How We Can Improve

MARINE CORPS SYSTEMS COMMAND

Equipping our MARINES

Certification Program

Program Description

- The Certification Program maintains the USMC patterns and specifications, certifies optional uniform and equipment manufacturers, and conducts periodic quality control inspections.
- The mandate for optional clothing and uniform accessory quality assurance is provided in the current edition of the MCO P10120.28, Individual Clothing Regulations.
- Update and digitization of USMC uniform item depictions.
- Continuous five-year reviews and updates of specifications in conjunction with Systems Engineering and Acquisition Logistics, other services, the DLA, and industry.
- Certification duration is three to five years depending on the product category.
- An optional certified item meets or exceeds the basic specification requirement.

Program Status

- Acquisition Category (ACAT) & Date of Designation: N/A
- Previous Milestone Decision Authority (MDA)/Program Decision Authority (PDA): CMC interest
- Primary Inventory Control Activity (PICA): N/A
- Approved Acquisition Objective (AAO): N/A
- Follow-on Strategy: N/A
- Manufacturer and Location: Various continental United States manufacturers.

Over 250 items certified from 44 certified vendors

Certification Manual Update	Oct 2022

Baseline Technologies: FR Finish Application & Proof-of-Concept SWIR developmental materials & tropical fabric.

Program Status

Reduce burden and decreasing logistics for the enterprise while providing improved capabilities to Marines.

- Near term: focus on RFP for NexGen MCCUU to demonstrate trade space and acceptability
- Mid term: SRP to DLA for NexGen and primary CCU iterations
- Far term: RFP (if funded) for CCU development

Program Description

- NexGen Combat Uniforms increased capability over issued uniforms and decrease logistical burden.
- Phased approach to upgrade currently issued EFRCE and MCCUU and address future fight to support modernization efforts of USMC.
 - Need for lightweight, durable, comfortable, breathable uniforms that function in hot/humid environments and offer some protection from FR threats.
 - Multiple services looking for similar solutions.
- NextGen Uniform programs can leverage separate but concurrent R&D effort.
- NextGen Uniforms will continue to understand and characterize threats for future fight and upgrade uniform capabilities as needed.

Key Milestones

Event	Date
RFI to Industry	Released 10 Nov 2020, Closed 15 Jan 2021

Joint Clothing & Textile Modernization Initiative Approach:

Execution through four Integrated Process Teams

Key Events	Date
Beta PLM Contract Established	Sept 2021
Charter Signed – USMC, US Navy US Army, US Air Force	Nov 2021
Business Case Analysis Complete	Apr 2022
OSD MSTP Award	Jul 2022
Beta PLM Bridge Award	Sep 2022
General Officers Meeting	Sep 2022
COA Decision	Nov 2022
POR Establishment / Memorandum of Agreement	Feb 2023

Joint Sizing & Fit:

- Size reconciliation and improved fit (Block Patterns)
- Garment simulation and virtual prototyping
- Accurate tariff prediction

Body Scanning:

- Body Scanning (portable, affordable, available)
- 3D Visualization
- Warfighter population composition and prediction

Transition and Configuration:

- Cross services coordination / economies of scale
- Expand domestic supply base (Reduced barriers to entry)
- Streamlined for modern manufacturing

Digital Platform and Implementation:

- Improved efficiencies (25-30%)
- Centralized data sharing, decision support & analytics
- Agile acquisition / New capability introduction
