The following revisions apply to attachments 1 and 2 to the solicitation:

1. Attachment 1 – An error was identified in the formula that extended the offerors Premium Distribution Price, categories 195 thru 237, in column “O”. The formula erroneously multiplied the 18 month quantity estimate by the offeror’s 3rd year option premium price, when the formula should have used the 4th year option price. This formula error was corrected.

2. Attachment 2.

(a) An error was identified in the distribution price formula in column “M” for items 196, 197, and 198. The formula erroneously used division in lieu of multiplication to convert the distribution price unit of measure to the government unit of issue. This formula error was corrected.

(b) The heading for column “V” was revised from “If not an exact Spec/Unit Match, please explain the difference between the Gov’t item and your offer” to “If not an exact Spec/Unit Match, please explain the difference between the Gov’t item and your offer. Other exceptions are also required to be noted here.” Other exceptions include but are not limited to: product price exception 1 – airfreight transportation applies; product price exception 2 – national price applies and lower distribution price offered; etc.

(b) Columns “AP-AR” were added to identify discrepancies found by the Government on the offerors originally submitted quotes and/or invoices.

(c) Column “AS” was added for the Government to identify the corrective action that offerors are required to take in relation to the invoice discrepancies noted in columns AP-AR.

(d) Column “AT” was added for the offeror to address each quote/invoice discrepancy or action taken in response to the Government findings in columns “AP-AS.”

(e). Column “AU” was added for the offeror to offer a lower distribution price on a per item basis when a “National Price” is offered in column “F.” This price must be offered per the government unit of measure identified in column “J.” Column “AU” must remain valued at \$0.00 if national pricing is not applicable.

(f). Column “AV” was added as a duplicate of column “J” for the offerors convenience.

(g). The formula in column “K” was revised to capture lower distribution prices identified in column “AU.” If a zero price is indicated in column “AU,” the distribution price will be captured from attachment 1 as the spreadsheet was originally structured.

The following revisions apply to the solicitation:

1. On pages 17 through 24, delete and replace **DFARS 252.225-7040** as follows:

Failure to agree to any deduction or recovery provided herein shall be a dispute within the meaning of the clause of this contract entitled "Disputes".

(d) The rights and remedies provided by this clause shall not be exclusive and are in addition to other rights and remedies provided by law or under this contract, nor shall pursuit of a remedy herein or by law either jointly, severally or alternatively, whether simultaneously or at different times, constitute an election of remedies.

6. On page 127, delete and replace paragraph VI. Fill Rate/Substitutions as follows:

VI. FILL RATES

A. A minimally acceptable contract order fill-rate is 97%. Higher fill-rates may result in a higher Past Performance and Experience rating for option determinations and future acquisitions.

B. The Government's in-house record for fill rate shall be calculated by the Government, utilizing the order and receipt information located in STORES, as follows:

$$\text{(Cases accepted/cases ordered)} \times 100 = \text{Fill Rate \%}$$

Please note that this could take up to three months to be calculated due to system reconciliation. However, the governments finding will act as the final rate.

C. Definitions:

Cases accepted: The product quantity that the customer has received and receipted, not including damaged cases, and mis-picks.

Cases ordered: The product quantity requested by a customer.

Catch-weight item: An item for which a weight range is acceptable; normally meat items purchased by the pound, e.g. 8905-01-E29-2117, Beef Flank Steak, 11-15 LB.

D. Regardless of the line item/LSN unit of issue or unit of measure (LB, CO, CS), the Government will calculate the fill-rate for each delivery order line item based on cases ordered & accepted, utilizing the units per pack, or purchase ratio factor, to convert all order/receipt quantities to cases. In calculating catch-weight item order/receipt cases and fill-rates, the weight range average will be utilized to convert pounds to cases. The government system will round down and up as follows:

0 – 0.4999 will round down

0.5– 0.999 will round up

a. As an example, for the item at C.c. herein, the average weight is 13 LB. In the event a customer wants 50 lbs of flank steak, the ordering system will place the order for a

multiple of 13 LB equal to or greater than the requirement, in this case 52 LBS. If the contractor delivers 45 LB, the fill-rate will be calculated as follows:

Order = 52 LB / 13 = 4 cases
 Receipt = 45 LB / 13 = 3.46 = 3 cases
 Fill-rate = 3 / 4 = 75.0%

If the contractor delivers 46 LB, the fill-rate = 46 / 13 = 3.53 = 4 cases = 4 / 4 = 100%

b. Contractors shall assure that the 832 catalog transaction set for each catch-weight LSN contains (1) the correct average case weight of cases to be delivered in 832 field CTP04, Catch-Weight Multiple, and (2) 832 field PO404, Packaging Code, includes the catch-weight indicator "AVG".

Catch-weight items are items which permit a weight range per case, normally meat items with a LB weight range. For catch-weight items only, the allowable quantity variation is:

Decrease: minus (-) 49% of the item average weight

Increase: plus (+) the item average weight

For example, for 8905-01-E29-2117, Beef Flank Steak, 11-15 LB, with a 13 LB average, order quantities will be in multiples of the 13 LB item average weight. The allowable variations in quantity for any order for this item are:

Decrease = 13 x .49 = 6 LB

Increase = 13 LB

For an order for 104 LB of 8905-01-E29-2117, Beef Flank Steak, 11-15 LB, the contractor may deliver 98-117 LB and receive a 100% fill-rate.

E. Designation of catch-weight items: To designate a catch-weight item, the Contractor must input catch-weight indicator "AVG" in 832 catalog field PO404, Packaging Code, for each catch-weight item. The Contractor shall assure that the correct average case weight (i.e. the actual weight average of cases that will be delivered) is input in 832 catalog field CTP04, Catch Weight Multiple.

F. See paragraph D.a. above for the calculation of fill-rate for catch-weight items.

G. No single line item will be credited for more than 100% fill-rate. This includes both catch-weight and non-catch-weight items and for any items should the accepted quantity be greater than the quantity ordered.

H. Substitute items will be accepted/receipted against the new STORES order line as described at paragraph IV.7.B above, and the original order line will be counted as a zero fill. As an example: 8 cases of #10 can applesauce is ordered, the PV is NIS and recommends #303 CN applesauce as a substitute, customer accepts substitute and places a new order for 6 cases of the #303 CN applesauce (for a different quantity in this example due to package/pack size difference), and PV delivers the substitute order in full:

Original: 8915-00-127-8272, Applesauce #10 CN, 6/CS : Order = 48 CN = 8 CS : Receipt = 0

Substitution: 8915-00-127-6272, Applesauce #303 CN, 24/CS : Order = 144 CN = 6 CS : Receipt = 6 CS

The fill-rate for the original line is 0%, the fill-rate on the substitute line is 100%. The weighted average fill-rate for the 2 lines is 42.9% (6 cases accepted /14 cases ordered).

I. Non-conforming cases, e.g. incorrect items (mis-picks) and damaged cases, will not be accepted and receipted.

J. The Government in-house record for fill-rate calculates the fill-rate for each line item of each purchase order, the fill rate per purchase order, the fill-rate per customer, and the fill-rate for all customers, for any period of time, based on order required delivery dates (RDD). Fill-rates are calculated for non-catch-weight items, catch-weight items, and overall (all items) fill rate.

K. The Contractor shall promptly inform the Contract Specialist or Contracting Officer of any specific instances that would absolve or excuse its failure to deliver an order, or individual line item(s), in full; e.g. customer cancelled line or quantity without adjusting STORES, customer ordered incorrect quantity, item being discontinued, etc. If the Government agrees with the justification, the Government will post the

exception into its in-house system which will result in the order or line(s) either being excluded from the Government fill-rate calculation or the correct order and receipt quantities being included in the calculation. These excusable instances represent Fill-Rate Exceptions, and are shown below.

L. The contractor shall submit its monthly fill-rate report (to include overall fill rate; non-catch weight item fill rate; and catch-weight item fill rate) to the DSCP Contracting Officer. The monthly report shall be based on order required delivery dates (RDD), not order placement dates, i.e. the monthly report for March xx shall include all orders placed for deliveries 01-31 March xx. This would normally include orders placed the last day(s) of February xx. The Government will compare and attempt to reconcile the Government and contractor's report. The Government's fill-rate report will be the official government record for contract performance evaluation.

FILL RATE EXCEPTIONS:

B: STORES Catalog Problem; PRF Incorrect

C: STORES Catalog Problem; Catch Weight Item PKG data Incorrect

D: Monthly Demand exceeds Average Monthly Demand by $\geq 300\%$ *

E: Newly Cataloged Item/Insufficient Time for Vendor to Procure*

7. On page 137, paragraph II. Management Reports, add the following as the first paragraph:

The Contractor is required to add the following statement to every management report submitted to DSCP: "I certify that all information submitted to the Government is complete and accurate to the best of my knowledge. I understand that false statements contained herein may be punishable by law."

8. On pages 137 and 138, revise paragraph II (A), Fill Rate Report as follows:

A. Fill Rate Report. Shall be submitted in non-protected Excel format.

1. Monthly Fill Rate Report – The fill rate is calculated by dividing the number of cases accepted by the customer by the number of cases ordered. Mis-picks and damaged cases are considered as not-in-stock (NIS) in the fill rate calculation.

2. Weekly Fill Rate Report – In addition to the monthly fill rate report, the Prime Vendor will also submit a weekly report reflecting the previous week's business. Previous week is defined as Sunday through Saturday Required Delivery Date (RDD) orders.

The Monthly and Weekly fill rate reports should specify fill rates grouped by contract/catalog number(s) (if applicable), DODAAC (first six positions of the purchase order) and purchase order number. The date range of the report shall be based on the customer's RDD for the previous week as defined in para 2 above.

The report shall contain all orders for the specified time period, as well as, a worksheet summary roll-up report tab which captures all contract/catalog numbers combined. The summary shall contain the following information:

- a. Overall fill rate based on cases
- b. Overall non-catch weight fill rate based on cases
- c. Overall catch weight fill rate based on cases
- d. Overall catch weight fill rate based on pounds
- e. Purchase orders shall be grouped by DODAAC. Within each DODAAC sort fill rates by purchase order number

Overall discrepancy report shall only include purchase orders that contain less than 100% fill rate and reason code for discrepancy.

The contractor shall submit a separate discrepancy spreadsheet containing a list of Government authorized and verifiable fill rate exceptions using acceptable codes outlined below:

FILL RATE EXCEPTIONS:

J: Special Order Item*

K: Item Being Phased Out

L: Customer Ordered Wrong Item

M: Customer Ordered Incorrect Quantity for Catch Weight Items

Z: Other, Not Listed (note: Need to explain in separate Word Document)

Note: * Not Applicable

Note: When using exception M, the fill rate should be calculated as outlined below regardless of the fill rate percentage; i.e., 30 lbs accepted / 20 pounds ordered = 150%. Using this code will explain why the fill rate is over 100%.
