensure that DLA's systems are compliant with Federal system security and accounting requirements.

J6 conducts annual internal reviews of the effectiveness of the DLA internal controls over financial systems. J6 is able to provide modified assurance (with deficiencies noted) that the internal controls over the financial systems as of June 30, 2017 are in compliance with the FFMIA and OMB Circular A-123.

Additionally, J6 reviewed audit results from the current financial statement audit to make corrections and improvements as needed. Any deficiencies identified are aligned to the appropriate Corrective Action Plans issued for the Enterprise control areas to ensure they are addressed in a consistent and coordinated manner. Systems include:

- Defense Automatic Addressing System (DAAS)
- Defense Agencies Initiative (DAI)

- Defense Medical Logistics Standard Support – Wholesale (DMLSS-W)
- DoD Electronic Mall/FedMall (DoD EMALL/FedMall)
- Distribution Standard System (DSS)
- Employee Activity Guide for Labor Entry (EAGLE)
- Enterprise Business System (EBS)
- Electronic Document Access (EDA)
- Fuels Manager Defense (FMD)
- Invoice, Receipt Acceptance, and Property Transfer (iRAPT)
- Subsistence Total Order and Receipt Electronic System (STORES)

Federal Information Security Modernization Act of 2014

The Federal Information Security Modernization Act of 2014 (FISMA) provides a framework for ensuring effectiveness of security controls over information resources that support federal operations and assets, and provides a statutory definition for information security. FISMA requires the head of each agency to "implement policies and procedures to cost-effectively reduce information technology security risks to an acceptable level." J6 is the accountable entity within DLA to perform FISMA assessments and reporting.

FISMA reporting is conducted on an annual basis and covers all operating environments of DLA's authorized systems and applications, and also requires management to review the compliance of key security personnel with their training requirements. The compliance targets of FISMA reviews are tracked and monitored in Cyberscope, an automated tool that is mandated for use across the Federal Government. The Chief Information Officer (CIO) reviews and signs the FISMA results, which are then rolled up at the Department of Defense level for reporting purposes.

Anti-Deficiency Act (ADA)

DLA GF is not aware of any violations of the Anti-Deficiency Act that we must report to the Congress and the President (and provide a copy of the report to the Comptroller General) for the year ended September 30, 2017.

Financial Information

The Financial Information section demonstrates our commitment to effective stewardship over the funds DLA receives to carry out its mission, including compliance with relevant financial management legislation. It includes the General Fund (GF) **Financial Statements**: Balance Sheet, Statement of Net Cost, Statement of Changes in Net Position, and Statement of Budgetary Resources, as well as the accompanying **Notes to the Financial Statements**. It also includes the **Independent Auditors' Report** on the DLA's Financial Statements and accompanying Notes, provided by Ernst & Young, LLP.

MESSAGE FROM THE CHIEF FINANCIAL OFFICER
DECEMBER 2017

DLA's Fiscal Year 2017 Annual Financial Report (AFR) is our principal statement of financial accountability to the Department of Defense. Accountability represents the foundation of stewardship and DLA remains committed to ensuring value, efficiency, and effectiveness in every program. This section of the AFR provides detailed information about DLA's financial statements, and gives a comprehensive view of DLA's financial activities.

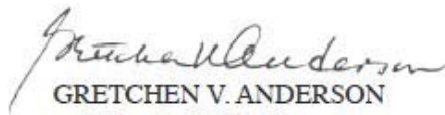

DLA received a Disclaimer of Opinion on the Agency's General Fund financial statements, which means the auditor conducted audit procedures on the statements but was unable to express an opinion on them. Tills was attributed to DLA's departures from generally accepted accounting principles and insufficient audit evidence supporting accounting assertions. We view this Disclaimer of Opinion as an opportunity that will continue to shape our way forward. Each Independent Public Accountant audit report will help DLA build a better financial reporting foundation and provide a stepping stone towards a clean audit opinion. In the coming years, each audit will help measure the effectiveness and efficiency of our business processes, systems, and controls as we incorporate a standard of continuous process improvement.

DLA's new audit phase, Audit Advancement, represents our ongoing audit sustainment efforts. Audit Advancement is not merely a financial management focus; it encompasses every organization at DLA. We have taken a holistic, risk-based look at the maturity of our enterprise, and have identified remediation focus areas to address material weaknesses. The key areas we will focus on for the General Fund are Fund Balance with Treasury and General Property, Plant, and Equipment.

DLA's mission is constantly evolving and challenging us to find innovative solutions. As the new Chief Financial Officer at DLA, I am committed to assisting DLA to reach this goal.

Winston Churchill once said, "Success is not final, failure is not fatal: it is the courage to continue that counts." The road ahead may be long, but I have full confidence DLA will meet the challenge. We are confident we have the right team in place to continue our forward progress toward an unmodified audit opinion, and look forward to working with the DLA enterprise on this endeavor.

GRETCHEN V. ANDERSON
Director, DLA Finance
Chief Financial Officer

Introduction

The principal financial statements included in this report are prepared pursuant to the requirements of the Government Management Reform Act of 1994 (Pub. L. 103-356) and the Chief Financial Officers Act of 1990 (Pub. L. 101-576), as amended by the Reports Consolidation Act of 2000 (Pub. L. 106-531), and the DLA Financial Accountability Act of 2004 (Pub. L. 108-330). Other requirements include the Office of Management and Budget (OMB) Circular No. A-136, Financial Reporting Requirements, as amended. The responsibility for the integrity of the financial information included in these statements rests with the management of DLA. Ernst and Young, LLP performed the audit of the DLA's GF principal financial statements. The Independent Auditors' Report accompanies the principal financial statements. This report reflects FY 2017 information only. Comparative statements are not presented because there are known misstatements in the FY 2016 balances that were corrected in FY 17. Therefore, presenting comparative statements would not provide additional value to the reader.

The DLA's GF principal financial statements consist of the following:

1. The **Balance Sheet** presents those resources owned or managed by the DLA that represent future economic benefits (assets), amounts owed by DLA that will require payments from those resources or future resources (liabilities), and residual amounts retained by DLA comprising the difference (net position) as of September 30, 2017.
2. The **Statement of Net Cost** presents the net cost of DLA operations for the fiscal year that ended on September 30, 2017. DLA net cost of operations is the gross cost incurred by DLA less any exchange revenue earned from DLA activities and any gains or losses from assumption changes on pensions, other retirement benefits, and other post-employment benefits.
3. The **Statement of Changes in Net Position** presents the change in the DLA's net position resulting from the net cost of DLA operations, budgetary financing sources, and other financing sources for the fiscal year that ended on September 30, 2017.
4. The **Statement of Budgetary Resources** presents how and in what amounts budgetary resources were made available to the DLA during FY 2017, the status of these resources at September 30, 2017, the changes in the obligated balance, and outlays of budgetary resources for the fiscal year that ended on September 30, 2017.
5. The **Notes to the Financial Statements** provide detail and clarification for amounts on the face of the financial statements as of September 30, 2017.

Notes to the Financial Statements

Note 1. Summary of Significant Accounting Policies - Unaudited

A. Reporting Entity

Created in 1961, the Defense Logistics Agency (DLA) is the Department of Defense's (DoD) largest logistics combat support agency, with the mission to provide the effective and efficient global solutions to warfighters and our valued customers around the clock, around the world in time of peace, national emergency, and war.

The DLA General Fund (GF) is responsible for conducting the following mission:

- The Operation and Maintenance (O&M) – Funds Other Logistics Services, Other Logistics Programs, and Defense Enterprise Business Systems.
- The Family Housing appropriation - Funds support of family housing units.
- The Research, Development, Test, and Evaluation (RDT&E) - Supports Advanced Logistics Concepts and Operational System Development.
- The Procurement Defense- Funds the purchase of mission essential equipment, including passenger carrying motor vehicles, telecommunications equipment, and automated data processing equipment.
- The Military Construction (MILCON) - Funds the major construction projects to replace, renovate, or build new facilities.

B. Basis of Presentation

The accompanying financial statements present the financial position, net cost of operations, changes in net position, and budgetary resources of the DLA GF in accordance with Generally Accepted Accounting Principles (U.S. GAAP) and the form and content requirements of the Office of Management and Budget (OMB) Circular No. A-136 except as described in the following paragraph. The financial statements have been prepared from the books and records of DLA GF, and do not include the DLA Transaction or Working Capital funds, which are reported in separate financial statements. Transactions and balances among the DoD's components have been adjusted in the consolidated presentation of the Balance Sheets, Statements of Net Cost, and Statements of Changes in Net Position. Eliminating adjustments are based on the information provided by the seller/service provider unless a waiver is obtained. A waived entity is a DoD reporting entity believed to have its buyer-side data more complete, accurate, and supported than the associated seller-side data. Currently, DLA GF is a non-waived entity. The elimination adjustments for accounts payable and expenses, unless otherwise specified, are based on seller's accounts receivable and revenue records. DLA GF is unable to validate the accounts receivable and revenue balances associated with manual adjustments. The Statement of Budgetary Resources is presented on a combined basis, as required by OMB Circular No. A-136. Information relative to classified assets, programs, and operations is aggregated and reported in such a manner that it is not discernible.

The DLA GF financial statements and supporting trial balances are compiled from the underlying financial data, trial balances of DLA's sub-allottees, which includes: Defense Microelectronics Activity, US Transportation Command, U.S. Army Corps of Engineers (USACE), and Naval Facilities Engineering Command (NAVFAC). The sub-allottees level trial balances may reflect known abnormal balances, however, at the consolidated DLA level, these abnormal balances may not be evident. Disclosures of abnormal balances are made in the applicable notes, but only to the extent that the abnormal balances are evident at the consolidated level.

The DLA GF is unable to fully prepare these financial statements in conformity with Generally Accepted Accounting Principles (U.S. GAAP) due to limitations of the financial and nonfinancial management systems and processes that currently support DLA GF financial statements. These systems are designed to maintain

accountability over assets, liabilities and budgetary resources, rather than preparing financial statements in accordance with U.S. GAAP. DLA is continuing the actions required to bring its financial and nonfinancial systems and processes into compliance with U.S. GAAP. Until all DLA financial and nonfinancial feeder systems and processes are able to collect and report financial information as required by U.S. GAAP, DLA will implement interim mitigation processes to address these limitations. In addition, DLA is remediating deficiencies pertaining to reconciliations and adequacy of the supporting documentation identified through audits and other compliance reporting.

Currently, DLA GF identified the following non-U.S. GAAP accounting practices or policies that impact DLA's financial statements:

- Accounts Payable – Negative payable occurs when a payment is made outside of the Enterprise Business System (EBS) prior to the goods receipts being posted in EBS. This results in an understatement of current year expenses and payables, and an overstatement of undelivered orders. A journal voucher is prepared monthly to properly record the accounting entries.
- Unfilled Customer Orders - The DLA does not have the proper policy and procedures to reconcile the Unfilled Customer Orders from the EBS trial balance to the transaction detail.
- Undelivered Orders - The DLA does not have the proper policy and procedures to reconcile the Undelivered Orders from the EBS trial balance to the transaction detail.

C. Basis of Accounting

The DLA uses the accrual basis of accounting to prepare the Balance Sheet, Statement of Net Cost and Statement of Change in Net Positions. U.S. GAAP encompasses both accrual and budgetary transactions. Under accrual accounting, revenues are recognized when earned and expenses are recognized when incurred. The Statement of Budgetary Resources is prepared using a budgetary basis of accounting and complies with legal requirements on the use of federal funding.

D. Appropriations and Funds

The DLA GF receives annual appropriations from Congress, which provide the annual budget to incur obligations and to pay for goods and services.

The DLA GF receives its funding from the Office of the Under Secretary of Defense (Comptroller) (OUSD(C)) in Treasury Index (TI)-97, along with Other Defense Organizations (ODOs). OUSD uses a data element referred to as a 'limit' to differentiate the various ODOs under TI-97. DLA GF uses limits assigned to the TI-97 organizations to track spending at a level below the Treasury Account Symbol (TAS) level.

The DLA GF receives the following appropriations and funds to execute its mission and subsequently report on resource usage:

- O&M appropriation funds Administration and Service-Wide Activities (DoD programs, DoD Enterprise Business Systems, and HQ DLA programs) and Environmental Programs. These programs are associated with DLA logistics mission as well as programs assigned to DLA from the DoD for budget administration purposes. DLA GF is either the executive agent responsible for program oversight and policy guidance or the budget administrator responsible for administrative support for these programs.
- The Family Housing appropriation funds the routine operations and maintenance of 124 military family housing units. Routine operation and maintenance includes management costs, utility costs and cyclical maintenance such as painting and renovations. Note: DLA GF received approval to divest these units beginning in FY 2018 and completing in FY 2019.

- RDT&E appropriation funds the development of major upgrades that increase the performance of existing systems, the purchase of test articles, and the developmental testing and/or initial operational test and evaluation prior to system acceptance. In addition, the RD&TE appropriation develops, manages, and implements innovative microelectronic solutions to enhance DoD mission capabilities. These capabilities are leveraged to develop low-volume, high mix fabrication processes for state-of-the-art technologies that meet the Department's performance and reliability needs for legacy microelectronics that are unavailable from commercial foundries. RDT&E also helps ensure that advanced logistics concepts and business processes are used to accomplish the agency's mission. Logistics Research and Development (R&D) identifies the best commercial business practices and tailors them, as necessary, into the most effective business processes for DLA. Manufacturing Technology R&D provides the critical link between invention and application.
- The Procurement Defense-Wide appropriation funds mission essential equipment, including automated data processing, telecommunications equipment, and passenger carrying vehicles that afford a high degree of efficiency, effectiveness, and productivity in the accomplishment of DLA's logistics mission.
- MILCON appropriation funds the construction of facilities that support DLA's mission. These include DoD fuel infrastructure projects, and distribution and disposition facilities. DLA sub-allocates MILCON authority to USACE and NAVFAC, which are DLA's primary design and construction agents for the MILCON program.

E. Fund Balance with Treasury

The DLA GF does not maintain cash in commercial bank accounts, but rather in U.S. Treasury Accounts. The disbursing offices of the Defense Finance and Accounting Service (DFAS), USACE, and the Department of State's financial service centers process DLA's cash collections, disbursements, and adjustments.

Undistributed disbursement and collection represent the amounts that have been reported to Treasury, but have not yet been posted to DLA's general ledger. Undistributed amounts can be a result of timing, invalid line of accounting, and invalid TAS information. Undistributed amounts can be supported or unsupported. Supported undistributed amounts are those with supporting documentation. Unsupported undistributed amounts are amounts that are not yet reconciled and not yet researched to supporting documentation.

The DLA GF is not able to reconcile its FBWT ending balances in the general ledger directly to the U.S. Treasury balances due to noted material weaknesses. DLA policy is to allocate supported undistributed disbursements and collections between federal and nonfederal categories. These categories are based on the percentage of distributed federal and nonfederal accounts payable and accounts receivable. Adjustments for both supported and unsupported undistributed disbursements and collections are applied to reduce differences of accounts payable and receivable balances between DLA and Treasury's accounts.

F. Accounts Receivable, Net

Accounts Receivable consists of amounts owed to DLA GF by other federal agencies and the public for contracting support, system engineering support, sustainment and upgrades to infrastructure, and financial service support. The DLA GF Accounts Receivable does not have an allowance for doubtful account. The amounts due from customers are deemed fully collectible.

G. General Property, Plant and Equipment

The DLA GF Property, Plant & Equipment consists of internal use software (IUS) under development and Construction in Progress (CIP). The accounts are not subject to amortization and depreciation.

The amounts in the CIP account are transferred to the appropriate PP&E account when the assets are placed in service. Additional service costs are transferred at the final acceptance of the assets. Due to noted deficiencies in policy and procedure, DLA is not able to reconcile their recorded CIP balances.

The DLA does not have the proper policies and procedures to identify and capitalize costs related to IUS.

H. Advances and Prepayments

When advances are permitted by law, legislative action, or presidential authorization, DLA's policy is to record advances or prepayments. As such, payments made in advance of the receipt of goods and services are reported as other assets on the Balance Sheet.

I. Other Assets

Other assets (with the public) include those assets such as civil service employee pay and travel advances not reported elsewhere on the DLA Balance Sheet.

J. Accounts Payable

Accounts Payable includes amounts owed to federal and nonfederal entities for goods and services received by DLA. DLA GF estimates and records accruals when service and goods are performed or received.

K. Commitments and Contingencies

The DLA recognizes Contingent Liabilities, in the DLA's Balance Sheet and Statement of Net Costs when they are probable and the loss can be reasonably estimated. In the event of an adverse judgment against the Government, some of the liabilities may be payable from the U.S. Treasury.

The DLA is responsible for accurate reporting of the environmental expense and liabilities for the real property and/or equipment that it records and reports on its financial statements as assets, regardless of ownership. DLA identifies and estimates accrued Environmental Liabilities through its annual Cost-to-Complete process. DLA's accrued Environmental Liabilities are comprised of environmental cleanup costs associated with restoration of environmental sites on real property that it does not own but has received appropriated funds to execute and manage. These environmental sites may include, but are not limited to, decontamination, decommissioning, site restoration, site monitoring, clean closure of assets, and post-closure costs related to the Agency's operations that result in hazardous waste.

L. Payroll, Annual and Sick Leave accruals

Accrued payroll consists of salaries, wages, and other compensation earned by employees but not yet disbursed. The liability is estimated for reporting purposes based on historical pay information.

The DLA accrues the cost of unused annual leave, including restored leave, compensatory time, and credit hours as earned and reduces the accrual when leave is taken. The DLA accrued leave amounts upfront based on accrued leave reported in the Defense Civilian Payroll System.

M. Federal Employment Benefit

The Federal Employees' Compensation Act (FECA), administered by the U.S. Department of Labor (DOL), provides disability and medical benefits to covered federal employees injured on the job or who have occupational illness, and the survivor's benefit for employee whose death is attributable to a job-related injury or occupational illness. The DOL bills the DLA annually as claims are paid, and the DLA in turn accrues a liability to recognize the future payments. Payment on these bills is deferred for two years to allow for funding to go through the budget process. Similarly, employees that the DLA terminates without cause may receive unemployment compensation benefits under the unemployment insurance program also administered by the

DOL, which bills each agency quarterly for paid claims. In addition, the DLA records estimates for the FECA actuarial liability using the DOL's FECA bill.

N. Pension Benefits

The DLA's civilian employees may participate in either the Civil Service Retirement System (CSRS) or the Federal Employees Retirement System (FERS), depending on when they started working for the federal government. Additionally, personnel covered by FERS, also have varying coverage under Social Security. DLA finances only a portion of the civilian pensions. While reporting and funding civilian pensions under CSRS and FERS are the responsibility of the Office of Personnel Management, DLA recognizes an imputed expense for the portion of civilian employee pension's benefit on the Statement of Net Cost. DLA also recognizes corresponding imputed revenue from the civilian employee pension's benefit on the Statement of Changes in Net Position.

O. Revenues

The DLA GF revenue mainly consists of exchange revenue which arises when DLA provides services to the public or Federal entities at a price. Revenues from services in O&M appropriation includes support for Continuity of Operations; Law Enforcement Support Office; Morale, Welfare and Recreation; and Defense Travel System Support. Revenues from service in Research, Development, Test, and Evaluation RDT&E appropriation includes support for the Next Generation Resource Management System; Mapping Enterprise Business System; and Defense Information System Security.

P. Net Position

Net position is the residual difference between assets and liabilities and consists of unexpended appropriations and cumulative results of operations.

Unexpended appropriations represent the amounts of budget authority that are unobligated and have not been rescinded or withdrawn. Unexpended appropriations also represent amounts obligated for which legal liabilities for payments have not been incurred.

Cumulative results of operations represent the net difference between expenses and losses, and financing sources (including appropriations, revenue, and gains), since inception. The cumulative results of operations also include donations and transfers in and out of assets that were not reimbursed.

Q. Other Financing Sources

The DLA GF receives congressional appropriations as financing sources for general funds. These funds either expire annually or on a multi-year basis. When authorized by legislation, these appropriations are supplemented by revenues generated by services provided.

The DLA recognizes the costs incurred by the DLA but financed by other entities on behalf of the DLA as imputed financing. DLA GF recognizes the following imputed costs: (1) employee pension, post-retirement health, and life insurance benefits; and (2) post-employment benefits for terminated and inactive employees to include workers compensation under the Federal Employees' Compensation Act.

R. Use of Estimates

The preparation of financial statements in conformity with U.S. GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities. The DLA GF uses estimates for Environmental Liabilities at the date of the financial statements. The actual result from the reported amounts and expenses during the reporting period may differ from these estimates

Note 2. Fund Balance with Treasury - Unaudited

Fund Balance with Treasury at September 30, 2017 (in thousands)

	2017
Fund Balances	
Appropriated Funds	\$ 1,322,344
Total Fund Balances	<u>\$ 1,322,344</u>
Status of Fund Balance with Treasury	
Unobligated Balance	
Available	\$ 330,825
Unavailable	125,709
Obligated Balance not yet Disbursed	\$ 905,487
Other Budgetary FBWT	<u>\$ (39,677)</u>
Total	<u>\$ 1,322,344</u>

The Status of Fund Balance with Treasury reflects the budgetary resources to support FBWT. It primarily consists of unobligated and obligated balances. The balances reflect the budgetary authority remaining for disbursement against current or future obligations.

Unobligated Balance is classified as available or unavailable and represents the cumulative amount of budgetary authority that has not been set aside to cover outstanding obligations.

Obligated Balance not yet Disbursed represents funds that have been obligated for goods and services not received, and those received but not yet paid.

Other Budgetary FBWT reduces the Status of FBWT. This amount includes the remaining budgetary resources accounts such as contract authority and unfilled customer orders.

The DLA GF has no undistributed transactions in FY 2017.

Note 3. Other Assets - Unaudited

Total Liabilities Covered by Budgetary Resources	105,274
Total Liabilities	\$ 201,304

Other Information:

Liabilities Not Covered by Budgetary Resources includes liabilities for which congressional action is needed before budgetary resources are available.

Intragovernmental Liabilities Other consists of Federal Employment Compensation Act Liability and Other Unfunded Employment Related Liability.

Nonfederal Liabilities Other consists of unfunded annual leave owed to civilian employees.

Total Liabilities Not Covered by Budgetary Resources includes \$9,019 (in thousands) Environmental and Disposal Liabilities.

Note 6. Environmental and Disposal Liabilities - Unaudited

Environmental and Disposal Liabilities at September 30, 2017 (in thousands)

	2017
Environmental Liabilities--Nonfederal	
Accrued Environmental Restoration Liabilities	
Active Installations—Installation Restoration Program (IRP) and Building Demolition and Debris Removal (BD/DR)	\$ 85,651
Total Environmental Liabilities	\$ 85,651

The DLA Environmental Liabilities (EL) are comprised of two primary elements: (1) existing obligations supporting the Defense Environmental Restoration Account (DERA) and Base, Realignment, and Closure (BRAC) funded environmental restoration programs, and (2) anticipated future cost to complete (CTC)

environmental restoration requirements at DLA's environmental sites. In FY 2017, DLA utilized Version 11.4 of the Remedial Action Cost Engineering & Requirements (RACER) software to generate the fiscal year (FY) 2018 CTC estimates of anticipated future costs. Cost estimates were generated for 74 Active Installation Restoration Program sites and one BRAC IRP site.

Applicable Laws and Regulations for Cleanup Requirements

The DLA is required to clean up contamination resulting from past waste disposal practices, leaks, spills and other prior activities, which may have created a public health or environmental risk. DLA is required to comply with the following laws and regulations where applicable: the Comprehensive Environmental Response, Compensation, and Liability Act; the Superfund Amendments and Reauthorization Act (SARA); the Resource Conservation and Recovery Act (RCRA); the Clean Water Act; and other applicable Federal, State, interstate, and local laws and regulations. Required cleanup may at times extend beyond Installation boundaries onto privately owned property, and onto sites where DLA is named as a potentially responsible party by a regulatory agency.

Types of Environmental Liabilities and Disposal Liabilities.

The DLA is responsible for cleanup requirements of DERP-eligible sites at Active IRP, BRAC IRP, and Military Munition Response Programs. All clean-up is conducted in coordination with regulatory agencies, other responsible parties, and current property owners.

Methods for Assigning Estimated Total Cleanup Costs to Current Operating Periods

The DLA GF uses the RACER software to estimate future environmental costs. The RACER Steering Committee ensures that the software is validated, verified, and accredited in accordance with Department of Defense Instruction 5000.61. OSD is working with the RACER steering committee and stakeholders to identify improvements to RACER functionality, auditability, and documentation. Additionally, DLA utilizes historical user-defined costs to estimate future environmental costs.

Nature of Estimates and the Disclosure of Information Regarding Possible Changes Due to Inflation, Deflation, Technology, or Applicable Laws and Regulations

The primary change in site-level estimates from the previous CTC occurred in the FY 2018 CTC and can be primarily attributed to a decrease in IRP Active Installations Environmental Corrective Actions primarily due to a decrease in Program Management costs based on DLA's revised post-Future Year Defense Program methodology for calculating program management costs, which was implemented in accordance with OSD guidance: Strategy for Environmental and Disposal Liability Audit Readiness (September 30, 2015). Year-to-year fluctuations in DLA's ELs are expected due to changes in agreements with regulatory agencies, deflation, inflation, and technology. The latest version of RACER was used to prepare the estimates.

Uncertainty Regarding the Accounting Estimates used to calculate the Reported Environmental Liabilities

The cost estimates produced through the CTC process are considered accounting estimates, which require the Program Managers to make reasonable professional judgments and assumptions based upon information available at the time the estimate are calculated. The actual results may materially vary from the accounting estimates if agreements with regulatory agencies require remediation to a different degree than anticipated when calculating the estimates. Liabilities can be further affected if investigation of the environmental sites reveals contamination levels that differ from the estimate parameters.

DLA has instituted extensive controls to ensure that these estimates are accurate and reproducible. Due to the inherent uncertainty involved with environmental contamination and associated remedial actions, RACER, as a parametric cost estimating tool, is used as a preliminary order of magnitude estimate. The stated total liability includes prior year obligations and the estimate of future costs necessary to complete the environmental restoration requirements.

In FY 2017, DLA implemented the Roll Forward process to determine if any significant changes to EL occurred as of September 30, 2017 since the completion of the annual CTC estimates in July 2017. If significant changes exist, they are included in the EL balance as of September 30, 2017. For FY 2017, it was determined that there were no significant changes to DLA GF EL between the completion of the annual CTC process and September 30, 2017 in accordance with OSD memorandum for Strategy for Environmental & Disposal Liabilities Audit Readiness (September 30, 2015).

Additionally, in FY 2017, DLA implemented the EL Site Identification (ID) process that reviews the Agency's Environmental Event Repository and evaluates each event for EL potentiality for use in the annual CTC and EL financial reporting. During the FY 2017 Site ID Process, the sites identified as Potential ELs due to the lack of sufficient information/data or pending additional corrective or closure actions. These sites will be re-evaluated during the next Site ID process to determine if any changes have taken place and sufficient information/data is available to create an estimate that would be included in the GF EL.

Note 7. Other Liabilities - Unaudited

Other Liabilities at September 30, 2017 (in thousands)

	2017		
	Current Liabilities	Noncurrent Liabilities	Total

Total Other Benefits	\$ 4,602	\$ 4,602
Total Other Federal Employment Benefits:	\$ 4,602	\$ 4,602

Actuarial Calculations

The DLA actuarial liability for workers' compensation benefits is developed by the Department of Labor's (DOL) Office of Workers' Compensation Programs (OWCP) and provided to DLA at the end of each fiscal year. The liability includes the expected liability for death, disability, medical and miscellaneous costs for approved compensation cases. The liability is determined using a method that utilizes historical benefit payment patterns to predict the ultimate payments. The projected annual benefit payments are then discounted to the present value using the Office of Management and Budget's (OMB) economic assumptions for 10-year U.S. Treasury notes and bonds. Cost of living adjustments (COLAs) and medical inflation factors are also applied to the calculation of projected future benefits.

Actuarial Cost Method and Assumptions

The liability for future workers' compensation benefits includes the expected liability for death, disability, medical, and miscellaneous costs for approved compensation cases, plus a component for incurred but not reported claims. The liability is determined using a method that utilizes historical benefit payment patterns related to a specific incurred period to predict the ultimate payments related to that period. Consistent with past practice, these projected annual benefit payments have been discounted to present value using OMB's economic assumptions for 10-year U.S. Treasury notes and bonds. Interest rate assumptions utilized for discounting are as follows:

Year 1: 2.218% and thereafter

To provide more specifically for the effects of inflation on the liability for future workers' compensation benefits, wage inflation factors (COLAs) and medical inflation factors (Consumer Price Index Medical (CPIMs)) were applied to the calculation of projected future benefits. The actual rates for these factors for the charge back year (CBY) 2016 were also used to adjust the methodology's historical payments to current year constant dollars. The compensation COLAs and CPIMs used in the projections for various CBY were as follows:

CBY	COLA	CPIM
2017	N/A	N/A
2018	1.22%	3.20%
2019	1.35%	3.52%
2020	1.59%	3.80%
2021	1.99%	3.99%
2022	2.26%	3.91%

The model's resulting projections were analyzed by DOL to insure that the estimates were reliable. The analysis was based on four tests: (1) a sensitivity analysis of the model to economic assumptions; (2) a comparison of the percentage change in the liability amount by the agency to the percentage change in the actual incremental payments; (3) a comparison of the incremental paid losses per case (a measure of case-severity) in CBY 2016 to the average pattern observed during the most current three charge back years; and (4) a comparison of the estimated liability per case in the 2016 projection to the average pattern for the projections of the most recent three years.

The cost model used for the estimated actuarial liability is updated only at the end of each fiscal year.

Note 9. Cost and Exchange Revenue - Unaudited

Program Costs at September 30, 2017 (in thousands):

	2017
Operations and Maintenance	
Intragovernmental Costs	\$ 149,893
Public Costs	252,856
Total Costs	<u>\$ 402,749</u>

Total Net Cost	<u>\$ 262,067</u>

Note 9. Cost and Exchange Revenue (Continued) - Unaudited

Program Costs at September 30, 2017 (in thousands): (Continued)

	2017
Family Housing & Military Construction	
Intragovernmental Costs	\$ 29,244
Public Costs	47,680
Total Costs	<u>\$ 76,924</u>
Intragovernmental Earned Revenue	\$ -
Public Earned Revenue	-
Total Earned Revenue	<u>\$ -</u>
Total Net Cost	<u>\$ 76,924</u>
Consolidated	
Intragovernmental Costs	\$ 196,842
Public Costs	579,490
Total Costs	<u>\$ 776,332</u>
Intragovernmental Earned Revenue	\$ (57,463)
Public Earned Revenue	(538)
Total Earned Revenue	<u>\$ (58,001)</u>
Total Net Cost	<u>\$ 718,331</u>

Intragovernmental costs and revenue represents transactions made between two reporting entities within the Federal Government. Nonfederal costs and revenues are exchange transactions made between the reporting entity and a Nonfederal entity.

The DLA's Enterprise Business System (EBS) does not track intragovernmental transactions by customer at the transaction level. Buyer-side expenses are adjusted to agree with internal seller-side revenues. Expenses are generally adjusted by reclassifying amounts between federal and nonfederal expenses.

Note 10. Apportionment Categories of New Obligations and Upward Adjustments: Direct vs. Reimbursable Obligations - Unaudited

The DLA had apportionment categories for Obligations Incurred. Category A and Category B for both Direct and Reimbursable Obligations Incurred. Category A and Category B did not contain Obligations Exempt from apportionment. The table below summarizes the apportionment categories (in thousands):

	Category A	Category B	Totals
Direct Obligations Incurred	\$402,588	\$760,555	\$1,163,143
Reimbursable Obligations Incurred	-	\$53,730	\$53,730
Total	\$402,588	\$814,285	\$1,216,873

Note 11. Undelivered Orders at the End of the Period - Unaudited

The DLA GF budgetary resources obligated for undelivered orders at the end of the period is \$813.7 million.

Note 12. Reconciliation of Net Cost of Operations to Budget - Unaudited

Reconciliation of Net Cost of Operations to Budget for FY 2017 is as follows (in thousands):

	2017
Resources Used to Finance Activities:	
Budgetary Resources Obligated:	
New obligations incurred	\$ 1,216,874
Less: Spending authority from offsetting collections and recoveries	(415,977)
Net Obligations	<u>800,897</u>
Other Resources:	
Transfers in/out without reimbursement	\$ (176,885)
Imputed financing from costs absorbed by others	2,081
Other	(533,246)
Net other resources used to finance activities	<u>(708,050)</u>
Total resources used to finance activities	\$ 92,847
Resources Used to Finance Items not Part of the Net Cost of Operations:	
Change in budgetary resources obligated for goods, services and benefits ordered but not yet provided:	
Undelivered Orders	\$ 189,582
Unfilled Customer Orders	(9,097)
Resources that fund expenses recognized in prior Periods	(15,512)
Other	710,131
Total resources used to finance items not part of the Net Cost of Operations	<u>875,104</u>
Total resources used to finance the Net Cost of Operations	\$ 967,951
Components Requiring or Generating Resources in Future Period:	
Increase in annual leave liability	180
Other	437
Total components of Net Cost of Operations that will Require or Generate Resources in future periods	<u>617</u>
Components not Requiring or Generating Resources:	
Depreciation and amortization	(34,345)
Revaluation of assets or liabilities	8,334
Other	(224,226)
Total Components of Net Cost of Operations that will not Require or Generate Resources	<u>(250,237)</u>
Total components of Net Cost of Operations that will not Require or Generate Resources in the current period	<u>(249,620)</u>
Net Cost of Operations	<u>\$ 718,331</u>

The Reconciliation of Net Cost of Operations to Budget provides information on the total resources used by DLA, both those received through the budget and those received by other means. It reconciles the budgetary obligations incurred to the net cost of operations for a given reporting period. It articulates and details the relationship between net obligations from budgetary accounting and net cost of operations from proprietary accounting.

Below are the primary business events comprised in the lines titled, “Other”:

Resources Used to Finance Activities, Other - is comprised of DLA Military Construction (MILCON):

- Other losses related to Naval Facilities Engineering Command (NAVFAC) Construction-in-Progress (CIP).
- Losses on disposition of assets related to reconciling differences between Defense Departmental Reporting System and Corps of Engineers Management System.

Components Requiring or Generating Resources in Future Period, Other is comprised of DLA Operation and Maintenance (O&M) Employer Contributions to Employee Benefit Programs Not Requiring Current-Year Budget Authority (Unobligated)-Unemployment-Military Personnel Benefits, to record 4th Quarter, FY 2017 Unemployment Compensation on behalf of the services and DLA.

Components not Requiring or Generating Resources, Other is comprised of:

- DLA MILCON - Cost Capitalization offset related to NAVFAC CIP.
- DLA RDTE - Cost capitalization related to Internal-Use-Software (IUS) under development, primarily for Defense Agency Initiatives and Electronic Funds Distribution; offset by DEBS Assets adjustments related to IUS in development.
- DLA O&M - Cost capitalization related to Internal-Use-Software under development, related to DEBS Assets.

Independent Auditors' Report

INSPECTOR GENERAL
DEPARTMENT OF DEFENSE
4800 MARK CENTER DRIVE
ALEXANDRIA, VIRGINIA 22350-1500

December 12, 2017

MEMORANDUM FOR UNDER SECRETARY OF DEFENSE (COMPTROLLER)/
CHIEF FINANCIAL OFFICER, DoD
DIRECTOR, DEFENSE LOGISTICS AGENCY

SUBJECT: Transmittal of the Disclaimer of Opinion on the Defense Logistics Agency General
Fund Financial Statements and Related Footnotes for FY 2017
(Project No. D2016-D000FE-0208.000, Report No. DODIG-2018-051)

We contracted with the independent public accounting firm of Ernst & Young to audit the Defense Logistics Agency (DLA) FY 2017 General Fund Financial Statements and related footnotes as of September 30, 2017, and for the year then ended, and to provide a report on internal control over financial reporting and compliance with laws and regulations. The contract required Ernst & Young to conduct the audit in accordance with generally accepted government auditing standards (GAGAS); Office of Management and Budget audit guidance; and the Government Accountability Office/President's Council on Integrity and Efficiency, "Financial Audit Manual," July 2008. Ernst & Young's Independent Auditor's Reports are attached.

Ernst & Young's audit resulted in a disclaimer of opinion. Ernst & Young could not obtain sufficient, competent evidential matter to support the reported amount within the DLA financial statements. As a result, Ernst & Young could not conclude whether the financial statements and related footnotes were fairly presented in accordance with accounting principles generally accepted in the United States of America. Accordingly, Ernst & Young did not express an opinion on the DLA FY 2017 General Fund Financial Statements and related footnotes.

Ernst & Young's separate report on "Internal Control over Financial Reporting" discusses six material weaknesses related to DLA's internal controls over financial reporting. Ernst & Young's report also includes a significant deficiency related to financial reporting. Ernst & Young's additional report on "Compliance and Other Matters Based on an Audit of the Financial Statements Performed" discusses four instances of noncompliance with applicable laws and regulations.

In relation to the contract, we reviewed Ernst & Young's report and related documentation and discussed the audit results with Ernst & Young representatives. Our review, as differentiated from an audit conducted in accordance with GAGAS, was not intended to enable us to express, and we did not express, an opinion on the DLA's FY 2017 General Fund Financial Statements and related footnotes, conclusions about the effectiveness of internal control, conclusions on whether the DLA's financial systems substantially complied with the "Federal Financial Management Improvement Act of 1996," or conclusions on whether the DLA complied with laws and regulations.

Ernst & Young is responsible for the attached reports, dated December 12, 2017, and the conclusions expressed in these reports. However, our review disclosed no instances in which Ernst & Young did not comply, in all material respects, with GAGAS.

We appreciate the courtesies extended to the staff. Please direct questions to me at (703) 601-5945.

Lorin T. Venable, CPA
Assistant Inspector General
Financial Management and Reporting

Report of Independent Auditors

The Director of the Defense Logistics Agency and
The Inspector General of the Department of Defense

Report on the Financial Statements

We were engaged to audit the accompanying financial statements of the General Fund of the Defense Logistics Agency (“DLA”), which comprise of the balance sheet as of September 30, 2017, and the related statements of net costs, changes in net position, and statement of budgetary resources for the year ended September 30, 2017, and the related notes to the financial statements.

Management’s Responsibility for the Financial Statements

Management is responsible for the preparation and fair presentation of the financial statements in conformity with U.S. generally accepted accounting principles; this includes the design, implementation and maintenance of internal control relevant to the preparation and fair presentation of the financial statements that is free of material misstatement, whether due to fraud or error.

Auditor’s Responsibility

Our responsibility is to express an opinion on these financial statements based on conducting the audit in accordance with auditing standards generally accepted in the United States, and the standards applicable to financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States and Office of Management and Budget Bulletin No. 17-03, *Audit Requirements for Federal Financial Statements*. Because of the matter described in the Basis for Disclaimer of Opinion paragraph, however, we were not able to obtain sufficient appropriate audit evidence to provide a basis for an audit opinion.

Basis for Disclaimer of Opinion

The Department of Defense, including DLA, continues to have unresolved accounting issues and material weaknesses in internal controls that cause DLA to be unable to provide sufficient evidential support for complete and accurate financial statements on a timely basis. As a result, we cannot determine the effect of the lack of sufficient appropriate audit evidence on DLA’s financial statements as a whole for the year ended September 30, 2017.

Disclaimer of Opinion

Because of the significance of the matter described in the Basis for Disclaimer of Opinion paragraph, we have not been able to obtain sufficient appropriate audit evidence to provide a basis for an audit opinion. Accordingly, we do not express an opinion on the financial statements.

Other Matters

Required Supplementary Information

Accounting principles generally accepted in the United States require that the Management's Discussion and Analysis, as listed in the Table of Contents, be presented to supplement the financial statements. Such information, although not a part of the financial statements, is required by the Federal Accounting Standards Advisory Board who considers it to be an essential part of financial reporting for placing the financial statements in an appropriate operational, economic, or historical context. We have applied certain limited procedures to the required supplementary information in accordance with auditing standards generally accepted in the United States, which consisted of inquiries of management about the methods of preparing the information and comparing the information for consistency with management's responses to our inquiries, the financial statements, and other knowledge we obtained during our audit of the financial statements. We do not express an opinion or provide any assurance on the information because the limited procedures do not provide us with sufficient evidence to express an opinion or provide any assurance.

Other Financial Information and Other Information

Our audit was conducted for the purpose of forming an opinion on the financial statements that collectively comprise DLA's basic financial statements. The Other Financial Information, as identified on DLA's Agency Financial Report Table of Contents, is presented for purposes of additional analysis and is not a required part of the basic financial statements.

The Other Financial Information is the responsibility of management and was derived from and relates directly to the underlying accounting and other records used to prepare the basic financial statements. Such information has been subjected to the auditing procedures applied in an engagement to perform an audit of the basic financial statements and certain additional procedures, including comparing and reconciling such information directly to the underlying accounting and other records used to prepare the basic financial statements or to the basic financial statements themselves, and other additional procedures in accordance with auditing standards generally accepted in the United States. Because of the significance of the matter described in the Basis for Disclaimer of Opinion paragraph, we have not been able to obtain sufficient appropriate audit evidence to provide a basis for an audit opinion. Accordingly, we do not express an opinion on the Other Financial Information.

The Other Information, as listed in the Table of Contents, has not been subjected to the auditing procedures applied in the engagement to perform an audit of the financial statements, and, accordingly, we do not express an opinion or provide any assurance.

Other Reporting Required by *Government Auditing Standards*

In accordance with *Government Auditing Standards*, we also have issued our reports dated December 12, 2017 on our consideration of DLA's internal control over financial reporting and on our tests of its compliance with certain provisions of laws, regulations, contracts and other matters. The purpose of those reports is to describe the scope of our testing of internal control over financial reporting and compliance and the results of that testing, and not to provide an opinion on internal control over financial reporting or on compliance. Those reports are an integral part of an engagement to perform an audit in accordance with *Government Auditing Standards* in considering DLA's internal control over financial reporting and compliance.

Report of Independent Auditors on Internal Control Over Financial Reporting
Based on an Audit of Financial Statements
Performed in Accordance with *Government Auditing Standards*

The Director of the Defense Logistics Agency and the
Inspector General of the Department of Defense

We were engaged to audit, in accordance with auditing standards generally accepted in the United States, the standards applicable to financial audits contained in *Government Auditing Standards* issued by the Comptroller General of the United States and the Office of Management and Budget (“OMB”) Bullet No. 17-03, *Audit Requirements for Federal Financial Statements*, the financial statements of the General Fund of the Defense Logistics Agency (DLA), which comprise the balance sheet as of September 30, 2017, and the related statement of net cost, changes in net position, and statement of budgetary resources for the fiscal year then ended, and the related notes to the financial statements, and have issued our report thereon dated December 12, 2017. The report states that because of matters described in the Basis for Disclaimer Opinion paragraph, the scope of our work was not sufficient to enable us to express, and we do not express an opinion on the financial statements as of and for the fiscal year ended September 30, 2017 and the related notes to the financial statements.

Internal Control Over Financial Reporting

In connection with our engagement to audit the financial statements, we considered DLA's internal control over financial reporting (“internal control”) to determine the audit procedures that are appropriate in the circumstances for the purpose of expressing our opinion on the financial statement, but not for the purpose of expressing an opinion on the effectiveness of DLA's internal control. Accordingly, we do not express an opinion on the effectiveness of DLA's internal control. We limited our internal control testing to those controls necessary to achieve the objectives described in OMB Bulletin No. 17-03. We did not test all internal controls relevant to operating objectives as broadly defined by the Federal Managers' Financial Integrity Act of 1982 (“FMFIA”), such as those controls relevant to ensuring efficient operations.

A deficiency in internal control over financial reporting exists when the design or operation of a control does not allow management or employees, in the normal course of performing their assigned functions, to prevent or detect misstatements on a timely basis. A significant deficiency is a control deficiency, or combination of control deficiencies, that adversely affects the entity's ability to initiate, authorize, record, process, or report financial data reliably in accordance with U.S. GAAP such that there is more than a remote likelihood that a misstatement of the entity's financial statements that is more than inconsequential will not be prevented or detected. A *material weakness* is a significant deficiency, or combination of significant deficiencies, that results in more

than a remote likelihood that a material misstatement of the financial statements will not be prevented or detected.

Our consideration of internal control was for the limited purpose described in the preceding paragraph and was not designed to identify all deficiencies in internal control that might be material weaknesses or significant deficiencies and therefore, material weaknesses or significant deficiencies may exist that were not identified. As described below we identified certain deficiencies in internal control that we consider to be material weaknesses and significant deficiencies.

Material weaknesses

During our audit, we noted the following matters involving internal control over financial reporting and its operation that we consider to be material weaknesses as defined above.

- I. Property, Plant, and Equipment (PP&E) – PP&E includes internal use software and construction-in-progress. We found that DLA has not completed an analysis of existence and completeness of PP&E records for which they are the FRO, had not completed their process to value PP&E beginning balances, and have weaknesses in the processes of maintaining and reconciling PP&E records. The combination of these findings led us to conclude that there is a material weakness related to PP&E. The matters identified related to PP&E are further described in Appendix A.
- II. Fund Balance with Treasury (FBwT) – DLA is unable to reconcile the FBwT ending balances from general ledger directly to the U.S. Treasury. DLA, in conjunction with DFAS, has implemented the Cash Management Reconciliation (CMR) and Defense Reconciliation Reporting Tool (DRRT) processes as mechanisms to reconcile DLA’s general ledger to Treasury. However, these tools have known control deficiencies and reconciling issues within the process. In addition, DLA does not have sufficient policies, procedures or controls in place for the end-to-end FBwT process. These deficiencies supported a conclusion of a material weakness in FBwT. The matters noted are further described in Appendix A.
- III. Accounts Payable (AP) - AP falls within the scope of DLAs procure to pay process. We found that DLA was unable to adequately support the accounts payable and related budgetary beginning balances, had issues recording transactions in the proper period, and lacked overall policies, procedures, and internal controls in the procure to pay process. This combination of deficiencies is considered to be a material weakness. The matters identified related to AP are further described in Appendix A.

- IV. Financial Reporting – DLA’s financial statement preparation process lacks sufficient, appropriate reviews to identify inaccurate balances on the face of the financial statements as well as completeness and accuracy of disclosures. We considered these deficiencies to be a material weakness. The matters noted are further described in Appendix A.
- V. Oversight and Monitoring - DLA does not have an effective OMB Circular A-123 program, which impacted DLA’s ability to appropriately identify and address significant risks for all key business processes. DLA has not implemented appropriate internal controls, including the documentation of policies and procedures that describe DLA’s environment related to end-to-end business processes, roles and responsibilities, monitoring of service providers, related parties, systems, risks and controls. DLA’s lack of documented controls prevent the consistent execution and proper review of data/reports used in the execution of key controls, as well as appropriate evidence of management review controls. We consider these overall weaknesses in the internal control structure to be a material weakness. The matters noted are further described in Appendix A.
- VI. Information systems – Our assessment of DLA’s IT controls and the computing environment identified deficiencies which collectively constitute a material weakness in the design and operation of information systems controls over financial data. We reviewed each finding individually as well as in aggregate. Based on our review, we have identified four areas of deficiency which, when aggregated, result in a material weakness. The deficiencies relate to the following four areas:
- Access controls / user access
 - Configuration management / change controls
 - Segregation of duties controls
 - Security management / governance over implementation of security controls

Refer to Appendix A for additional detail in these four areas.

Significant deficiencies

During our audit, we also noted the following matters involving internal control over financial reporting and its operation that we consider to be a significant deficiency, as defined above.

- I. Environmental liabilities is comprised of clean-up costs associated with the restoration of sites on real property that DLA manages. The lack of formal policies, procedures and supporting documentation does not allow for DLA to substantiate the completeness and valuation of its EL. The matters identified related to EL are further described in Appendix B.

DLA's Response to Findings

DLA's response to the findings identified in our engagement, as described above, are included in its letter dated December 12, 2017, which has been included at the end of this report. DLA's response was not subjected to the auditing procedures applied in the engagement to audit the financial statements and, accordingly, we express no opinion on it.

Purpose of this Report

The purpose of this report is solely to describe the scope of our testing of internal control and the result of that testing, and not to provide an opinion on the effectiveness of the entity's internal control. This report is an integral part of an engagement to perform an audit in accordance with *Government Auditing Standards* in considering the entity's internal control. Accordingly, this communication is not suitable for any other purpose.

Ernst + Young LLP

December 12, 2017

Appendix A – Material Weaknesses

Property, Plant and Equipment

Property, Plant, and equipment (PP&E), is comprised of internal use software and construction-in-progress (CIP). In this, the initial financial statement audit of DLA, we found that DLA was not able to adequately support the existence, completion or valuation of its PP&E.

DLA lacks policies, procedures and controls to verify the existence and completeness of internal use software (IUS) due to:

- DLA does not have documented policies and procedures in place to perform an inventory of IUS assets on a consistent basis. Unlike performing an inventory of physical assets, the existence of IUS is validated by verifying that the software functionalities and/or objects are still in use. DLA policy requires that the inventory is performed on 10% of the population each month. However, DLA does not comply with the policy on a consistent basis.
- DLA has not designed adequate internal controls to identify when assets are completed and should be placed in service. DLA policy states that IUS assets are recorded as in-service PP&E upon the completion of the asset. However, DLA does not have a process in place to ensure that completed assets are placed in service in the correct period.

DLA lacks policies and procedures to review the construction-in-progress (CIP) balance due to:

- Policies and procedures are not in place to ensure that the information reported directly by the construction agent and used for financial reporting is reviewed by DLA. There were a significant number of inactive projects that were reported by the construction agent resulting in misstatements in the financial statements (totaling approximately \$465 million). DLA sub-allots funds to construction agents, such as the U.S. Army Corps of Engineers and the Naval Facilities Engineering Command (NAVFAC), for construction projects which DLA is authorized to perform. The funds are tracked separately by each construction agent and reported to the Defense Finance and Accounting Services (DFAS) directly by each construction agent. These amounts are then reported in DLA's financial statements.

DLA is unable to provide supporting documentation to substantiate construction-in-progress (CIP), including beginning balances.

- Supporting documentation is not available or insufficient to substantiate approximately \$384 million of the CIP assets.

DLA was unable to substantiate the values assigned to IUS assets are in accordance with FASAB SFFAS 10, *Accounting for Internal Use Software*.

- Supporting documentation was not available to substantiate whether the values recorded were in accordance with SFFAS 10 for approximately \$100 million of the IUS beginning balance.
- DLA was unable to substantiate the in-service date of the IUS assets, which is the basis for the asset amortization. The documentation, such as the evidence demonstrating that the asset was tested and accepted, is not retained or available.
- DLA inappropriately recorded approximately \$46 million of IUS assets that DLA does not own in the balance sheet.

DLA has not appropriately designed controls to adequately detect material misstatements in the financial statements.

- DLA has not designed and implemented sufficiently precise management review controls, including outlining the specific procedure required to evidence that the controls were performed. DLA's control activities include a significant number of management review controls. Management review controls are normally designed to detect and correct errors, whereby the reviewer determines whether information is complete and accurate, accounting is appropriate, and potential errors or misstatements. The internal control activities over PP&E are not sufficiently designed to prevent or detect material misstatements in the financial statements.

DLA lacks policies and procedures to identify and assess lease arrangements and to properly account for lease obligations and disclose lease commitments, in accordance with FASAB SFFAS 5, *Accounting for Liabilities of the Government; Capital Leases*, and SFFAS 6, *Accounting for Property, Plant, and Equipment*.

- DLA has not completed procedures to identify all of its leasing arrangements, including assessing whether the leasing arrangements should be accounted for as a capital or operating lease.
- The financial statements do not include disclosures for its policy to account for lease arrangements; any operating lease commitments; and future minimum payments due.

Recommendations

EY recommends that DLA consider the following corrective actions related to the deficiencies identified above:

- Update the IUS process memos and standard operating procedures to adequately describe the policies and procedures in place to inventory IUS assets.
- Design and implement policies and procedures that require for adequate documentation to be maintained that evidence how DLA verifies the asset is still in use and that the listing of the IUS assets is complete.
- Design and implement policies and procedures that ensures the IUS assets are recorded in the appropriate period. This includes reviewing a complete and accurate list of all projects that have successfully completed end user testing and verifying that the projects have been recorded in EBS as active IUS assets.
- In the short-term, DLA should design and implement a review control that allows DS project management personnel to review the amounts reported by the constructions agents in sufficient time for DLA to adjust the amounts reported in their financial statements based on this review.
- In the long-term, DLA should pursue a solution where CIP transactions can be recorded in EBS when they occur.
- Obtain and maintain all supporting documentation (invoices, contracts, project management reports) related to the CIP Projects from NAVFAC, USACE, and other construction agents to substantiate the balances recorded for those projects.
- Retain all documentation related to CIP Projects in a central repository and organize them for the purposes of determining project status and supporting the value of the projects.
- Design a process where CIP transactions can be recorded in EBS when they occur.
- Design and implement policies and procedures that allow DLA Installation Management Project Management personnel to review, at least quarterly, the status of projects recorded as CIP, invoices, project management reports, and contracts to ensure that all documentation agrees with activity related to the CIP project.
- Design and implement policies and procedures to perform a reconciliation for the construction-in-progress U.S. Standard General Ledger (USSGL) accounts and agree the amounts recorded in EBS to the invoices, project status reports, and other documentation to substantiate the balances as of the financial statement date.
- Design and implement policies and procedures to perform a reconciliation for the USSGL accounts related to providing sub-allotments to its construction agents. This should include the MILCON Program Form (DoD Form 1390) for the Fiscal Year, the NDAA budget execution, and the receipt of allocated funds from OSD based on the NDAA request.
- Adopt a policy to prospectively capitalize IUS assets, as described in *Statement of Federal Financial Accounting Standards 50: Establishing Opening Balances for General Property, Plant, and Equipment (SFFAS 50)*. SFFAS 50 permits the exclusion of IUS and IUS under development from the opening balance as of the opening balance date.
- Design and implement policies and procedures to ensure that DLA maintains sufficient supporting documentation to demonstrate that its IUS expenditures are appropriately capitalized, in accordance with SFFAS 10.

- EY recommends that DLA undertake the following corrective actions for the conditions noted:
 - Adjust their PPE balance to remove the asset owned by other agencies.
 - Design and implement policies and procedures for the monitoring of completion of IUS assets that DLA is developing for other agencies.
- Design and implement policies and procedures to ensure that the performance of review controls are adequately documented and supported by evidential matter.
- Develop a central repository to retain evidence of control performance and management review.
- Design and implement policies and procedures that include variance thresholds to ensure that the review of significant financial data is precise.
- Design and implement policies and procedures that detail the related documentation and evidential matter to be inspected as part of the review.
- Complete analysis of their leases to determine if DLA has entered into any leasing arrangements that should be accounted for and reported as a capital lease.
- Design and implement policies and procedures to identify and account for leasing arrangements including whether the leases should be accounted for and reported as capital or operating leases, in accordance with SFFAS 6.20.
- Develop policies and procedures to review all leasing arrangements to gather the information necessary to prepare and include the required disclosures for capital and operating leases in the financial statements, in accordance with OMB A-136 II.4.9.18.

Fund Balance with Treasury

Fund Balance with Treasury represents the aggregate amount of funds in DLA's account with Treasury. Through our audit procedures, we identified deficiencies related to DLA's processes of recording and reconciling transactions involving Fund Balance with Treasury.

DLA is unable to reconcile FBwT from general ledger directly to the U.S. Treasury:

- DLA, in conjunction with DFAS, has implemented the Cash Management Reconciliation (CMR) and Defense Reconciliation Reporting Tool (DRRT) processes as mechanisms to attempt to tie EBS to the Treasury. However, the CMR and DRRT processes are not sufficient to produce a complete and accurate reconciliation of DLA's general ledger to U.S. Treasury. There are known differences between CMR and Treasury. In addition, there are known control deficiencies in the DRRT process.

DLA lacks sufficient policies, procedures and controls around the end-to-end FBwT process:

- DLA has not finalized a FBwT process narrative or systems flow to document the flow of data through DLA and DFAS systems from the initiation of a transaction to reporting in the financial statements, the key stakeholders within the process, or the flow of data between stakeholders. Additionally, DLA has not identified risks and controls for the end-to-end FBwT process.

Recommendations

EY recommends that DLA consider the following corrective actions related to the conditions described above:

- Work with DFAS to obtain a Service Organization Controls Report for the CMR performed by the Defense Finance Accounting Service in order to obtain assurance on whether the CMR process is complete and accurate.
- Work with DFAS to obtain a Service Organization Controls Report for the Department 97 Report Reconciliation Tool (DRRT) process performed by the Defense Finance Accounting Service -Columbus in order to determine whether the controls in place are operating effectively.
- Work with DFAS to establish a process, including a key control, for DLA to monitor the status of significantly aged unreconciled transactions in both the CMR and DRRT processes on a frequent basis.
- Work with DFAS to create an updated policy and procedure for the DRRT process that addresses issues of maintaining sufficient evidential matter to support ongoing remediation efforts on undistributed transactions.

- Develop policies and procedures to establish DLA's involvement in monitoring undistributed funds and assisting DFAS with the research and the clearing process.
- Continue Finalize a Standard Operating Procedure or Process Cycle Narrative that documents the end-to-end process for FBwT, including the initiation, recording, processing and reporting of FBwT transactions
- Finalize a Standard Operating Procedure or Process Cycle Narrative that documents the policies and procedures that the Defense Logistics Agency has in place to monitor the CMR and DDRT produced by the Defense Finance and Accounting Services. The Standard Operating Procedure or Process Cycle Narrative should include all key controls, process owners, data interfaces and Federal regulations followed. Additionally, it should include a complete list of all input documents, applicable systems and system-generated reports used for the FBwT process.
- Designate a DLA point of contact responsible for overseeing the FBwT process, understanding the complex process flow as well as key risk points as well as communication with DFAS.

Accounts Payable

Accounts Payable (AP) falls within the scope of DLAs procure to pay process. Through our audit procedures, we identified deficiencies in DLA processes for recognizing and supporting accounts payable and the related budgetary balances, recording transactions in the proper period and documenting policies, procedures and controls in a sufficient manner.

DLA is unable to substantiate Accounts Payable and Undelivered Orders due to:

- Supporting documentation was not provided to substantiate the samples tested from the following accounts:
 - Accounts Payable
 - Negative Payables
 - Undelivered Orders, Unpaid
 - Upward Adjustments
- Goods and/or services received as of year-end were not recorded as an expense/asset and not applied to the Undelivered Order balance.
- Upward/Downward adjustment related to the prior year were recorded in FY 2017.

DLA does not have policies and procedures in place to manage stale payables/obligations

- A timely review and monitoring is not performed for the following account balances:
 - Negative Payables – There is a significant number of aged transactions that may no longer be valid.
 - Undelivered Orders (UDO), Unpaid – Approximately \$90 million in UDOs that had no activity (payables, expenses, outlays) for at least two years.

DLA does not adhere to the Treasury Financial Manual USSGL Posting Logic due to the following:

- A general ledger account is inappropriately being used to track accounts payable activity. DLA uses Negative Payables to track outstanding goods receipt and to prevent inventory from showing as available for distribution when the items are not physically available. The related posting logic is not recording assets or expenses at the appropriate point in time. In addition, an Undelivered Order, Paid is recorded for these transactions, but they the proprietary entry for the payment made in advance is not recorded.

DLA does not comply with the Federal Financial Management Improvement Act due to the following:

- Transactions were not recorded at the detailed transaction level. DLA recorded transactions at a summary level for certain budgetary and proprietary accounts. As a result, each EBS summary level record contains multiple individual transactions.
 - Transactions are posted in detail to the Fund Balance with Treasury (FBwT) account (general ledger account 1010), but summarized when posting to the other proprietary and budgetary accounts. A reconciliation is not performed to ensure that all detailed transactions posted to the FBwT agree to the summarized postings to the corresponding budgetary general ledger accounts.
 - Additionally, budgetary accounts (obligations, expenses, payables) are not tied to the FBwT transactions and are posted in summary within the general ledger.

DLA does not have controls that are operating effectively in the accounts payable process due to the following:

- Controls for the proper approval of invoice; receiving reports; and purpose, time and amount for the following accounts were not operating effectively: Account Payable, Negative Payables, and Expense accounts.
- Control for the government purchase card expenditure approval due to the following was not operating effectively. The Approving/Billing Official (A/BO) has the ability to approve the monthly statement in US Bank Access Online and certify that statement for payment without any secondary review. When the government purchase card holder (GPCH) is not available to reconcile purchase card transactions to the statement, the A/BO has the authority to perform the reconciliation and prepare the form 1901 (Request for Purchase). Also, the A/BO can approve the GPC monthly bill in U.S. Bank Online for payment.

Recommendations

EY recommends that DLA consider the following corrective actions related to the conditions described above:

- Evaluate current policies and procedures against practices in the field to identify the root cause(s) of conditions. Identify key gaps and inconsistencies in current procedures versus field implementation.
- Based on the evaluation, perform updates to identified policies, procedures, desk guides, and/or accounting manuals to completely and accurately reflect current key procure to pay processes as well as provide clarification/updates to areas where differences between policy and implementation are noted.

- Consider providing trainings and implementation guidance on any current and/or new/updated procedures where issues were noted to ensure consistent application of procedures including:
 - Ensure procure to pay process owners' document detailed explanation (i.e. cause, impact) for discrepancies or missing documentation.
 - Ensure documentation standards are clear including supporting documentation that is complete, accurate, and prepared timely.
 - Ensure process owners understand key supporting documentation.
- Consider increasing communication between DLA HQ and process owners to ensure sufficient, complete documentation is provided as part of documentation requests.
- After processes have been evaluated and procedures have been updated, as needed, implement and/or strengthen review procedures to ensure transactions are recorded accurately, timely and process owners can obtain and provide supporting documentation for the transactions.
- EY recommends that DLA write off residual accounts payable for paid and completed transactions. EY recommends that DLA removes activity from the general ledger detail that were completed in prior years. DLA should monitor the UDO balances and identify stale UDOs for deobligation. DLA should examine their account balances on the balance sheet and statement of budgetary resources to determine the magnitude of aged balances by account.
- Perform an analysis of transactions posted at or near year-end to determine the overall significance of the issue across all general ledger accounts. Based on this analysis, perform corrective action on incorrect transactions, as necessary.
- Implement and/or enhance DLA's year-end process, including key controls, for monitoring potential business events that will need to be entered into the general ledger prior to year-end close.
- Update policies and procedures to document year-end processes for identifying, monitoring and recording transactions prior to financial statement close.
- EY recommends that DLA discontinue the use of the negative payable account. In addition, DLA should develop, test, and implement a process to ensure that all transactions related to proper recording and reporting for expenses and inventory items are in compliance with the TFM USSGL postings at the transaction level. This would include developing an entity wide standard process and procedure of identifying the financial events that requires the recognition of an account payable based on standard accounting guidance (Ex. Treasury FMS USSGL guidance - Recognition of a Liability). EY further recommends, that once the new procedures are in place, stakeholders are educated on the new process. EY further recommends that any process, procedure, or policy documentation for accounts payable be updated to reflect the use of the asset or expense accounts instead of the negative payable accounts.
- EY recommends that DLA implement and maintain financial management systems that comply substantially with Federal financial management systems requirements and the

United States Government Standard General Ledger at the transaction level. DLA should establish a process that reconciles the transaction level detail to the summarized postings in each account.

- Update existing internal control documentation to accurately describe the process and identify key internal controls over financial reporting.
- Monitor, review, and validate whether controls are operating effectively on an on-going basis.
- Update existing internal control activities to produce evidence that the control occurred (e.g. signature) after the control is executed.
- DLA should implement limiting the A/BO to one key role to either approving GPC purchases on DLA form 1901 or approving payments of the GPC monthly bill in U.S. Bank Online. If DLA is unable to properly segregate the duties, DLA should require a secondary reviewer as a mitigating factor to approve the monthly bill or approving the form 1901.

Financial Reporting

Financial Reporting encompasses all aspects of operations affecting DLA's ability to produce reliable financial statements and disclosures. This process starts with establishing an effective governance structure to identify and assess risk and continues with developing a control environment that is effective and efficient to manage identified risks. Through our audit procedures, we identified a number of deficiencies in DLA processes related to the accumulation and presentation of their financial position and results of operations.

DLA does not have sufficient policies and procedures in place around the implementation and monitoring of EBS:

- DLA is unable to adequately demonstrate that business events are linked to the correct posting logic.
 - In DLA's posting logic reference book, which was manually generated, there are multiple scenarios associated with same transaction description and SAP T-Code (i.e. EBS doc type).
 - In DLA's posting logic reference book, there is no attribute or data field to indicate the type of transaction posting in the Enterprise Business System (EBS). Therefore, DLA is unable to crosswalk the reference book to the EBS.
 - DLA is unable to produce a posting logic directly from EBS
- DLA does not have any monitoring or review control in place to ensure that EBS posting logic is configured in accordance with the USSGL and that transactions are posting accordingly.

DLA does not have sufficient controls in place to validate that EBS proprietary general ledger accounts agree to budgetary accounts:

- DLA has known reconciliation issues between budgetary and proprietary tie points. Based on walkthrough procedures performed, EY noted that the DFAS posts an unsupported quarterly JVs in Defense Departmental Reporting System (DDRS) to ensure DLA's budgetary accounts reconcile to the proprietary accounts.

DLA does not have sufficient controls in place around the quarterly reconciliation of EBS to the financial statements:

- DLA does not perform a sufficient Unadjusted Trial Balance (UTB) to Adjusted Trial Balance (ATB) reconciliation.
 - DLA uses data pulled out of DDRS as a starting point for the crosswalk instead using data directly pulled from EBS.

- DLA lacks controls to validate the completeness and accuracy of the data and reports used to create the reconciliation.
- Lack of master listing of files used and the purpose of each file within the reconciliation.
- Lack of a review to ensure that feeder files and adjustments are valid and agree to supporting documentation.
- DLA does not perform the quarterly UTB to ATB reconciliation in a timely manner.
 - DLA does not perform the reconciliation until after the quarter-end as well as fiscal year-end has been closed.
 - Per SOP, DFAS should provide DLA with the data files needed for the reconciliation 5 days after quarter/year-end close. However, the reconciliation is completed approximately two months subsequent to quarter-close.

DLA does not perform a sufficient review of quarterly adjustments and JVs made by a DFAS:

- DLA does not have a comprehensive listing of adjustments that occur in DDRS including:
 - The source of each file and parameters to generate the files
 - The required files or reports needed from DFAS to support each adjustment as well as the parameters of each file or report
 - The rationale or business purpose for each adjustment and the evidential matter to support the amounts
- DLA does not review each type of adjustment and feeder files to determine completeness, accuracy, validity and impact of information posted to DLA's financial statements.
 - In several cases, prior year adjustments were used in the reconciliation of the DDRS-B unadjusted trial balance (UTB) to the DDRS-B adjusted trial balance (ATB) that did not have evidence of review by DLA.
 - Trial balance input adjustments occurred during the interface of DDRS-B to DDRS-AFS that were not reviewed by DLA.
- DLA relies on DFAS to make various adjustments that are maintained within DDRS-B versus making the corrective updates within EBS.
 - Within the quarterly reviews, prior year adjustments were used as offsetting entries to current year adjustments.
- DLA does not perform a reconciliation in a timely manner to allow for adjustments to be reviewed prior to the generation of the financial statements.
- DLA is currently remediating the trading partner elimination process to be completed in FY 2018. EY noted the following during FY 2017:
 - Supporting documentation to reconcile the variances between DLA and trading partners is not obtained timely.
 - DLA relies on contractor maintained software tools to determine the balances for trading partners. There is no evidence that DLA assesses the completeness or accuracy of data input or output from this tool.

- Adjustments made to Accounts Receivable, Accounts Payable, Revenue, Expenses and undisbursed funds are not appropriately supported.
- DFAS performs quarterly elimination adjustments to DLA financial statements for both waived and non-waived entities
 - EY noted that there is not a complete reconciliation at the agreement level to the trading partner adjustments that are being made. Trading partner adjustments are recorded in DDRS-AFS as “top-side” adjustments and are identified as “unsupported” by DFAS.

During EY’s review of the Q3 and Q4 FY17 financial statements and footnote disclosure, we determined that level of review performed was insufficient to detect and correct misstatements in the financials and related disclosures:

- Inaccurate balances reported in the financial statements and notes
 - DLA prepared the year-end AFR package and excluded the funds executed by the United States Army Corps of Engineers, which is material to the General Fund financial statements.
 - Supporting documentation did not adequately support the balances recorded in the Notes.
- Lack of complete and accurate disclosures
 - Note 1 Significant Accounting Policies (SAP) did not completely and accurately summarize the accounting principles and methods of applying those principles.
 - Note 1 SAP did not appropriately disclose management’s judgements relevant to valuation, recognition, and allocation of assets, liabilities, expenses and revenues.
 - Note 1 SAP did not sufficiently describe changes or non-compliance in GAAP reporting.

Recommendations

EY recommends that DLA consider the following corrective actions related to the conditions described above:

- Evaluate EBS posting logic and evidential matter to ensure system posting logic is configured in compliance with USSGL and DOD SFIS.
- Evaluate EBS system capabilities and provide a system-generated mapping report which ties EBS configured posting logic to EBS transaction codes and movement types and USSGL/DOD transaction numbers
- Document clear descriptions of business events and varying circumstances that impact or change the posting logic
- Document transaction description based on the EBS doc type to identify the type of transactions within EBS universe of transactions.

- Implement monitoring or review control to ensure EBS transactions are being posted as intended.
- Analyze and investigate the known budgetary to proprietary tie point variances at a business process level to determine the root cause.
- Assess their current policies and procedures around the budgetary to proprietary reconciliations including the design of key controls in the process. DLA should design a control that focuses on addressing the root cause of the variances in order to resolve current underlying issues as well as prevent future variances from occurring.
- Evaluate the current process for creating UTB to ATB:
 - Identify areas to create efficiencies through automating the process.
 - Consider other reconciliation options to design a reconciliation that is performed in conjunction with the production of the DDRS-AFS trial balance and not subsequent to the production.
 - Consider the design of the reconciliation and ensure data is being pulled from the proper sources to ensure completeness and accuracy of data interfaces.
 - Consider documenting the list of reports generated by DFAS and the specific parameters used to generate the reports
- As a part of the Managers Internal Control Program (MICP), assess the risks associated with the process to generate the financial statements including the complexity, extent of manual processes, decentralization and reliance on third party data. Based on the assessed risks, determine if sufficient policies, procedures and controls are in place to address risks related to the compilation of the financial statements.
- Evaluate the current support agreement with DFAS to determine if agreement sufficiently documents roles, responsibilities, communications and timelines needed to support DLA's reconciliation requirements.
- Evaluate the policies and procedures in place over the financial reporting process including the specific roles of DLA and DFAS:
 - Document the list of reports generated by DFAS and the specific parameters used to generate the reports
 - Include a control(s) for reviewing all the files that are used to adjust the ending balances within EBS in the creation of the adjusted trial balances.
 - Document the business need for adjustments and the appropriate evidential matter required to support adjustments
- Evaluate current quarterly adjustments and prior year adjustments to determine which of those recorded in DDRS-B could be eliminated by making the adjustment within EBS.
- Evaluate trading partner adjustments, prioritize based on dollar value and risk and begin a reconciliation process at the agreement level.
- Implement additional controls for agreement level reconciliations with DLA trading partners and develop a process for resolving differences at the agreement level in a timely manner.

- Evaluate system capabilities to include recording and monitoring transactions at the trading partner and agreement level
- Finalize updated policies and procedures for identifying, researching and reconciling variances between DLA general ledger data and trading partners. Include considerations for:
 - Review of appropriate classification between federal and non-federal
 - Review impact on both proprietary and budgetary general ledger accounts
- Work with DFAS and OSD as necessary to continue to resolve issues with trading partners at the Department level.
- Evaluate all components of OMB-136 and determine if disclosures are complete, accurate and compliant. Incorporate updates to footnotes as necessary.
- Re-assess review controls associated with the financial statement review process and consider including:
 - A review of revised OMB-136 requirements to ensure updated guidance is evaluated and incorporated in a timely manner.
 - Other reviews by business process areas to ensure disclosures are complete, accurate and compliant. These reviews should ensure that footnote disclosure are consistent with business activity occurring throughout the year.
 - An assessment of current checklists used in the financial reporting process to determine if checklists need to include enhanced review procedures.

Oversight and Monitoring

Oversight and monitoring relates to DLA's lack of establishment and implementation of a sufficient control environment, enterprise-wide.

DLA lacks a sufficient control environment related to Internal Controls over Financial Reporting including a sufficient A-123 program:

- A sufficient risk assessment, performed at the appropriated level, related to reporting such as documenting the complexity of programs, accounting estimates, related party transactions, and extent of manual processes.
- An evaluation of fraud risks and the approach to implement financial and administrative control activities to mitigate identified material fraud risks.
- A finalized policy or procedure to develop and implement ERM and internal control, including anti-deficiency act reporting, that includes the appropriate documentation requirements that are necessary as a part of an effective internal control system.

DLA lacks sufficient policies and procedures around financial reporting including:

- Sufficient written policies and procedures do not exist related to Management Review Controls for the Financial Reporting Process. The identified management review controls do not accurately describe the procedures performed to detect or correct an error.
- Policies or procedures are not in place to verify the accuracy and completeness of system generated reports used in the execution of controls.

DLA does not perform sufficient oversight and monitoring of service organization control reports:

- DLA has not associated each relevant Complementary User Entity Controls (CUECs) to specific DLA controls.
- DLA has not identified specific DLA compensating controls for DFAS controls deemed ineffective in the DFAS SOC 1 report.
- DLA has unresolved control gaps relate both to addressing control issues identified in the DFAS SOC report as well as with DLA's CUECs
- DLA's evaluation was not performed by the subject matter experts in a timely manner. As of May 21, 2017, the SMEs had not reviewed the evaluation and the controls identified were identified as possible mitigating controls.

Recommendations

EY recommends that DLA consider the following corrective actions related to the conditions described above:

- Continue to design and implement DLA SOA policy at all levels throughout the organization and emphasize the importance of the Manager's Internal Control Program

- (MICP) from DLA leadership. This will help bring visibility, education and support to the program from across the organization.
- Ensure DLA SOA policy includes proper detail and guidance for conducting the risk assessment process, including:
 - all aspects of the risk management process are reviewed at least once a year;
 - risks themselves are subjected to review with appropriate frequency; and
 - provisions for alerting the appropriate level of management to new or emerging risks, as well as changes in already identified risks, so that the change can be appropriately addressed
 - Identify, document and communicate MICP roles and responsibilities. Ensure proper groups and personnel are involved at the appropriate levels to produce the most results based, cost effective control environment.
 - Develop, document and maintain supporting documentation as a part of the MICP and for the Statement of Assurance as evidence that DLA developed management control plans, performed risk assessments, performed ongoing monitoring, developed corrective action plans and tracked progress towards remediation for each separate fund
 - Provide formal training and guidance, on an annual basis, to those involved in the MICP to ensure roles, responsibilities and objectives are properly understood, carried out in a timely manner, and executed consistently across the organization.
 - Increase the resources dedicated to the A-123 program, as needed, to completely execute all aspects of the program requirements on an on-going basis.
 - Utilizing the updated risk assessment, DLA should design and implement a control testing strategy appropriate to address the risks.
 - DLA should evaluate the current review controls identified to operate over an entire process:
 - Evaluate single controls to determine if multiple controls actually exist in the process
 - Assess control descriptions to ensure they are documented completely including how the control is applied, who is responsible, how frequently it is performed, and how the control is evidenced.
 - Evaluate the current policies and procedures for evaluating information produced by the entity.
 - Foot system generated financial reports
 - Perform a tie-out of system generated reports to the trial balance
 - Verify that the parameters used to generate the reports or data are appropriate
 - Judgmentally select a sample of transactions or balances in the report and validate that the transactions are accurate.
 - Implement a process to identify, monitor and maintain related parties and material related party transactions. Additionally, management should perform a review of these sales transactions on a regular basis and disclose any material related party transactions in the notes to their financial statements.

- DLA should develop and maintain internal control documentation relating to the identification of related parties and related party transactions.
- DLA should analyze if current policies and procedures are sufficient for the process and update if necessary.
 - Ensure that appropriate personnel are involved in the process
 - Evaluate that proper roles and responsibilities are identified and communicated
 - Ensure timelines are defined
- DLA should determine if controls need to be established for the SOC 1 review process and ensure controls are properly identified, designed and operating effectively
- DLA should associate specific DLA controls to CUECs as well as DFAS controls determined to be ineffective

Financial Information Systems

Information systems controls are a critical component of the Federal government’s operations to manage the integrity, confidentiality and reliability of its programs and activities and assist with reducing the risk of errors, fraud or other illegal acts. Information management security, access controls, segregation of duties, and configuration management controls are fundamental to the integrity of financial data and can help manage risks such as unauthorized access, changes to critical data, and preventing compromised data. The nature, size and complexity of DLA’s operations require the agency to administer its programs under a decentralized business model by using numerous geographically dispersed operating locations and complex, extensive information systems.

Our assessment of the Information Technology (“IT”) controls and the computing environment identified deficiencies in the design and operation of information systems controls. We reviewed each finding individually as well as in aggregate.

The deficiencies relate to the following areas:

- Access controls / user access
- Configuration management / change controls
- Segregation of duties controls
- Security management / governance over implementation of security controls

(a) Access controls / user access

Access controls include those related to protecting system boundaries, user identification and authentication, authorization, protecting sensitive system resources, audit and monitoring, and physical security. When properly implemented, access controls can help ensure that critical systems assets are physically safeguarded and that logical access to sensitive computer programs and data is granted to users only when authorized and appropriate. Weaknesses in such controls can compromise the integrity of sensitive data and increase the risk that such data may be inappropriately used and/or disclosed.

The identified access control weaknesses that represent a significant risk to the DLA financial management information systems environment include the following:

- Access was not restricted to authorized users and was not assigned in accordance with the principle of least privilege.
- Lack of monitoring and auditing security violations and sensitive user activities, including activities of privileged users logs were not documented, not being performed, or not configured appropriately within systems.

- Lack of enforcement and documentation of session inactivity parameters.
- Lack of enforcement for procedures related to establishing new users, monitoring unused IDs, locked IDs, terminated users, or access re-certifications.
- Lack of policies and procedures for account authorization, provisioning, and termination.

(b) Configuration management / change controls

Configuration management involves the identification and management of security features for all hardware and software components of an information system at a given point and systematically controls changes to that configuration during the system's life cycle. By implementing configuration management controls, DLA can ensure that only authorized applications and software programs are placed into production through establishing and maintaining baseline configurations and monitoring changes to these configurations. Weaknesses in such controls can compromise the integrity of sensitive data and increase the risk that such data may be inappropriately used and disclosed.

The identified change control weaknesses that represent a significant risk to the DLA financial management information systems environment include the following:

- Inability to identify all application changes made to production during the audit period.
- Lack of monitoring and recording of changes made to applications by DLA management.
- Users have access privileges enabling them to bypass the configuration management process and make changes directly to production.
- Testing of new changes does not include documentation of review and approval per DLA policies.

(c) Segregation of duties (“SoD”) controls

An effective control environment guards against a particular user having incompatible functions within a system. Segregation of duties controls provide policies, procedures, and an organizational structure to prevent one or more individuals from controlling key aspects of computer-related operations and thereby conducting unauthorized actions or gaining unauthorized access to financial management information systems.

The identified weaknesses that represent a significant risk to the DLA financial management information systems environment include the following:

- DLA management did not identify segregation of duties conflicts that consider both IT and business process roles and activities across DLA-owned applications.
- Segregation of Duties review within the user provisioning process is not performed consistently across all applications.

- Administrator and super user privileges are not restricted through user groups and permissions. In some cases, users can create and assign roles to themselves including DISA administrators.
- Business end users have access to roles intended for IT privileged users.

(d) Security Management / governance over implementation of security controls

An entity-wide information security management program is the foundation of a security control structure and a reflection of senior management’s commitment to addressing security risks. The security management program should establish a framework and continuous cycle of activity for assessing risk, developing and implementing effective security procedures, and monitoring the effectiveness of these procedures. Overall policies and plans are developed at the entity-wide level. System and application-specific procedures and controls implement the entity-wide policy. Without a well-designed program, security controls may be inadequate; responsibilities may be unclear, misunderstood, or improperly implemented; and controls may be inconsistently applied. Such conditions may lead to insufficient protection of sensitive or critical resources and disproportionately high expenditures for controls over low-risk resources.

The identified Security Management control weaknesses that represent a significant risk to the DLA financial management information systems environment include the following:

- Service Organization Control (SOC) reports are not reviewed, specifically, to assess Complementary User Entity Controls (CUECs). In addition, SLAs with DISA are not reviewed and updated in a timely manner.
- Lack of application specific access control policies/procedures to consider unique business rules/processes, roles and responsibilities, and technologies.
- System Security Plan (SSP) does not reflect the existing IT controls environment or include all requirements of DoDI 8510.01.
- DLA does not perform complete risk assessments on an annual basis to facilitate identification of new threats and vulnerabilities.

Recommendations

DLA should implement controls to address deficiencies in access controls, configuration management, segregation of duties, and security management procedures to include:

Access controls / user access / segregation of duties

- Restrict access to authorized users in accordance with least privilege principles.
- Document and follow procedures related to user account management and segregation of duties.
- Implement stronger security controls and restricting user access to programs and data to

the minimum level required by the user's responsibilities, to include encrypting sensitive data.

- Identify sensitive business transactions in application business and privileged roles, segregate these roles and where conflicting roles are required or unavoidable, document business rationale and monitor activities of users.

Configuration management / change controls

- Identify and monitor applications changes made in the production environment.
- Segregate developers' access to the development and production environments,
- Review, approve, and monitor application changes completeness and accuracy, including emergency changes.

Security Management / governance over implementation of security controls

- Implement stronger security controls to improve the security documentation and testing of applications.
- Establish a process to evaluate and incorporate service providers' CUECs into security documentation and the current application control environment.

Appendix B - Significant Deficiency – Environmental Liabilities

Environmental Liabilities (EL) is comprised of clean-up costs associated with the restoration of sites that DLA manages. Through our audit procedures, we identified deficiencies in internal controls listed below, which, when aggregated, we consider to be a significant deficiency.

DLA is unable to substantiate the cost to complete estimates for environmental liabilities.

- Policies and procedures are not in place that adequately demonstrates the methodology used to derive the estimate was appropriate.
- The supporting documentation does not appropriately substantiate the estimate for the cost to complete the clean-up and restoration.

DLA is unable to substantiate the program management cost estimates for environmental liabilities.

- Policies and procedures not in place that adequately documents the methodology used to derive the estimate.
- The supporting documentation does not appropriately substantiate the estimate for the program management costs.

DLA has not appropriately designed controls to adequately detect material misstatements in EL.

- Controls are not designed to verify the completeness and accuracy of the system generated reports or data used in executing the control activity. DLA's EL control activities, including deriving the EL estimates, are dependent upon system-generated reports or data produced by information systems.

Recommendations

EY recommends that DLA consider the following corrective actions related to the deficiencies identified above:

- Design and implement policies and procedures to ensure that process for preparing the cost to complete estimate is adequately documented and sufficiently describes the methodology used to derive the estimate.
- DLA should include procedures to verify that the supporting documentation used to derive the estimate properly reconciles to the cost to complete estimate.
- DLA should adequately document the qualifications of the specialist used in deriving the estimate to ensure and demonstrate that the specialists have the necessary competence, capabilities, and objectivity.

- Design and implement policies and procedures that adequately describe the process for preparing the estimate of the EL PM costs. The description should include sufficient detail for a reviewer to understand the process and evaluate whether the process used is reasonable and consistent with the policy.
- Implement policies and procedures to verify that the system generated reports or data used in the performance of the control is complete and accurate such as:
 - Foot system generated inventory reports;
 - Perform a tie-out of the system generated reports to the trial balance;
 - Verifying that the parameters used to generate the reports or data are appropriate
 - Judgmentally selecting a sample of transactions or balances in the report and validating that the transactions are accurate.

Report of Independent Auditors on Compliance and Other Matters Based on an Audit of the Financial Statements Performed in Accordance with *Government Auditing Standards*

The Director of the Defense Logistics Agency and the
Inspector General of the Department of Defense

We were engaged to audit, in accordance with auditing standards generally accepted in the United States of America, the standards applicable to financial audits contained in *Government Auditing Standards* issued by the Comptroller General of the United States and the Office of Management and Budget (“OMB”) Bulletin No. 17-03, *Audit Requirements for Federal Financial Statements*, the financial statements of the General Fund of the Defense Logistics Agency (“DLA”), which comprise of the balance sheet as of September 30, 2017, and the related statement of net costs, changes in net position, and combined statement of budgetary resources for the year ended September 30, 2017, and the related notes to the financial statements and have issued our report thereon dated December 12, 2017. That report states that because of matters described in the Basis for Disclaimer of Opinion paragraphs, the scope of our work was not sufficient to enable us to express, and we do not express, an opinion on the financial statements as of and for the year ended September 30, 2017 and the related notes to the financial statements.

Compliance and Other Matters

In connection with our engagement to audit the financial statements, we performed tests of its compliance with certain provisions of laws, regulations, and contracts, noncompliance with which could have a direct and material effect on the determination of financial statement amounts, and certain other laws and regulations specified in OMB Bulletin No. 17-03, including the requirements referred to in the Federal Financial Management Improvement Act of 1996 (“FFMIA”) (P.L. 104-208). However, providing an opinion on compliance with those provisions was not an objective of our engagement, and accordingly, we do not express such an opinion. We limited our tests of compliance to these provisions, and we did not test compliance with all laws and regulations applicable to DLA.

The results of our tests of compliance with laws and regulations described in the second paragraph of this report disclosed instances of noncompliance and other matters that are required to be reported under *Government Auditing Standards* and OMB Bulletin No. 17-03, as described below. Additionally, if the scope of our work had been sufficient to enable us to express an opinion on the financial statements, other instances of noncompliance or other matters may have been identified and reported herein.

FFMIA

Under FFMIA, we are required to report whether DLA’s financial management systems substantially comply with federal financial management systems requirements, applicable federal accounting standards, and the United States Standard General Ledger (“USSGL”) at the transaction level. To meet this requirement, we performed tests of compliance with FFMIA Section 803(a) requirements. The results of tests disclosed instances in which DLA’s financial management systems did not substantially comply with federal financial management systems requirements, applicable federal accounting standards or the USSGL.

(a) Federal financial management system requirements

EY identified as part of the Financial Information Systems material weakness, contained in the *Report of Independent Auditors on Internal Control Over Financial Reporting Based on an Audit of the Financial Statements Performed in Accordance with Government Auditing Standards* (“Report on Internal Control”), where we identified noncompliance with federal financial management system requirements for multiple systems. Weaknesses identified include those associated with user access, configuration management/change controls, segregation of duties and security management. These financial system deficiencies prevent DLA from being compliant with federal financial management system requirements and inhibit DLA’s ability to prepare complete and accurate financial reporting.

(b) Noncompliance with applicable federal accounting standards

As referenced in Note 1.B. to the financial statements, DLA self-identified that the design of their financial and non-financial systems does not allow DLA to comply with applicable federal accounting standards, including not being able to collect and record financial information as required by U.S. generally accepted accounting principles. EY also identified noncompliance with federal accounting standards during our testing, which was included in our Report on Internal Control.

(c) Noncompliance with USSGL posting logic at the transaction level

EY also identified noncompliance with USSGL posting logic during our testing, which was included in our Report on Internal Control.

FMFIA

Federal Managers’ Financial Integrity Act (“FMFIA”) requires ongoing evaluations and reports of the adequacy of the systems of internal accounting and administrative control.

The DLA was not able to provide evidence that they are in compliance with significant aspects of

Circular A-123, which implemented FMFIA. The DLA provided a FY 2017 Statement of Assurance, however there was not sufficient evidence that each process identified by DLA fully completed an organizational risk assessment, identified relevant risks related to the financial statement assertions, documented the internal control standards as it relates to those assertions, performed internal control testing, and reported and tracked control deficiencies at the control level. Based on the evidence received, EY notes that DLA has an A-123 testing strategy, however DLA is unable to provide evidence that the extent of testing and review performed is sufficient to meet the requirements of FMFIA.

DLA's Response to Findings

Our Report on Internal Control dated December 12, 2017 includes additional information related to the financial management systems and internal controls that were found not to comply with the requirements, relevant facts pertaining to the noncompliance with FFMLA and FMFIA, and our recommendations to the specific issues presented. Management agrees with the facts as presented and relevant comments from DLA's management responsible for addressing the noncompliance are provided in their letter dated December 12, 2017. We did not audit management's comments and accordingly, we express no opinion on them.

Purpose of this Report

The purpose of this report is solely to describe the scope of our testing of compliance and the result of that testing, and not to provide an opinion on DLA's compliance. This report is an integral part of an engagement to perform an audit performed in accordance with *Government Auditing Standards* in considering DLA's compliance. Accordingly, this communication is not suitable for any other purpose.

Management's Response to Auditors' Report

DEFENSE LOGISTICS AGENCY
HEADQUARTERS
8725 JOHN J. KINGMAN ROAD
FORT BELVOIR, VIRGINIA 22060-6221

DEC 12 2017

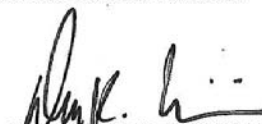

MEMORANDUM FOR DEPARTMENT OF DEFENSE OFFICE OF THE INSPECTOR
GENERAL

SUBJECT: Fiscal Year (FY) 2017 Financial Statement Audit – General Fund

Thank you for the opportunity to comment on the Independent Auditors' report on the audit of the Defense Logistics Agency's (DLA) FY 2017 financial statements. We agree with the Independent Public Accountant's (IPA) conclusions for the DLA inaugural Financial Statement Audit. This initial audit has provided us with a valuable independent view of our current financial operations. We concur with the reported findings as presented by the IPA.

For FY 2017, the engagement with the IPA was a positive partnership that facilitated an effective and efficient audit. The IPA's continual updates to our management team provided on-going insight during the audit. We are committed to resolving the material weaknesses and strengthening internal controls around DLA's operations.

I look forward to working collaboratively with the Office of the Inspector General and the IPA to strengthen DLA financial management and internal controls.

DARRILL K. WILLIAMS
Lieutenant General, USA
Director

Other Information

The *Other Information* section contains information on the Summary of Financial Statement Audit and Management Assurances, Improper Payments, Fraud Reduction Report, and Other Key Regulatory Requirements.

Summary of Financial Statement Audit and Management Assurances

Table 1 and Table 2 below provide a summary of the financial statement audit results and management assurances for FY 2017. **Table 1: FY 2017 Summary of the Financial Statement Integrated Audit Results**

Audit Opinion	Disclaimer				
Restatement	No				
Material Weakness	Beginning Balance	New	Resolved	Consolidated	Ending Balance
Financial Reporting	0	1	0	0	1
IT Controls & System Functionality	0	1	0	0	1
Property, Plant & Equipment	0	1	0	0	1
Fund Balance with Treasury	0	1	0	0	1
Oversight and Monitoring	0	1	0	0	1
Accounts Payable	0	1	0	0	1
Total Material Weaknesses	0	6	0	0	6

Table 2. Summary of Management Assurances

Effectiveness of Internal Control over Financial Reporting (FMFIA § 2)						
Statement of Assurance	Modified					
Material Weakness	Beginning Balance	New	Resolved	Consolidated	Reassessed	Ending Balance
FR&R - Unresolved variances for key reconciliations		1				1
FR&R - Period-end Close review process requires improvement		1				1
FR&R - Timely compilation of Annual Financial Report and components		1				1
FR&R – The B2P reconciliations for the General Fund (GF) are not performed on a timely basis and include cumulative differences with incomplete or unsupported explanations	1					1
FR&R – The Eliminations issue was identified while performing period-end close procedures.	1					1
FR&R –Lack of Evidential matter.	1		1			
FR&R –DFAS Account Maintenance & Control (AM&C) and Departmental Reporting (DR) prepare Journal Vouchers (JVs) for variances cannot be reviewed and approved by DLA J85 timely.	1		1			
A2R – There are discrepancies between recorded asset balances and documentation supporting asset acquisition costs and place in service date. Specifically, no standardized process exist to ensure that capitalized costs are captured, tracked and recorded correctly for IUS projects that meet the capitalization threshold	1		1			
FBWT – DLA is unable to provide sufficient, competent evidential documentation to support undistributed collection items	1					1

Effectiveness of Internal Control over Financial Reporting (FMFIA § 2)						
Statement of Assurance	Modified					
Material Weakness	Beginning Balance	New	Resolved	Consolidated	Reassessed	Ending Balance
FBWT – DLA is unable to provide sufficient, competent evidential documentation to support undistributed disbursement items	1					1
FBWT – Standard processes for the FBWT reconciliation process were not fully documented	1					1
FBWT – Identified variances between Treasury records and DLA’s accounting records are not being reconciled on a timely basis.	1		1			
Total Material Weaknesses	9	3	4			8

Compliance with Federal Managers Financial Integrity Act (FMFIA § 3)						
Statement of Assurance	Federal Systems comply, except for instances of non-compliance, or do not comply with financial management system requirements.					
Non-Compliance	Beginning Balance	New	Resolved	Consolidated	Reassessed	Ending Balance
Security Management: <ul style="list-style-type: none"> • System Security Plan conformance and completeness across financial systems • Policies and procedures out of date or not approved • Monitoring of service provider and demonstrating evidence of complementary User Entity Control completion 	1					1
Access Controls: <ul style="list-style-type: none"> • Coverage and details within Account Management Policy – Increase stringency in areas of risk • Financial system Compliance with Account Management Policy – ensure all systems are in alignment to policy • Alignment of Provisioning Tools with Account Management Policy – ensure tools that support account request and approval of user roles. • Clarify T-code alignment to role in system – identify business and IT functions within systems that are higher risk or critical to both financial reporting and IT system management 	1					1

Compliance with Federal Managers Financial Integrity Act (FMFIA § 3)						
Statement of Assurance	Federal Systems comply, except for instances of non-compliance, or do not comply with financial management system requirements.					
Non-Compliance	Beginning Balance	New	Resolved	Consolidated	Reassessed	Ending Balance
Segregation of Duties: <ul style="list-style-type: none"> Issues with Firefighter roles – ensure Firefighter roles are provisioned only when needed and activity is promptly reviewed to ensure Firefighter roles are provisioned only when needed and activity is promptly reviewed to ensure Fighter use was appropriate Segregation of Duties in SDLC 	1					1
Contingency Planning: <ul style="list-style-type: none"> DMLSS-W COOP environment – ensure COOP environment is established and tested regularly 	1					1
Total Non-Compliances	4					4

Compliance with Section 803(a) of the Federal Financial Management Improvement Act (FFMIA)

Federal Financial Management Requirements	No lack of compliance noted, or Lack of compliance noted	Lack of compliance noted
Applicable Federal Accounting Standards	No lack of compliance noted, or Lack of compliance noted	Lack of compliance noted
USSGL at the Transactional Level	No lack of compliance noted, or Lack of compliance noted	Lack of compliance noted

DLA management evaluated the system of internal controls in accordance with the guidelines identified in OMB Circular A-123 *“Management’s Responsibility for Enterprise Risk Management and Internal Control”* and DODI 5010.40 *“Managers’ Internal Control Program Procedures”*. The results indicate that the system of internal controls of DLA, in effect as of the date of this memorandum, taken as a whole, complies with the requirement to provide reasonable assurance that the Strategic objectives were achieved. This position on reasonable assurance is within the limits described within guidance. Using the following process, DLA evaluated its system of internal control.

Understanding the criteria to assess the effectiveness of DLA’s internal control is the cornerstone to develop an effective assessment approach. DLA began its assessment with a review of its entity level controls. Entity level controls refer to the elements of internal control that have an overarching or pervasive effect on the Agency. These controls are the foundation for DLA’s overall control environment and support internal control activities at the assessable unit/end-to-end process level. Weaknesses or deficiencies at the entity level are generally systemic and may require several weeks or months to remediate. The control environment is the foundation for all other components of internal control.

The governance structure of DLA integrates a system by which business is directed and controlled. The governance structure specifies the distribution of rights and responsibilities among different participants within DLA, such as the Executive Board, Alignment Group, Stewardship Committee, and program working groups, managers, and stakeholders who spell out the rules and procedures for making decisions on DLA business affairs. By establishing this governance structure DLA provides a structure to make decisions, set objectives, and the means of attaining those objectives and monitoring performance. The implementation of the OMB Circular A-123 program process for managements’ responsibility for risk management and internal controls incorporates a structured process with key players who evaluate risk response and internal controls. The Stewardship Committee aids the agency Director and Executive Board in fulfilling Agency Financial Stewardship. The Stewardship Committee /Senior Assessment Team provides oversight of OMB Circular A-123 activities reported to OUSD(C). The Stewardship Committee is the governance structure for Enterprise Risk Management (ERM), Internal Controls, and subsumes Audit Committee responsibilities. The OMB Circular A-123 team consists of Stewardship Committee, Enterprise Business Process Cycle Owners (EBCO), Headquarter J/D Code Organization, MSC Director/Commander and their sub-organizations. Process Cycle Integrators (PCIs) for the EBCO coordinates with Assessable Unit Managers (AUMs) and Process Health Leads to ensure proper documenting of business processes that support operational, administrative, system, and financial events to assess controls and improve efficiency in agency mission execution.

DLA must be aware of and deal with the risks we face. To elevate awareness in risk management and establish a risk mitigation strategy, the Risk Profile (RP) is the basis for developing internal control assessments. DLA's approach of controlling risk does not necessarily seek to eliminate the risk, but attempts to reduce risk and monitor its impact on completing mission objectives. The first steps in risk management are to develop awareness, expertise, and alignment. The below DLA RP depicts Enterprise Risks and associated vulnerabilities, as recognized by Senior Leadership, conveyed through the Chief Risk Officer for the Agency, through the Enterprise Risk Management Program Lead and Risk Managers throughout DLA. It is the top-down perspective to DLA's top-down and bottom-up approach to Risk Management. The eleven Enterprise Risks fall into seven overarching categories: Support to Operations, Information Technology Management, Inventory Management, Procurement and Acquisition, Financial Management, Human Resources Management, and Security and Force Protection. The bottom-up perspective is documented in Local Risk Profiles (LRPs), submitted by DLA Assessable Units. LRPs tie Enterprise Risks to local issues. LRPs ascertain the risk driver, category, impact, end-to-end business process, and strategic objectives associated with each risk at the local level.

Internal Controls over Operations (ICO) is evaluated based on the vulnerabilities identified in the DLA RP where the agency chooses to further evaluate the risk mitigation strategies. Leadership identifies the need for further assessment of the risk response (accept, avoid, mitigate, transfer) to gain further trust in the process or processes' controls that would mitigate the risk to an acceptable level. Assessments conducted may follow the Financial Improvement Audit Readiness (FIAR)/OMB Circular A-123 methodology (discovery, corrective action, assertion/evaluation, validation, and audit) or may utilize a self-report assessment process.

Internal Controls over Reporting (ICOR) assessments are determined through risk assessments relevant to Auditability. DLA Financial Policy Compliance Division takes lead on determining financial risk impacts and process evaluations that will impact the financial statement audit. Results from FY 2017 internal control testing and substantive testing identified material weaknesses and significant deficiencies in several processes captured above in the ICOR tables. DLA continues to monitor and reassess end-to-end processes to determine corrective action plans that will provide greater assurance on the effectiveness of the processes that impact the financial statement audit.

Internal Controls over Financial System (ICOFS) evaluations are done through assessments; DLA considered performance data and compliance indicators in forming an overall assessment of compliance for the agency. DLA J6 conducted an internal review of the effectiveness of the DLA internal controls over financial systems. J6 is able to provide modified assurance (with deficiencies noted) that the internal controls over the financial systems as of June 30, 2017 are in compliance with the Federal Financial Management Improvement Act (FFMIA) and OMB Circular A-123. Appendix D. Compliance testing is complete for all five Enterprise Control Families, examining control attributes at the Enterprise and application level within the scope of eleven Financially Relevant Systems. J6 reviewed audit results from the current financial statement audit to report the status controls that the IPA reviewed. As of June 2017, additional information from the financial statement audit led to the determination that J6 would provide modified assurance in the Enterprise Control Areas.

As prescribed in the General Accounting Office "*Green Book*" and in accordance with OMB Circular A-123, management evaluated its internal control system by assessing whether the 17 principles that represent the requirements necessary to support the five internal control components are designed, implemented, and operating together in an integrated manner. In FY 2017, DLA conducted Entity Level Controls (ELC) Interviews with EBCOs (senior leadership) to assess operational stewardship, decision-making awareness and establishing DLA's structure, policies, procedures, processes, and activities that have a pervasive impact not only on DLA's control system, but DLA's mission accomplishment. Due to the revised OMB

Circular A-123's focus on Management's Responsibility for proactive Enterprise Risk Management, DLA FY 2017 ELC interviews focused specifically on Risk Assessment and Monitoring components.

Table 3 Summarizes financial statement audit material weaknesses in internal controls as well as planned corrective actions.

Table 3: FY 2017 Internal Control Over Financial Reporting Corrective Actions

FY 2017 Internal Control Over Financial Reporting Corrective Action Summary	
Material Weakness	Correction Action Summary
FR&R - Unresolved variances for key reconciliations	DLA is in process of improving existing reconciliations by training employees on new procedures for identifying root causes, developing the appropriate corrective actions, and monitoring the performance of the processes.
FR&R - Period-end Close review process requires improvement	DLA is developing processes, updating standard operating procedures, training employees on new procedures, and monitoring the performance of the new standardized process.
FR&R - Timely compilation of Annual Financial Report and components	DLA is updating standard operating procedures and implementing a monitoring process to ensure the timely compilation of AFR.
FR&R – The B2P reconciliations for the General Fund (GF) are not performed on a timely basis and include cumulative differences with incomplete or unsupported explanations	DLA is performing root cause analysis on existing variances to determine applicable corrective actions and updating standard operating procedures to monitor the timely resolution of variances.
FR&R – The Eliminations issue was identified while performing period-end close procedures.	DLA is validating the existing trading partner derivation rules and analyzing existing open transactions to identify the proper trading partner codes.
FR&R –Lack of Evidential matter.	DLA is focusing on fully implementing records management, employee’s awareness and compliance, and management’s review of properly stored evidential matter.
FR&R –DFAS Account Maintenance & Control (AM&C) and Departmental Reporting (DR) prepare Journal Vouchers (JVs) for variances cannot be reviewed and approved by DLA J85 timely.	DLA is implementing a monitoring process to ensure JVs are reviewed and processed in a timely manner.
FBWT – DLA is unable to provide sufficient, competent evidential documentation to support undistributed collection items	DLA, in collaboration with DFAS, has developed a plan of action and milestones to resolve aged undistributed collections within the prescribed timeline of 60 days.

FY 2017 Internal Control Over Financial Reporting Corrective Action Summary	
Material Weakness	Correction Action Summary
FBWT – DLA is unable to provide sufficient, competent evidential documentation to support undistributed disbursement items	DLA and DFAS are researching such collections and disbursements recorded. Working in collaboration a POAM and corrective action has been established to identify erroneous disbursements and make correction in a timely manner. System changes are being made to facilitate automated corrective actions.
FBWT – Standard processes for the FBWT reconciliation process were not fully documented	To prove corrections have taken place evidential documentation is being reconciled and filed to support transactions executed.
FBWT – Identified variances between Treasury records and DLA’s accounting records are not being reconciled on a timely basis.	Established tiger team to address unreconciled transactions, documented current processes at DFAS-IN for WCF, TF, and GF, assisted OSD and DFAS in performing root cause analysis and corrective actions for variances, and redesigned and implemented processes.
A2R – There are discrepancies between recorded asset balances and documentation supporting asset acquisition costs and place in service date. Specifically, no standardized process exist to ensure that capitalized costs are captured, tracked and recorded correctly for IUS projects that meet the capitalization threshold.	Performed data cleansing on existing assets and assets under construction, conducted existing assets and deactivated assets no longer in use, developed standardized processes and incorporated into an SOP, and provided key control training to process owners.

Internal Control over Operations (ICO)

DLA began Fiscal Year (FY) 2017 with a review of its high-risk areas. The Agency determined its Enterprise Risk Profile through a top-down and bottom-up approach that included gathering details through the DLA Enterprise Risk Management Community of Practice and senior leadership engagement to determine the final profile. This provided a portfolio view of risk and vulnerabilities that was cross-walked to specific processes and test plan scopes used by the enterprise to provide detail on the mitigation strategy for each risk. Using the Government Accountability Office’s Standards for Internal Control in the Federal Government (the “Green Book”), DLA cross-walked the control environment detail to the Committee of Sponsoring Organizations of the Treadway Commission framework and developed an information sheet that supported the Green Book’s 17 Components of Internal Control. Figure 6 shows, DLA evaluated 79 processes, with only 3 failures. The failures have plans of action and milestones for corrective action and monitoring.

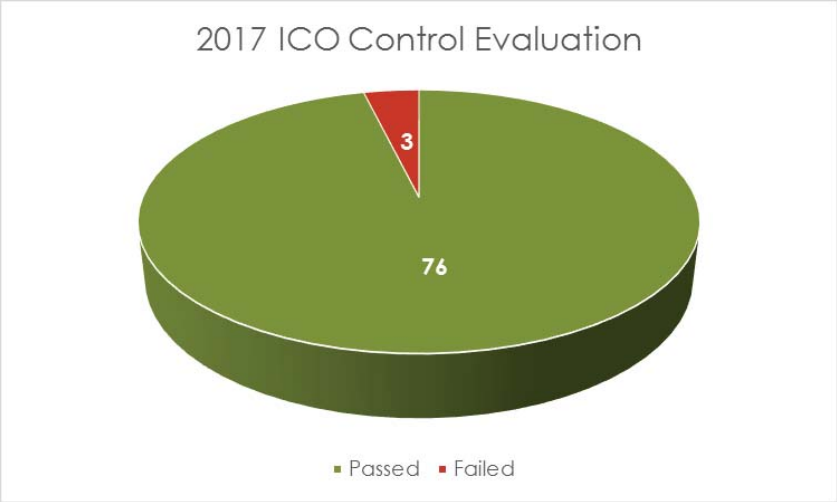

Figure 6; the FY 2017 ICO Control Evaluation

Internal Control over Reporting (ICOR)

DLA provided a modified Statement of Assurance that, as of July 21, 2017, its ICOR was operating effectively, with the exception of the identified material weaknesses. DLA remains vigilant in assessing its internal controls, continues to address all of its weaknesses efficiently and effectively, and is committed to resolving them in a timely manner. As part of the Audit Sustainment effort, DLA evaluated the control environment for financial reporting and financial system compliance. During the fiscal year, DLA identified and corrected 5 material weaknesses over financial reporting. As shown on the next page, Figure 7, shows the ICOR controls evaluated.

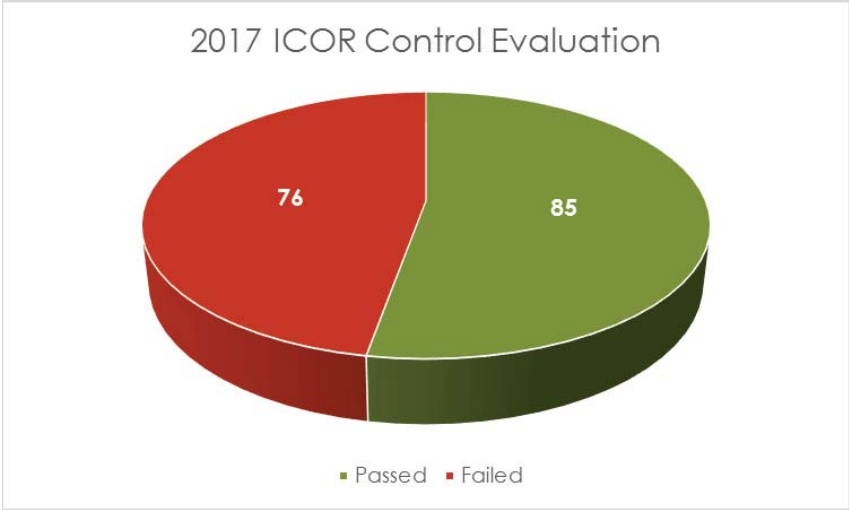

Figure 7; the FY 2017 ICOR Control Evaluation

The details of DLA’s material weaknesses, as well as status of corrections and estimated completion timeframes, are included in the DLA’s complete Statement of Assurance.

Improper Payments Elimination and Recovery Improvement Act (IPERIA)

The Department of Defense Financial Management Regulation (DoD FMR) 7000-14-R, Volume 4, Chapter 14, defines improper payments as “any payment that should not have been made or was made in an incorrect amount under statutory, contractual, administrative, or other legally applicable requirements.” In accordance with the Improper Payments Information Act (IPIA) of 2002 (Public Law (P.L.) 107-300); Improper Payments Elimination and Recovery Act (IPERA) of 2010 (P.L. 111-204); Improper Payment Elimination and Recovery Improvement Act of 2012 (IPERIA) (P.L.112-248); Executive Order 13520, Reducing Improper Payments, issued November 20, 2009; and Appendix C of Office of Management and Budget (OMB) Circular No. A-123, Defense components are required to report the status of improper payments and recovery of these improper payments to the President and Congress.

On October 7, 2016, DoD administered a remediation plan Department-wide to ensure placement of front-end internal controls to minimize the potential for travel pay improper payments and to take prudent actions to detect, correct or recover improper payments. In compliance with the remediation plan, DLA's Chief Financial Officer submitted the DLA Travel Remediation Plan to the Office of the Secretary of Defense, Comptroller, which was approved in January 2017. The plan mandates the following:

- Automated courseware and delivery of annual training for DLA appointed Defense Travel System (DTS) Approving Officials (AOs), to include Financial Management Regulation (FMR) directed Certifying Officer Legislation Training; Programs & Policies - U.S. Government Rental Car Program; and Program & Policies – Travel Policies, specifically suggested by the Department of Defense Inspector General. The DTS AOs are required to take annual refreshers on all three courses and must complete all three to obtain a new Approving Official permission appointment.
- Monthly, DLA Travel Compliance Team performs a Post Payment Review (PPR), with the criteria of 15 percent random sampling of DTS paid vouchers, all paid vouchers greater than \$2,500, and 100 percent of all Senior Executive Service (SES)/General Officer (GO)/Finance Officer (FO) paid vouchers for the detection of improper payments. Any findings for the SES/GO/FO, Director DLA Human Resources will open initial communications, and all findings are addressed to the appointed DTS Approving Official with specific area of concern. Recommendations are made for remediation and confirmation actions occur to ensure corrective steps take place. DLA Travel Compliance Team memorialized both the review findings and review results for publication.
- Enhance DLA's Travel Compliance initiatives by remediating erroneous claims and amending vouchers ahead of the Defense Finance and Accounting Service's PPR. DLA's Compliance Review provides assurance by reviewing paid travel claims for compliance with applicable laws and regulations.
- PPR Overview identifies the outcome of the DLA PPR review results. The DFAS standardized areas of audit are used, capturing the number of errors and the value of those errors DLA has identified. DLA continues to demonstrate that “receipts”, invalid or missing continues to be the highest of concern. This is consistent with what is reported by DFAS at the Departmental levels. This PPR is informational in nature, and is updated monthly and released to all DLA AO's and Senior Leaders.

The following charts provide information on DLA’s PPR data, OSD performance data and OMB performance data.

Fraud Reduction Report

Pursuant to OMB Circular A-136 and the Fraud Reduction and Data Analytics Act of 2015 (Public Law 114-186, 31 USC 3321), DLA began to build the Fraud Framework by identifying the high risk areas within our business. Fraud, Waste, Abuse, and Mismanagement (FWAM) poses a significant risk to DLA in the execution of business practices and our mission. Risks include procurement process illegalities such as bribery, kickbacks, collusive bidding, false or inflated billing claims, shell companies, and product/labor substitution. Fraud also includes asset misuse/misappropriation, cash embezzlement, property theft, and falsified entitlement/expense reimbursement claims. Fraud creates significant cost and reputation risk to DLA.

DLA developed the Enterprise Risk Profile utilizing a top-down/bottom up perspective provided to senior leadership for a portfolio view of DLA risks. Information gathered from the local risks identified by the Major Subordinate Commands and Headquarters Directorates enabled the identification of vulnerabilities to mission accomplishment. These risks were ranked and rated utilizing a likelihood and impact rate scale to determine high risk areas. From this Enterprise Risk Management methodology, DLA created a risk profile in FY 2015. The requirement to conduct the identification of fraud risks specifically is evolving within DLA. To build the Fraud Framework DLA looked at business vulnerabilities. As the premier agency that procures, manages, stores, and distributes almost every consumable item the military needs to operate our focus began with customer support. To do business with DLA, customers are required to complete specific criteria that must be met and internal controls are put in place to protect the Warfighter interests and provide accountability and transparency to our stakeholders.

DLA has specific guidance in place to standardize the “how to do business” with us and also the control environment that makes sure those that do business with us are cleared to engage in our secure environment. Policies and procedures are in place to establish compliance with laws and regulations for employees to follow in the execution of their daily responsibilities and for business partners to employ in gaining opportunity to work with DLA to support our mission – “Warfighter First”.

Risk and control assessments plays a pivotal role in audit sustainment, audit advancement, fraud detection, and fraud deterrence. We began our journey with specifying a high-level financial reporting objective and sub-objectives related to preparing financial statements and disclosures. In doing so, we identified significant financial statement accounts based on the risk of material misstatement. Then for each account or disclosure, we identified relevant financial reporting assertions. In addition, we identified underlying transactions, events and processes supporting the respective accounts and disclosures. As part of this risk and controls process we are expanding our Fraud Framework in 2018 to include a more detailed fraud response plan.

DLA provides worldwide logistics support in both peacetime and wartime to America’s Military Services as well as civilian agencies and foreign countries. DLA Logistics Information Service has sole responsibility for assigning and maintaining the CAGE Code Master File. The CAGE Code is a five position code that identifies contractors doing business with the Federal Government, NATO member nations, and other foreign governments. The CAGE Code is used to support a variety of mechanized systems throughout the government and provides for a standardized method of identifying a given facility at a specific location. The code may be used for a facility clearance, a pre-award survey, automated Bidders Lists, identification of Debarred Bidders, fast pay processes, etc. Registration in the Central Contractor Registration database is required prior to the award of any contract, basic agreement, blanket ordering agreement or blanket purchasing agreement unless the award results from a solicitation issued on or before May 31, 1998. Having a CAGE Code alone is no longer sufficient to qualify a contractor to do business with The Federal Government.

The DLA Enterprise External Business Portal provides industry and military service personnel with centralized access to DLA Business Services. Systems accessed through the portal include: Engineering Support Activities, Data Demand Exchange/Customer Collaboration, Installation Support (Real Property), Disposition Services, Energy Commodity Support, and the Enterprise Data Warehouse (EDW). Access is controlled by Information Technology Directorate where the Automated Management Provisioning System is the single point of entry into approvals for requests to do business with DLA. To do business you are required to complete specific criteria that must be met and these internal controls are put in place to protect the criticality of business we do and the security of the Warfighter first.

As part of the Agency's risk associated with our end-to-end processes (Procure to Pay, Order to Cash, Plan to Stock, Acquire to Retire, Hire to Retire, Budget to Execute, Financial Reconciliation and Reporting, Fund Balance with Treasury, and Environmental Liabilities Management) business cycles have internal controls in place that support our mitigation strategies and help DLA detect or prevent fraud. Under the purview of the DLA Finance Directorate, Financial Compliance and Policy Division monitors and reports on risk mitigation strategies as part of the annual Statement of Assurance. Process documentation, testing, risk identification, and process control gaps are identified and corrective actions implemented to mitigate risk in our business processes. In accordance with OMB Circular A-123 guidance several areas have internal controls in place to mitigate fraud risk, such as payroll, contracting, and purchase and travel cards.

Metrics are developed and reported to the Director through our Annual Operating Plan and Strategic Plan Implementation Guidance as mechanisms to monitor the achievement of the goals and objectives of the DLA's Strategic Plan. Placing performance metrics in our control environment allows for continues monitoring, reporting on our success and need for improvements in DLA's internal controls environment. This drives proactive instead of reactive responses.

DLA's Office of Inspector General provides the arm of investigations and response in FWAM. The DLA OIG considers it mission essential to establish an effective means of identifying those areas where processes and controls have been found vulnerable to fraud. Combatting FWAM requires an active collaborative effort. While the DLA OIG operates independently, it relies upon the continuous support from mandated partnerships with Defense Criminal Investigative Services, Department of Defense (DoD) Inspector General (IG), and meaningful relationships with other DoD Inspectors General offices and their associated criminal investigative agencies. The support provided by these entities allows the DLA OIG to collaborate on investigative and audit efforts as well as receive operational support. In the process of combating FWAM, the DLA OIG aligns its performance measures with the DLA Director's priorities to improve organizational effectiveness and efficiency, and remain committed to providing value to the agency. DLA OIG leverages subject matter experts within and outside of DLA in combatting FWAM.

The DLA Office of Inspector General (OIG) Investigations Division (ID) conducts preliminary and administrative Inspector General (IG) investigations of matters of interest to the DLA Director and DLA senior leadership. When an ID investigation develops credible information to believe criminal activity has occurred, and the severity of that activity may need to be referred for prosecution if it is substantiated, the investigation is coordinated with and referred to a Federal, Defense, State, or local Law Enforcement Agency.

The DLA Enterprise Hotline Program is intended to provide DLA personnel with an alternative communication mode to report suspected fraud, waste, abuse, and mismanagement without fear of reprisal. DLA Hotline complaints are received through a web portal, email, phone or fax. Complaints are received, considered, coordinated as appropriate with General Counsel, and then referred to ID or to the appropriate senior leadership point of contact for either information or action. When investigations are required in support of an action referral, an examining official is appointed. Completion Reports are received and

reviewed by the Hotline Program Manager (PM) before distribution, if required. The DLA Hotline PM acts as the liaison with the Department of Defense Hotline Program.

The Agency has made significant strides to incorporate all the Government Accountability Office Federal Internal Control Standards. However, specifically around principle eight - Assess Fraud Risk – two areas of the seven require greater emphasis in 2018; risk factors and response to fraud.

Other Key Regulatory Requirements

Prompt Payment Act

The Prompt Payment Act requires Federal Agencies to make payments to vendors for supplies and services by the payment due date. Computation of the payment due date is specific to the type of service or product provided. In general, most payments are made within 30 days. However, there are some exceptions. For example, contracts with suppliers of meat, fresh and frozen fish products, poultry and egg products payment will be made as close as possible to but no later than, seven calendar days from the date of delivery of the product.

DLA is strongly committed to supporting small business growth and has taken steps to ensure that the Federal Government promptly and efficiently pays small businesses when they contract to provide goods and services to the government. As part of this commitment, OMB issued Memorandum M-11-32, “Accelerating Payments to Small Businesses for Goods and Services,” in FY 2011. This outlines the Executive Branch policy that, to the full extent permitted by law, by agencies shall accelerate payments to small business contractors with the goal of making payments within 15 days of receipt of relevant documents.

If a payment is late, an interest payment is due to the vendor and is made without the vendor having to request the interest payment. Interest is computed using the daily rate of interest (established by the Secretary of Treasury) multiplied by the principle amount times the number of days paid late.

OSD has established an interest penalties performance target of \$90 dollars per million.

Debt Collection Improvement Act

In compliance with the Debt Collection Improvement Act of 1996 (DCIA), the DLA manages its debt collection activities under the DCIA regulation. The DLA’s Accounts Receivable policies, in accordance with the DoD Financial Management Regulation, provide guidance for the collection, referral, reporting and write-off of non-tax debts. The DLA coordinates with the DFAS, which then refers valid and legally enforceable delinquent public receivables to Treasury. This in accordance with the DCIA and the Digital Accountability and Transparency Act of 2014.

Audit Advancement

Prior to February 2012, DLA organizations were mission-focused and concentrated on supporting the Warfighter; however, the end-to-end processes were not centrally managed nor focused on the elements necessary to pass and sustain an audit. The establishment in March 2012 of the Audit Readiness Program Management Team (PMT), led by a member of the Senior Executive Service, demonstrated Leadership’s commitment to audit readiness and reduce overall risks to the agency, thereby providing better support to the Warfighter.

The OUSD (Comptroller) Financial Improvement and Audit Readiness (FIAR) Directorate manages the DoD FIAR Plan and develops and issues the FIAR Guidance that defines DoD’s goals, priorities, strategy, and methodology to achieve audit readiness. The guidance describes the roles and responsibilities of reporting entities and service providers and the processes they should follow to achieve audit readiness. This guidance is updated periodically to remain current with DoD’s priorities and align with all applicable Federal and Departmental financial management requirements. On September 30, 2015, DLA asserted that our Agency was audit ready for all fund accounts. Since DLA reached its goal of assertion and to better reflect where DLA is in the audit process, the audit readiness initiative was changed from audit readiness to the Audit Advancement.

DLA established a rigorous enterprise Audit Advancement strategy, program infrastructure, and governance structure that were managed centrally with full Agency support and clear accountabilities at the senior level. The governance included a Stewardship Committee, centralized PMT, the Audit Leadership Integration (ALI) Team, Business Cycle Teams (BCTs) led by senior executives at DLA Headquarters known as Enterprise Business Cycle Owners (EBCOs), Major Subordinate Command (MSC) representatives, and PMT.

The Stewardship Committee serves primarily to support the EBCOs in fulfilling their stewardship responsibilities by identifying and removing obstacles to stewardship and by elevating audit advancement related processes and concerns. Collectively, the Stewardship Committee makes decisions and builds consensus to improve business operations; recommends resourcing to help ensure compliance with existing laws, regulations, policies, and standards; reviews enterprise-wide audit advancement milestones and progress; reviews audit advancement-related obstacles and significant risks to DLA, and decides how to overcome them; and sets the “tone at the top” for free and open exchange of audit advancement-related information.

The Business Cycle and MSC representatives work with the EBCOs and MSC Commanders to help ensure execution of their respective team’s audit advancement responsibilities, and identify and resolve impediments to the Agency’s auditability at each ALI meeting. This group provides the PMT a forum to communicate program guidance and assignment details to the Business Cycle and MSC representatives in a scheduled manner; advise on potential resolutions and strategize on implementation approaches to agreed-upon resolutions; and foster open audit advancement-related communication among the various teams.

The ALI Team is chaired by the OMB CircularA-123 Program Manager and meets weekly with the Process Cycle Integrators, Process Owners, and MSC Process Health representatives to discuss and provide updates on Audit Advancement initiatives and issues.

DLA designed a sustainment plan to ensure it has the skills and/or capabilities to train and transition the DLA workforce to prepare for audit and sustain these new practices into the future. DLA has the necessary processes, controls, data, system, and human capital capabilities in place (including audit infrastructure, manual and system internal control testing protocols, and management oversight) to sustain audit advancement solutions within the business processes throughout the Agency and with the Agency’s service providers.

DLA’s Audit Advancement program identified and established processes and controls to withstand an audit for full enterprise-wide auditability and to integrate financial management with DLA’s programs and operations. The readiness of DLA’s key systems, particularly EBS, is a critical element of DLA achieving audit success, given the size, complexity, volume of transactions, geographic dispersion of its operations, and highly automated business processes with its customers.

J6 focused on IT General Controls affecting auditability for DLA-owned and DLA-managed systems whereby DLA performs the role of a service provider to its customers. Certain system components are operated by DLA on behalf of other entities and DLA has demonstrated through service provider focused audits that it has adequately designed controls that operate effectively.

The Audit Response and Sustainment Team serves as Audit Liaison in responding to external Services Organizations financial statement audit requests. The team meets daily with the PCI, Process Owners, and MSC representatives to assign and discuss audit requests for evidential matter from the Independent Public Auditor (IPA).

The IPA, Ernst & Young was selected and arrived in August 2016. The IPA Report is enclosed in the Financial Section of the AFR. DLA will use the report as a baseline to improve financial statements.

Acronym List

#Acronyms

Acronyms	
A2R	Acquire to Retire
AFR	Agency Financial Report
ALI	Audit Leadership Integration
AO	Approving Official
AOP	Annual Operating Plans
AT&L	Acquisition, Technology and Logistics
AUM	Assessable Unit Manager
B2P	Budgetary to Propriety
BCT	Business Cycle Team
BD	Building Demolition
BRAC	Base, Realignment, and Closure
CAGE	Commercial and Government Entity Code
CBY	Charge Back Year
CEFMS	Corps of Engineers Management System
CERCLA	Comprehensive Environmental Response, Compensation, and Liability Act
CIO	Chief Information Officer
CIP	Construction in Progress
CMR	Cash Management Review
COLA	Cost of Living Adjustments
CONOS	Concept of Operations
CONUS	Continental United States
CPI	Continuous Process Improvement
CPIM	Consumer Price Index Medical
CSRS	Civil Service Retirement System
CTC	Cost to Complete
DAAS	Defense Automatic Addressing System
DAI	Defense Agencies Initiative
DAWIA	Defense Acquisition Workforce Improvement Act
DCIA	Debt Collection Improvement Act
DDRS	Defense Departmental Reporting System
DEBS	DoD Enterprise Business System
DERA	Defense Environmental Restoration Account
DFAS	Defense Finance and Accounting Service
DLA	Defense Logistics Agency
DLA-T	DLA Transportation Command
DMEA	Defense Microelectronics Activity

DMLSS-W	Defense Medical Logistics Standard Support - Wholesale
DoD	Department of Defense
DoD EMALL	DOD Electronic Mall
DOL	Department of Labor
DR	Debris Removal
DRAS	Defense Retired Annuitant System
DSS	Distribution Standard System
DTS	Defense Travel System
DV	Vice Director
EAGLE	Employee Activity Guide for Labor Entry
EBCO	Enterprise Business Cycle Owner
EBS	Enterprise Business System
EDA	Electronic Document Access
EDW	Enterprise Data Warehouse
EL	Environmental Liabilities
