LMI Representatives

# Policy, Contracts, SE, Education Subcommittee Meeting

- 
- Reviewed draft SD-22 DMSMS Guidebook parts management section and provided comments.
  - Discussed MIL-STD-3018 part selection order of preference, paragraph 5.2, and related issues and developed proposed verbiage for a future Change Notice. Proposed verbiage will be forwarded for review and comment.
  - Drafted wording for Section 5.2 MIL-STD-3018

# Parts Management Tools and Data Subcommittee

- 
- XSB briefed Pin Point status, capabilities, and starting a power user group to provide feedback.
  - Discussed how to better promote “standards as digital data.” Reviewed a video on how Boeing implemented a company digital standards project.
  - Discussed promoting / accelerating adoption of digital standards within government / industry.
  - LMI proposed an approach to defining an open architecture for improving data exchange interoperability and took an action item to develop a common enterprise-wide approach.
  - Discussed preferred parts & technology roadmaps.

# Counterfeit Parts Subcommittee Meeting

- 
- **Discussed and considered the creation of an SD-type of document on the topic of counterfeits.**
    - **This would provide guidance and address best practices.**
    - **It would also distill and summarize the key elements contained in numerous other counterfeit-related documents.**
