

# Commercial Shelter Contract Quality Assurance Requirements

While most shelters within DLA Troop Support Contract have been designed to conform to Military Tactical Mission Environments the level of performance has been determined by the commercial vendor. In contrast our Military Standard Shelters had been developed to satisfy performance requirements determined by the Military Service Shelter Program Offices.

In order to assure a standard in uniformity of the advertised level of performance as well as the test methods used to determine the results the following requirements are specified in our contracts. Defense Contract Management Agency Quality Assurance Representative shall verify and monitor the following contract requirements:

## Fabric Test Reports

Flame In Accordance With ASTM-D-6413

Fabric Lot Testing IAW DSCPM 4155.3

Marking and Labeling MIL-STD-129 ASTM-D-3951

Safety and Health OSHA requirements

Toxicity MSDS In Accordance With Environmental Protection Agency requirements

Performance to be Vendor Determined Verification U.S.Military Test Center Test Report

## Purchase Description Requirements:

Shelter System and all components shall be documented in accordance with the manufacturer's Technical Data Package (TDP).

To assure the accuracy of test reports will remain valid the attributes of the item shall not be changed through the life of the contract without formal modification to the contract.

The manufacturer's Technical Data Package will remain proprietary to the vendor and shall only be validated to assure the design is both documented and stable through the life of the contract.

## REQUIRED AFTER CONTRACT AWARD FOR ITEMS TO BE INCLUDED IN DOD's EMALL TENT SPECIALTY STORE

All awarded items presented for Military Use in the Department of Defense's Email Website for use shall include the following:

a. After contract award, the vendor is requested to submit one Test Data Report (Appendix B) to the Contracting Officer for each shelter within 90 days. A final Test Report shall accompany the Test Data Report. If a support trailer(s) is included in the product line, include the final test report that it underwent safety and mobility testing at a U.S. Military Test Center.

NOTE: No sale to the government will be accomplished prior to receipt of the Final Test Report.

b. Shelter System and all components shall be documented in accordance with the manufacturer's Technical Data Package (TDP). This documentation includes all

requirements and specifications for each item. Documentation shall detail all items down to the component level and specification. This documentation shall be maintained and updated throughout the life of the contract. Once each end item's performance has been tested and verified through formal test reports the TDP Documentation shall not be changed without contract modification.

To assure the accuracy of test reports will remain valid the attributes of the item shall not be changed through the life of the contract without formal modification to the contract. The manufacturer's Technical Data Package will remain proprietary to the vendor and shall only be validated to assure the design is both documented and stable through the life of the contract. The TDP shall be maintained at the vendor facility and is not required to be sent to the government; however, the government retains the right to inspect the TDP at any time during the life of the contract.
