

DLAM 4140.2
VOL II, PART 1

DSIO-MS

April 1, 2002

FOREWORD

(Supplementation is permitted by Defense Supply Centers.)

This volume prescribes standard internal Defense Supply Center (DSC) Operating Procedures for determination of requirements, asset management, and inventory accounting of materiel on a centralized basis. Volume II is published in three parts as follows:

Part 1 - Chapters, Appendices C and G.

Part 2 - Appendix D - The D and related appendices are no longer maintained. References to the D Appendices will remain in other parts of the manual until time allows for removal on a case-by-case basis.

Part 3 - Appendices A, B, E, and F.

Part 1 contains the procedural chapters, which are general narrative descriptions of the policies, criteria, and guidelines of one or more related functional areas; Appendix C, which may depict a printed form, form letter, other formats not included in another appendix, or standard miscellaneous instructions which cross functional areas; and Appendix G, which furnishes standard definitions and abbreviations.

This revision contains the latest procedural changes caused by implementation of various System Change Requests (SCRs) to the Standard Automated Materiel Management System (SAMMS) and incorporates them in the April 2002 publication of the Defense Logistics Agency Publications System (DLAPS), as follows:

SCR USDH00-007R1, End-to-End Supply Chain Management, expands the existing capabilities for forward stock positioning. The new capabilities include on-line scheduling of processing cycles, support for non-stocked items, additional table-driven control parameters, revision of data submission techniques and output of statistical data for user review.

Changes are indicated by bold/italicized type.

Users of this publication are encouraged to submit recommended changes and comments, through channels, to the Defense Logistics Agency (DLA) Systems Integration Office ATTN: DSIO-MS, P.O. Box 182242, Columbus, OH 43218-2242.

BRUCE A. JARVIS
Director, DSIO-MS
