A. The following changes are being incorporated into subject solicitation:

B. Delete pages 6-8 and replace with the following. Changes identified with arrow in left margin.

1. Delete NSNs 7330-01-280-1311, 7310-01-508-4400, and 7310-01-374-2679 from Lot #16 Bunn-O-Matic.

2. Delete NSN 7310-00-528-0493 from Lot #19 Cleveland Range Inc.

3. Add NSN 7310-01-334-8434 to Lot #33 Grindmaster/Crathco Systems.

4. Delete NSN 7310-01-285-9652 from Lot# 33 IMI Cornelius.

C. The following points are being made for clarification purposes:

1. **Customer References:** Unless stated otherwise, it is assumed that the specific time frame used for past performance is 12 months prior to the date of RFP closing.

2. **Page 4 of 71:** The two day delivery requirements for the COMSUB Lot do not include the delivery time and transit to Pearl Harbor/OCONUS locations. SUBPAC has requested DSCP forward position 6 items listed in Lot #65 for Pearl Harbor. COMSUB has not expressed a concern for other OCONUS locations. At this time we have no indication that there are other delivery points required for COMSUB other than those listed on page 47 of the RFP.

3. **Page 27 of 71:** The list of hazardous materials should be included with each offeror's proposal. However, the actual Material Safety Data Sheets (MSDS) are only to be provided by the apparently successful offeror(s).

4. **Lot #65 COMSUB:** The cost for inventory that is required to be maintained is at the expense of the contractor and cannot be invoiced to the Government until delivery is made. The cost of inventory shall be contained in the contractor's overall unit price. If an offeror receives an award for Lot #65, the quantities monitored and accounted for shall be the responsibility of the contractor. It is the decision of the contractor on how to maintain the quantity required; for example, maintaining inventory at various warehousing locations in the U.S. to support various delivery locations is entirely up to the individual contractor. Incremental pricing for inventory is not permitted. Since inventory costs are a part of a contractor's unit price, payment for a stocking fee will be made upon invoicing of ordered and delivered product. Adjustments in inventory requirements will be made throughout the base and each option period. Every attempt will be made by DSCP and COMSUB to ensure that a zero balance exists by the end of the fourth option period. No guarantees can be made at this time as to what may happen if there is residual inventory at the end of the fourth option period.
