

APPENDIX C-143

SUPPLY STATUS CODE (SSC)/ACQUISITION ADVICE CODE (AAC)/
SOURCE OF SUPPLY (SOS) COMPATIBILITY TABLES

1. Maintenance of SSC applicable to an NSN will require input of an appropriate AAC to the segment H of the Total Item Record (TIR). The appropriate AAC/SSC relationships are listed below with the appropriate SOS. Acceptance by DLSC of the AAC change to the segment H results in a mechanical updating of the SSC.

2. Computer edit and validation criteria established for CMD maintenance requires that the three elements be compatible, i.e., specific combinations of AAC/SOS based upon submitted or recorded SSC. The following table outlines acceptable combinations.
