***NexGen MCCUU  
JAPBI 17 Nov 2021***

**Current**

**Future**

**USMC Uniform Status:**  
Currently issuing 3 types of uniforms under 3 supply vehicles

As an enterprise: increase utility and decrease logistics

MCCUU – For all Marines wear in garrison, general training, & some deployment. DLA TS sustained.

→ NexGen MCCUU:  
End state- increase durability, increase breathability, increase function in tropical environment, increase signature management. Ideal objective- add FR to increase protection and readiness

Flame Resistant Combat Ensemble (FRCE) / Enhanced Flame-Resistant Combat Ensemble (EFRCE) – For deployment when flame hazard probable to reduce burn injuries. MCSC procured and CSP managed. No current contracts.

→ Close Combat Uniform: industry shows capabilities to increase breathability and moisture comfort. Enduring need.

Need for combat shirt  
Need for kneepads  
Need for MWIR and LWIR protection (separate or in uniform)

MCTCU – For deployment to tropics for faster-drying & improved comfort. MCSC procured and CSP/Albany managed.

MCTCU → Requirements in place & sustained

*Use the RFP to solidify the ways of improvement to the existing uniform capabilities; reducing burden and decreasing logistics for the enterprise while providing improved capabilities to Marines.*
