

Hall of Fame Inductees

JOHN MOTZ

Is inducted into the Defense Industrial Supply Center Hall of Fame this twentieth day of January 1999 for his extraordinary leadership and support as Director of Technical Operations and for his continuous outstanding mission support throughout his tenure at DISC from 1961 to 1983. His aggressive leadership style and extensive background in supply cataloging and military equipment figured significantly in promoting DISC as a leading technical processing authority within the defense supply system. He developed a master description card which significantly reduced repetitive, detailed and expensive technical catalog research. The concept was viewed as a forerunner to the current automated materiel management systems employed throughout the Defense Logistics Agency today.
