C. Unit packaging. Components shall be packaged in accordance with documents referenced in table I.

D. Intermediate packaging. Components may be intermediate packaged.

E. Packaging of Preparation Instructions. A copy of the appropriate Preparation Instructions, cited in Appendix A, shall be placed in every Box 1 of the corresponding meal.

D-2 LABELING

A. Components. Components shall be labeled in accordance with documents referenced in table I.

D-3 PACKING

A. Packing.

(1) UGR. Each complete menu shall be assembled into three boxes using the suggested loading sequence specified in table III. Because of the number of non-developmental components and the variety of packaging available, it may be necessary to move a product from one compartment to another where space is more available. Each box shall be constructed in accordance with style RSC of ASTM D 5118/5118M, Standard Practice for Fabrication of Fiberboard Shipping Boxes and figure 1, 2 and 3. The fiberboard shall conform to type CF, class D, variety SW, grade V3c of ASTM D 4727/D 4727M, Standard Specification for Corrugated and Solid Fiberboard Sheet Stock (Container Grade) and Cut Shapes. The inside dimensions of the box shall be 23-3/4 inches in length, 13-3/16 inches in width and 8-3/4 inches in depth. Each box shall be fitted with two V3c partitions in accordance with figures 1 and 3. Kraft paper as specified in A-A-203, Paper, Kraft, Untreated, shall be used to fill voids and immobilize menu components. Boxes shall be free from evidence of rodent or insect infestation. Boxes may be assembled by gluing or taping. Each container shall be sealed in accordance with methods B or C of ASTM D 1974, Standard Practice for Methods of Closing, Sealing, and Reinforcing Fiberboard Boxes.

(2) Partitions. The center panel of each partition shall meet at the center of the box to divide the box into two equal compartments (cell "A" and "B"). The end panels of the partitions shall butt together at each end of the box (see figure 1). The partitions shall be full depth partitions and fabricated according to figure 3.

D-4 UNITIZATION

A. Unit loads. Boxes shall be arranged in unit loads in accordance with Type I, Class A of DLA Troop Support Form 3507, Loads, Unit: Preparation of Semiperishable Items.

D-5 MARKING

A. Menu marking. The three boxes comprising one menu shall be positioned on the pallet side by side and marked in sequence so that the menu can be identified as one unit (two, three box menu units to a tier). Using either labels or stencils on the top panel, with characters at least 2 inches high, the boxes shall be identified as "BOX 1", "BOX 2", and "BOX 3". The characters shall be oriented so as to be readable when facing the marked end panel.

B. Shipping boxes and unit loads. Marking of shipping boxes and unit loads shall be as specified in DLA Troop Support Form 3556, Marking Instructions for Boxes, Sacks, and Unit Loads of Perishable and Semiperishable Subsistence. In addition, all unit loads

containing the same menu will be identified with large characters in a permanent contrasting color. Marking shall be as follows:

UGR- B™	“L/D” (LUNCH/DINNER)	and	MEAL
	or		NUMBER
	“B” (BREAKFAST)		“No. ____

SECTION E INSPECTION AND ACCEPTANCE

The following quality assurance criteria, utilizing ANSI/ASQ Z1.4, Sampling Procedures and Tables for Inspection by Attributes, are required. Unless otherwise specified, single sampling plans indicated in ANSI/ASQ Z1.4 will be utilized. When required, the manufacturer shall provide the Certificate(s) of Conformance (CoC) to the appropriate inspection activity. Certificate(s) of Conformance not provided shall be cause for rejection of the lot.

A. Definitions.

(1) Critical defect. A critical defect is a defect that judgment and experience indicate would result in hazardous or unsafe conditions for individuals using, maintaining, or depending on the item; or a defect that judgment and experience indicate is likely to prevent the performance of the major end item, i.e., the consumption of the ration.

(2) Major defect. A major defect is a defect, other than critical, that is likely to result in failure, or to reduce materially the usability of the unit of product for its intended purpose.

(3) Minor defect. A minor defect is a defect that is not likely to reduce materially the usability of the unit of product for its intended purpose, or is a departure from established standards having little bearing on the effective use or operation of the unit.

B. Conformance inspection. Conformance inspection shall include the examinations/tests and the methods of inspection cited in this section.

C. Packaging examination.

(1) Assembled menus examination. The assembled UGR menus shall be examined for the defects specified in table IV. The lot size shall be expressed in assembled menus (3 boxes per menu). The sample unit shall be one fully assembled menu. The inspection level shall be S-2 and the Acceptable Quality Level (AQL), expressed in terms of defects per hundred units shall be 2.5 for major defects and 4.0 for minor defects. Five assembled menus shall be randomly selected from the lot and examined for critical defects. The finding of a critical defect shall be cause for rejection of the lot.

TABLE IV. UGR– B™ assembled menus defects 1/

Category			Defect
<u>Critical</u>	<u>Major</u>	<u>Minor</u>	
1			Any food product leaking or damaged so as to expose contents.
	101		Component not clean. <u>2/</u>
	102		Box not as specified.
	103		Markings missing or incorrect or illegible.
	104		Box not closed as specified.
	105		Item missing.
		201	More than 5 percent of the quantity of any disposable is crushed or damaged so as to be unusable.
		202	Dunnage or box partitions not as specified.
		203	Intermediate bag has tear or open seam.

1/ Any evidence of rodent or insect infestation shall be cause for rejection of the lot.

2/ Outer packaging shall be free from foreign matter which is unwholesome, has the potential to cause package damage (i.e. glass, metal filings, etc.), or generally detracts for the clean appearance of the components package. The following examples shall not be scored as defects for unclean:

a. Foreign matter which presents no health hazard or potential package damage and which can be readily removed by gently shaking the package or by gently brushing the package with a clean cloth.

b. Water spots.

c. Very thin grease, oil, or product residue that is discernible by touch, but is not readily discernible by visual examination.

(2) Unit load examination. The unit load shall be examined in accordance with the requirements of DLA Troop Support Form 3507. Any nonconformance shall be classified as a major defect.
