Pursuant to DLAD Provision 52.215-9023 Reverse Auction, DLA Troop Support Subsistence will conduct a reverse auction on SPM300-12-R-0013, the San Antonio, TX area solicitation. The Reverse Auction will only be used to negotiate 235 items out of the 1562 separate requirements in the schedule of items in addition to the mandatory item handling fee. As a result, and in order to establish the final offered prices through the on-line reverse auction, the offerors will only be able to decrease the prices for these 235 items (with and without Fuel Surcharge) and the mandatory item handling fee for the base and option period (with and without Fuel Surcharge) through the reverse auction. All offerors will be required to submit final proposal revisions, including final pricing for the 1327 non-auctioned items and any Non-Price Proposals revisions, outside of the reverse auction procedure and prior to the start of the on-line reverse auction. The reverse auction allows offerors to decrease prices/fees or keep prices/fees the same; offerors may not raise prices or fees.

The auctioned items at their respective estimated quantities represent approximately 80% of the expected contract dollar value. The prices submitted prior to the reverse auction (for items not included in the reverse auction) and during the reverse auction (for items included in the reverse auction) will constitute an offeror's final proposal revisions; however, the Contracting Officer may reopen negotiations if it is determined to be necessary.

DLAD Provision 52.215-9023(a) states "the reverse on-line auction will be used as a pricing technique during discussions to establish the final offered prices from each offeror." For the purposes of this acquisition, "final offered prices" shall mean the Aggregate Unit Prices as defined in the solicitation. Aggregate Unit Price means, generally, the Unit of Issue (UOI) price multiplied by the estimated quantity. This process is described in detail in the solicitation, page 124, FAR 52.212-2(d)(2)(ii) Price Evaluation Process:

The Unit Prices for each Schedule of Items line item will be multiplied by the corresponding base period estimated quantity, summed, and that figure will be the Aggregate Unit Price. The

same procedure will be used for the option period (only applicable to FSOS and storage and/or handling fees for mandatory items), using the corresponding option period estimated quantities. Finally, the Aggregate Unit Prices for the base period and option period will be added together to arrive at the total Aggregate Unit Price for the entire 2 year period, which is the evaluated price.

Offerors will engage in a reverse auction on Unit of Measure (UOM/case) prices for some items.

Other items, mostly meats, will be auctioned on the basis of UOI/lb prices. These items are detailed in the table at the bottom of these instructions. The offeror shall not perform any conversions to these numbers. Subsequent to the reverse auction, the government shall perform all necessary calculations to derive the UOI price and corresponding Aggregate Unit Price.

The reverse auction will allow each offeror to decrease two versions of its prices: 1. with fuel surcharge; 2. without Fuel Surcharge. Thus, the auction will apply to 480 total price changes summarized in the table below—the items themselves are detailed at the bottom of this document.

232 PPI Items	464 prices - 232 with surcharge; 232 without surcharge
3 FSOS Items	12 prices - base and option, with and without surcharge
1 Handling Fee	4 prices - base and option, with and without surcharge

The government will not show quantities or aggregate pricing in the reverse auction. Each offeror shall see its own price and the overall low price for each line. Names of offerors will not be visible to any party participating in the auction except for the government. Offerors will be allowed to

decrease their prices in bid decrements of at least \$0.01 for each line item. Offerors may decrease in decrements larger than \$0.01 so long as that decrease is in a multiple of \$0.01.

Per the solicitation, the government shall make award based on the Aggregate Unit Prices for the base and option years (the evaluated price). Therefore, an offeror should try to provide its best price on every line, even if it cannot beat the low offer on that line. In sum, every price reduction in the auction will help an offeror reach the position of the aggregate low.

The auction is scheduled to take place on 13 November 2012 with training on 07 November 2012. The auction shall run from 9:00 AM to 3:00 PM Local Philadelphia Time without any extensions and all 480 auctioned prices will be opened and closed simultaneously.

DLA Troop Support uses this reverse auction tool: Procurex. The tool shall be accessed at this web address: <https://dla.procurexinc.com/>. Offerors shall receive a user account and training on this system prior to the reverse auction. If you have any questions during the on-line reverse auction please contact Peter LaVerghetta at 215-737-7502 or email peter.laverghetta@dla.mil.
