Joint Advance Planning Brief to Industry

Special Purpose Product Updates

Multi-purpose Personal Hydration Systems (MPHS)

Individual Water Treatment Device (IWTD)

Improved Ghillie System (IGS)

Flame Resistant Fuel Handler's Coverall (FR FHC)

20 OCT 16

Sequana Robinson
Durable Goods, Product Officer
Product Manager Soldier Clothing
and Individual Equipment

Multi-purpose Personal Hydration Systems (MPHS)

Where We Are:

Requirement: Capability Production Document (14 Mar 14)

System Description: Chemical/Biological (CB) agent and Toxic Industrial Chemical (TIC) resistant hydration system

Objective: Provide modular on-the-move hydration capability in a Chemical, Biological, Radiation, and Nuclear (CBRN) environment

Cost Per Unit (est): \$95.74 MPHS / \$13.45 Training Kit

Proponent: Maneuver Support Center of Excellence (MSCoE)

*** Supply Request Package accepted by Defense Logistics Agency - Troop Support**

Where We Are Going:

- Ensure MPHS is safe to use for Aviators by verifying each platform
- Complete testing to meet KPP 2 and 3 increasing protection from 6 to 12 hours
- Complete testing to extend shelf life from 5 to 10 years

Individual Water Treatment Device (IWTD)

Where We Are:

Requirement: Capability Production Document (16 Dec 11, CARDS # 02094)

System Description: Individual water purifier compatible with the Modular Lightweight Load-carrying Equipment (MOLLE) Hydration System which will supplement/replace the iodine and chlor-floc tablets currently used

Objective: Provides modular on-the-move hydration capability for purifying local water sources

Cost Per Unit (est): \$85

Proponent: Maneuver Center of Excellence (MCoE)

Where We Are Going:

- Complete IWTD Limited User Evaluation and P248 Light Testing
- Award a five-year IDIQ contract under SBIR Phase III to Cascade Designs and start production for 49,266 units, including 10% spares
- Submit TDP/SRP to DLA-TS to allow transition for enduring requirements

Improved Ghillie System (IGS)

Where We Are:

Requirement:

- Rapid Fielding Initiative (RFI)
- Draft Capability Production Document (CPD) – (Worldwide Staffing)
- Soldier Enhancement Program (SEP) Initiative (Chassis)

System Description: The IGS will help conceal the Sniper and Scout during missions allowing them to remain undetected within close proximity of the enemy forces. The IGS shall provide a modular, mission tailorable and improved counter-surveillance protection capability. The IGS shall provide a reduction in weight, improved drying time, decreased don and doff times, and an increased access to mission essential items. The IGS shall provide an appropriate level of mitigation from flame and thermal threats, increased Soldier mobility and agility, and increased integration with existing individual equipment or personal protective equipment. The IGS will provide Snipers/Scouts with a tool to enhance security and situational awareness of the operating environment

Where We Are Going:

Objectives:

- Reduced System Cost
- Develop Jute that is “not highly flammable” vs. FR
- Improving capability for future deployers

Actions/Outcomes:

- Maneuver Center of Excellence (MCoE) CPD – 4FY17
- Army Program of Record in FY17
- Continue market surveillance and research for decreased costs, increased operational effectiveness, fit, suitability, and durability

Improved Ghillie System (IGS)

Where We Are:

Requirement

- Rapid Fielding Initiative (RFI)
- Draft CPD –(Worldwide Staffing)
- Soldier Enhancement Program (SEP) Initiative (Chassis)

System Description

- The Cobra Super SC-4 Garment is a GHILLIE base foundation garment body. It has an adjustable and removable hood, button sleeve upgradable, tight-grid paracord placement for foliage attachment, LD mesh fabric in camel brown color
- The Multi-Purpose Back Drape for VIPER Garment is a GHILLIE base foundation accessory for select Viper garment models. The drape attaches to rear shoulder region of Viper garment enabling full back coverage. The drape can also attach to brim of Viper hood for frontal equipment cover and concealment, mesh fabric, MultiCam

Where We Are Going:

Objective

- Improving capability for future deployers
- Reducing out of pocket expense for Soldiers
- Develop Jute that is “not highly flammable” vs. FR

Actions/Outcomes

- Maneuver Center of Excellence Capability Production Document (CPD) – 4FY17
- Army Program of Record in FY17
- Continue market surveillance and research for increased operational effectiveness, fit, suitability, and durability
