

CHAPTER 35

SYSTEM SUPPLY CONTROL MATRIX

SECTION I - GENERAL

235101 - PURPOSE

By stratifying of assets against requirements, supply shortages and overages are ascertained. In addition, commitment and obligation requirements are ascertained for replenishment demand items. These data are used to develop desired outputs, such as Supply Control Studies (appendices F-167, F-168 or F-170), Stratification Work Sheets, and Item Procurement Programs. The outputs are used to determine the need to cancel outstanding procurement, initiate disposal actions, etc.

235102 - SCOPE

The concept of a System Supply Control Matrix (SSCM) Table, appendix D-123, is employed for replenishment demand type items (Item Category Codes 1 and P, appendix A-87) whenever a requirements/assets comparison is required. Its concepts are employed in the stratification process and in the preparation of Supply Control Studies (chapters 31 and 34). The concept of a Numeric Stockage Objective Matrix (NSOM) Table, appendix D-123, is employed for Numeric Stockage Objective type items (Item Category Codes 2 and B, appendix A-87) as required. The SSCM stratifies assets against requirements to ascertain supply shortages, overages, commitments and obligations. The NSOM stratifies assets against requirements to ascertain supply shortages and overages. These data are available for use as reflected in paragraph 235101 above.

235103 - BACKGROUND

A Matrix Table as defined in appendix D-123 is not an end product in itself, but rather constitutes an intermediate step in the attainment of end products. For this reason, it is not intended that any Matrix Table be printed, but merely that the data developed therein be utilized in the preparation of outputs as indicated in paragraph 235101 above.

SECTION II - SYSTEM SUPPLY CONTROL MATRIX (SSCM) TABLE

235201 - COMPOSITION AND PREPARATION OF SSCM TABLE

The Composition and Preparation of the SSCM Table is explained and depicted in appendix D-123.

SECTION III - NUMERIC STOCKAGE OBJECTIVE MATRIX (NSOM) TABLE

235301 - COMPOSITION AND PREPARATION OF NSOM TABLE

The Composition and Preparation of the NSOM Table is explained and depicted in appendix D-123.
