Fill Rate Report:

The following language has been updated to read:

1. **Monthly Fill Rate Report** – The fill rate is calculated by dividing the number of cases accepted by the customer by the number of cases ordered. Mis-picks and damaged cases should not be included in the calculations and are considered as not-in-stock (NIS) in the fill rate calculation.
2. **Weekly Fill Rate Report** – In addition to the monthly fill rate report, the Prime Vendor will also submit a weekly report reflecting the previous week's business.
3. The Monthly and Weekly fill rate reports should specify fill rates grouped by contract number/DODAAC (first six positions of the purchase order)/purchase order number, as in the attached example. The date range of the report shall be based on the customer's required delivery date (RDD).
4. Overall discrepancy report shall only include purchase orders that contain less than 100% fill rate and reason code for discrepancy.
5. The contractor shall submit a separate discrepancy spreadsheet containing a list of Government authorized and verifiable fill rate exceptions using acceptable codes outlined below.
