- (c) The adjusting market price shall be the arithmetic average of the prices of each applicable economic indicator only for the period specified under the "Adjusting Market Price" column shown in paragraph (b) immediately preceding the effective date of the adjustment.

"Base unit price" is the unit price for each contract line item, established at the later of these two dates: 1.) the closing date for receipt of proposals; or 2.) if applicable, the date required for receipt of final proposal revisions. This price is exclusive of any adjustment pursuant to this clause. After the first adjustment period, the base unit price for adjustments is the final adjusted

unit price at the end of the immediately preceding adjustment period, which shall include adjustments pursuant to this clause.

(d) An established market price is a price that is established in the course of ordinary and usual trade between buyers and sellers free to bargain and that can be substantiated by data from sources independent of the offeror(s); and the net price after applying any standard trade discounts offered by the contractor. The established market price under this clause may reflect industry-wide and/or geographically based market price fluctuations for commodity groups or specific supplies. The established market prices that shall be used for the chicken items subject to price adjustments under this clause, and the economic indicators and publications to be used are listed in paragraph (b) of this clause.

(e) "Adjustment period" is the amount of time, measured in months, during which the unit price for each contract line item must remain fixed.

1. The initial base unit price shall be the price for the first adjustment period.
2. The length of each adjustment period will be three months;
3. Unit Prices may only be adjusted for each adjustment period after the first adjustment period;
4. Unit Prices shall never change within any single adjustment period;
5. There shall be 4 adjustment periods per calendar year;
6. The length of each adjustment period, in months, shall be calculated by dividing 12 by the number of adjustments allowed per year pursuant to the fill-in in 5. above.

(f) "Adjusted Unit Price" is the adjusted price for each contract line item at the start of each new adjustment period.

(g) Adjustments shall be calculated as follows: (Round to four decimal places)

1. Compute the Adjusting Market Price and the Base Market Price.
2.  $(\text{Adjusting Market Price} - \text{Base Market Price}) / \text{Base Market Price} = \text{Market Price Change \% (+ or -)}$ .
3.  $\text{Market Price Change \%} \times \text{Base Unit Price} = \text{Base Unit Price Adjustment (+ or -)}$  for each item subject to EPA adjustment.
4. The Adjusted Unit Price(s) for each adjustment period shall be determined by increasing or decreasing (as appropriate) the Base Unit Price.

5. Determine the Contract Price Adjustment by computing the sum total of the price adjustments of all items subject to EPA.

(i) Price adjustments pursuant to this clause shall be made by contract modification showing the calculations used to derive the adjusted contract unit price.

(j) Payments: Payment for items pending adjustment under this clause shall be at the existing unadjusted contract unit price until an adjustment modification has been issued. Following issuance of an adjusting contract modification, the Government shall pay the Contractor, upon submission of proper invoices or vouchers, the adjusted price stated in the contract modification for the applicable adjustment period. The Contractor represents by submitting its final invoice that the total amount billed under this contract reflects all increases or decreases required or authorized by this clause.

(k) Any pricing actions pursuant to the Changes Clause or other provisions of the contract will be priced as though there were no provisions for economic price adjustment.

(l) No adjustment will be made under this clause unless the total change in the contract amount is \$500.00 or more.

(m) Upward ceiling on economic price adjustment: The total increase in any contract unit price shall not exceed 200% per annum of the original unit prices agreed to at time of award. There is no percentage limit on downward adjustments under this clause.

(n) Revision of market price indicator: In the event (i) any applicable market price indicator is discontinued or its method of derivation is altered substantially or (ii) the Contracting Officer determines that a particular market price indicator consistently and substantially no longer reflects market conditions, the parties shall mutually agree upon an appropriate and comparable substitute and the contract shall be modified to reflect such substitute effective on the date the indicator was discontinued, altered, or began to consistently and substantially fail to reflect market conditions.

(o) Disputes: If the parties fail to agree on an appropriate substitute market price indicator or implementation of other matters addressed by this EPA clause then the matter shall be resolved in accordance with the Disputes clause of the contract.

(q) Examination of records: The Contractor agrees that the Contracting Officer or designated representative shall have the right to examine the Contractor's books, records, documents, or other data the Contracting Officer deems necessary to verify Contractor adherence to the provisions of the clause.

(r) In the event any applicable market price indicator is not published for any day, that day will not be included in calculating the base market price or the adjusting market price as applicable. For instance, if within a three month period an indicator was expected to be published 39 times (3 times per week) but was not published 4 times, the average of the 35 published prices only will be calculated. When a range of prices is provided, for the purposes of the calculations the arithmetic average of the high and low number will be calculated to determine the indicator for that period.

(End of Clause)
