C/O Suffolk Cold Storage  
2000 Northgate Commerce Pkwy  
Suffolk, VA 23435

3) Joseph Zulli replaces Tina Frederico as Contracting Officer on this Contract.

4) The following changes are made to Page 2 of CAP plan:

**SPV Facility Contingency Plan Of Action**

As of the end of June 2013, Ebrex Food Services ("EFS") will have 2 operating platforms from which it is running its

Subsistence Prime Vendor contract for Southern Europe. These 2 platforms enable EFS to support DLA Troop Support customers with timely deliveries during both normal and emergency periods. It is important to note that all of EFS platforms act as back-ups to each other, enabling increased flexibility and a virtually seamless transition from one platform to another in cases of a surge.

• **2 Operational platforms:**

- ITALY - Forli known as DC04
- BULGARIA - Plovdiv known as DC17

• **2 Administrative platforms:**

- SWITZERLAND - Geneva
- ITALY - Forli

In the event that one platform is no longer able to function, the remaining platform will take over its operations immediately.

• If DC04 (Italy) is DAMAGED, the back-up is DC17 (Bulgaria).

Ebrex Food Services (EFS)  
SPM300-12-D-3486  
Modification P00202

---

If DC17 (BULGARIA) is DAMAGED, the back-up is DC04 (Italy).

The stock available in any of the 2 platforms should be sufficient, (up to the next procurement), to cater for the damaged or shut down operation. If possible, any remaining inventory in the damaged or closed down operation will be transferred to the other platform. Any shipment directed to the damaged or closed-down platform would be requested to be rerouted immediately.

Systems and procedures used across the 2 platforms are similar, which makes it easy for personnel to be switched from one platform to another should it be necessary.

**Platform DC17 – Plovdiv, Bulgaria**

As of end of June 2013, EFS has partnered with Fresh Logic, to provide the required warehousing services for its PV effort. Located in Plovdiv, BULGARIA, its location allows EFS to rapidly cater to customers in Kosovo, Turkey, Romania, and Bulgaria. The platform works with high-tech storage system that provides automated movement and distribution of pallets, storage, tracking the shelf life of the products.

**DC17 in brief:**

- Number of ramps: 15
- Number of pallet position: approx. 15'000
- Number of pallet position used for PV: approx. 1'000-1'200
- Online stock control
- Bonded warehouse

As stated above, the overall facility contains about 15'000 pallets (i.e. about 15 times bigger than what EFS expects to use).

Increase of 100% of current expected usage (1'000-1'200 pallets) would be accommodated within 15 days.
