

APPENDIX A-11

PROJECT CODES

1. Number of characters: Three.
2. Type of code: Alpha/Numeric.
3. Source: MILSTRIP.
4. Field Positions: 57-59.
5. Explanation: DLA-HQ is the DLA focal point for control and monitoring of DoD Military Service, Federal Agency and DLA Project Code data. As the focal point, DLA-HQ is responsible for determining and disseminating Project Code data affecting requisition processing to DLA field activities for action. In addition, DLA-HQ is the repository for all inter and intraservice/agency Project Code data provided DLA either for action or information. To insure accuracy and update of the Project Code repository, Project Code data received/established by addressees should be coordinated with DLA-HQ.

a. Project codes are used for the purpose of distinguishing requisitions and related documentation and shipments, as well as for the accumulation of intra-Service performance and cost data related to exercises, maneuvers and other distinct programs, projects, and operations. The project code will be entered in pos. 57-59. If no project code is applicable, pos. 57-59 will be left blank.

b. Project Codes, other than Office of the Secretary of Defense (OSD)/Joint Chiefs of Staff (JCS) assigned codes, do not provide nor imply any priority or precedence for requisition processing or supply decisions. Project codes are not related to priority in any respect and, when used, do not alter nor override the priority assigned to a requisition or shipment. Requisitions containing project codes and shipments related thereto will be processed strictly in accordance with the assigned priority designator as prescribed in the Uniform Materiel Movement and Issue Priority System and implied/requested preferential treatment to the contrary will be disregarded.

c. Project codes will be perpetuated in all related documentation and will appear as a part of shipping container markings. Recognition of project codes by suppliers in another Service/Agency and the resultant special handling afforded requisitions and shipments will be limited to:

(1) Shipment Consolidation. Criteria for consolidation of Project Code materiel is published in DoD 4500.32-R, MILSTAMP.

(2) Container Marking. Shipments will be marked as prescribed in MIL-STD-129H.

(3) Shipment Release/Movement Control. At the time of project announcement for contingencies and similar rapid response situations, the initiating Service/Agency will provide the instructions as to procedures to be followed on requisitions which must arrive at destinations within specified time periods.

d. Project codes are categorized into four groups and the authority to assign project codes varies by category. The following paragraphs provide the definitions of each category of project codes and identify the Services/Agencies which are authorized to assign each category of project code.

(1) Category A. For use when no meaning of the code will be perpetuated outside the originating Service/Agency. The code will be perpetuated in all related documentation and will appear as a part of the shipping container markings. Project codes in Category A may be assigned by those Services/Agencies identified in appendix A-5 or A-20 by a distinct Service/Agency Code, FEDSTRIP Civil Agency Code, and by those Agencies using the multiused Service/Agency Code H.

(2) Category B. For use when recognition and exceptional processing actions have been prearranged between party Services/Agencies. Category B project codes will be announced only to participating Services/Agencies, in the format provided below. Assignment authority is the same as for Category A. DLMSO will be included as an information addressee for review of compliance with established DoD policy.

(3) Category C. (3/alpha/alpha.) Assigned by the DoD MILSTRIP System Administrator for common purpose use by all or specified Services/Agencies. Dissemination of Category C project codes will be by approved, interim and/or formal MILSTRIP changes preceded by letter or message to the designated Category C project code contact points.

(a) Assignment of Category C project codes may be requested by OSD/JCS or by Services/Agencies. Service/Agency requests will be forwarded to the DoD MILSTRIP System Administrator by the designated Service/Agency Category C project code contact points. Such requests will:

1. Include a statement of the intended use.
2. Indicate the Services/Agencies which will be involved (including designation of applicable Service/Agency Code).
3. Provide the effective date and termination date of the code.

(b) The following special assignments are in effect.

1. Project Codes JZC, JZM and JZO are designated Category C and are authorized exceptions to the normal Category C 3/alpha/alpha structure.

2. Project Codes in the 3E\_ series are reserved for assignment for mobilization exercises.

3. Project Codes in the 3R\_ series are reserved for assignment for Rapid Deployment Force (RDF) support.

(4) Category D. Office of the Secretary of Defense (OSD)/Joint Chiefs of Staff (JCS) Project Codes. Requisitions and materiel releases with Category D Project Codes will be ranked above all other requisitions with the same priority designators for processing purposes. All Category D Project Codes are in the 9\_ series. The following definitions of specific series apply:

(a) 9/numeric/numeric -Reserved for assignment by OSD. Specific use of the code is to be determined by OSD. Such codes will be monitored by OASD (A&L) in coordination with the MILSTRIP System Administrator.

(b) 9/numeric/alpha - Identifies allocation at the level of the Joint Chiefs of Staff of significant materiel or equipment items that are on-hand or are becoming available for issue when resources are not sufficient to meet all requirements.

(c) 9/alpha/numeric - Identifies the establishment and subsequent release, at the level of the Joint Chiefs of Staff, of emergency, reserve or specified purpose stocks which are on-hand or are becoming available.

(d) 9/alpha/alpha - Identifies support provided to a program, project, force, activity or for other designated purposes.

1. Dissemination - Initial dissemination of Category D Project Codes will be accomplished in three phases, as follows:

a. OSD/JCS letter or message to Service/Agency Headquarters and to the DoD MILSTRIP System Administrator.

b. DoD MILSTRIP System Administrator letter or message to the designated S/A Category D Project Code contact points.

c. Category D Project Code contact point letter or message to all involved S/A activities. Following the initial dissemination of Category D Project Code assignments through the letter/message technique described above, all Category D Codes will be published as part of this appendix unless prohibited by security classification or by code termination dates which occur prior to the next scheduled formal change.

## 2. Assignment Constraints

a. OSD Project Codes shall be assigned only to projects and programs clearly of direct interest to the Secretary of Defense. Authorization for use of OSD Project Code(s) will be for a specified period of time.

b. JCS Project Codes shall be assigned only to projects and programs clearly of direct interest to the JCS acting on behalf of the Secretary of Defense. Authorization for use of a JCS Project Code shall be for a specified period of time, and the FAD(s) to be used in conjunction with the JCS Project Code should be designated in the authorization.

### 3. Assignment Requests

a. S/A requesters of Project Codes will provide Service Code(s), Use/References, Monitor/Coordinator, Effective Date, and Termination Date. This information is necessary to produce the Project Code announcement required by paragraph 5 above.

b. Requests for assignment of OSD Project Code(s) will be submitted to the OASD (P&L). An information copy of the request will be provided to the DoD MILSTRIP System Administrator. The DoD MILSTRIP System Administrator will assign the appropriate Project Code upon approval of the request by the OASD (P&L).

c. Requests for assignment of JCS Project Code(s) will be submitted to the Joint Materiel Priorities and Allocations Board, an agency of the JCS, through the offices listed below:

- (1) Service Headquarters
- (2) Unified or Specified Command Headquarters
- (3) JCS
- (4) OSD

e. Announcements of project code assignments will be in accordance with the procedures and conditions specified in paragraph d above and will provide the information listed below:

<u>TITLE</u>	<u>EXPLANATION</u>
Service Code(s)	All or specified Service/Agency code(s) which will be used in conjunction with the project code.
Project Code	Codes assigned in accordance with the provisions of this manual.
Use/References	Use - Clear text statement defining the intended use of the code and indicating those to whom it applies (unless the use is classified). Also, if applicable, an abbreviated project name should be provided.  References - Interservice/Agency agreements and other documents establishing/specifying special controls for the project. The Service/Agency establishing the project is responsible for ensuring that suppliers are provided copies of these documents, if not

TITLE

EXPLANATION

available on an interservice/Agency basis. If a joint regulation is cited, all Service/Agency numbers will be included in the Project Code announcement. An assembly point for shipment may be designated in this column by use of the DoDAAC for the assembly point. The DoDAAC of the assembly point will be entered in requisitions by requisitioners as the ship to address. Shipping activities are not required to use Project Code announcement to determine the ship to address unless interservice/Agency agreements are negotiated for special routing of shipments. Only one assembly point per Project Code may be assigned.

Monitor/Coordinator

Identity of the activity within the Service/Agency or OSD/JCS which is monitoring or coordinating the project, point of contact and telephone number (AUTOVON, FTS/commercial).

Effective Date

Date when supply sources will commence required action relative to the code.

Termination Date

Date when code will be discontinued. The term continuing is permitted only for Category C Project Codes. A specific termination date must be provided for Category A, B, and D

Codes.

When the term continuing is used for a Category C Code, the Service/Agency or OSD/JCS sponsor of the code will notify the DoD MILSTRIP System Administrator when the code is no longer required.

If the termination date is not known at the time of Project Code announcement, a date one after the effective date will be entered. The Service/Agency or OSD/JCS sponsor may extend this date any time within the 1-year period if appropriate.

Sponsors will also request cancellation of Project Codes prior to the termination date when appropriate. When a specified termination date is reached, interservice/Agency recognition of the code will stop and Category C and D Project Codes will be deleted from this appendix. Unfilled requisitions which have not been canceled containing a deleted Project Code (Category B, C or D) will be processed in the same manner that requisitions with Category A Project Codes are processed.

f. Service/Agency MILSTRIP Project Code Contact Points

<u>SERVICE/ AGENCY</u>	<u>MAILING ADDRESS</u>	<u>MESSAGE ADDRESS</u>	<u>CODE CATEGORY</u>

Category C Project Codes

<u>PROJECT CODE</u>	<u>DURATION</u>	<u>USE/REFERENCES</u>	<u>MONITOR/COORDINATOR</u>
<u>3AA</u> Service Codes: All except B,D,K,P, and T	13 Oct 76 to Continuing	Used by Service activities to identify requisitions submitted to obtain issues to satisfy Prepositioned War Reserve Materiel stock deficiencies. Project code may be entered in either funded or unfunded requisitions.	
<u>3AB</u> Service Codes: All except B,D,K,P, and T	1 Dec 77 to Continuing	Used for materiel shipments to a designated repair activity for repair and return or shipment as otherwise directed under a Depot Maintenance Inter-Service Support Agreement (DMISA).	
<u>3AC</u> Service Codes: All except B,D,K,P, and T	1 Dec 77 to Continuing	Used for materiel returns to the primary inventory control activity under a Wholesale Inter-Service Supply Support Agreement (WISSA) or when the items are Nonconsumable Item Material Support Codes (NIMSC) 5 or 6.	
<u>3AD</u> Service Codes: All	19 Mar 79 to Continuing	Used to identify requisitions and related documents pertaining to AUTODIN and DSTE assets within the logistics system.	
<u>3AL</u> Service Codes: All	1 May 84 to Continuing	Identifies automatic return of unserviceable (Supply Condition Code E or F) NIMSC 5 item for which a replacement will be requisitioned. Must appear on return documentation (DI Code FTA) and shipping documentation (DD Form 1348-1).	

<u>PROJECT CODE</u>	<u>DURATION</u>	<u>USE/REFERENCES</u>	<u>MONITOR/COORDINATOR</u>
<u>3AN</u> Service Codes F and N only	1 Aug 80 to 1 Aug 86	To identify requisitions and related documents in support of depot level repair of the AN/WSN-2 inertial navigation system.	
<u>3AR</u> Service Codes: All	13 Oct 82 to Continuing	To identify Armed Forces Radio and Television Service (AFRTS) tri-service requirements and facilitate logistics support to worldwide AFRTS outlets.	
<u>3DS</u> Service Codes: All	1 May 82 to Continuing	Used to identify requisitions and related documents pertaining to The Department of Defense Dependent Schools (DoDDS). Project Code 3DS is to be included in all requisitions placed by host activity base supply facilities for support of DoDDS and is to be perpetuated in all subsequent documents and labels.	
<u>3LN</u> Service Codes: All	21 May 82 to Continuing	Used to identify requirements and related documents pertaining to support of United Nations Interim Forces in Lebanon (UNIFIL).	
<u>3LP</u> Service Codes: All	21 May 82 to Continuing	Used to identify requirements and related documents pertaining to support of United Nations Disengagement Observer Forces (UNDOF).	
<u>3LQ</u> Service Codes: All	21 May 82 to Continuing	Used to identify requirements and related documents pertaining to support of United Nations Truce Supervision Organization in Palestine (UNTSO).	
<u>3LU</u> Service Codes: All	21 May 82 to Continuing	Used to identify requirements and related documents pertaining to support of United Nations Peacekeeping Forces.	
<u>3ML</u> Service Codes: All	1 Nov 83 Continuing	Used to identify requisitions and documentation in support of the Multinational Peacekeeping Force in Lebanon.	

<u>PROJECT CODE</u>	<u>DURATION</u>	<u>USE/REFERENCES</u>	<u>MONITOR/COORDINATOR</u>
<u>3PL</u> Service Codes: All	10 Aug 79 to 31 Dec 85	Used to identify requisitions and related documents pertaining to the Position Location Reporting System. Items for this system are being procured on a contract awarded to Hughes Aircraft Company under Contract No. DAAB07-76-C-175a. The Project Code is to be utilized in developmental production programs and initial fielding of these items along with ancillary items and repair parts to recipients in CONUS and ex-CONUS.	
<u>3PR</u>	1 Nov 89 to Continuing	Used to identify replenishment PWRMS requisitions. It is also used to identify excess PWRMS transactions.	
<u>3QQ</u>	1 Nov 83 Continuing	Item is excess to requirements as a result of pending installation closure. Item has been identified on the preliminary list of related personal property to be transferred to the local community at the time of installation closure in accordance with the provisions of DoDD 5410.12. Do not direct return to stock unless the item is required to meet an Approved Force Acquisition Objective (AFAO) and/or approved Prepositioned War Reserve Requirements (PWRR).	
<u>3RD</u> Service Codes: All	1 Apr 80 to Continuing	Used to identify all MILSTRIP documentation related to the Rapid Deployment Force (RDF). This code will facilitate the monitoring of all supply and transportation actions related to the RDF in contingencies and similar rapid response	
<u>3RE</u> Service Codes: All	15 Oct 81 to Continuing	To identify all MILSTRIP documentation relating to deployed Rapid Deployment Force (RDF) units. This code will aid the monitoring of all supply and transportation actions related to deployed RDF units in rapid response situations.	
<u>3RF</u> Service Codes: All	15 Oct 81 to Continuing	To identify all MILSTRIP documentation relating to Initial Preplanned Supply Support (IPSS) in support of deployed RDF units. This code will aid the monitoring of all supply and transportation	

<u>PROJECT CODE</u>	<u>DURATION</u>	<u>USE/REFERENCES</u>	<u>MONITOR/COORDINATOR</u>
		actions related to deployed RDF units in rapid response situations.	
<u>3RG</u> Service Codes: All	18 Dec 81 to Continuing	Used to identify all MILSTRIP documentation relating Initial Preplanned Supply Support (IPSS) for the RDF. This code identifies a requisition that is to be processed for surface transportation by the CCP.	
<u>JZC</u> Service Codes: All except B,D,K,P, and T	1 Jul 76 to Continuing	Used by overseas Service activities to designate part numbered or decentralized requisitions (nonstocked) in support of overseas located Commercial Construction Equipment (CCE).	
<u>JZM</u> Service Codes: All except B,D,K,P, and T	1 Jul 76 to Continuing	Used by overseas Service activities to designate part numbered or decentralized (nonstocked) NSN requisitions in support of overseas located Materiels Handling Equipment(MHE).	
<u>JZO</u> Service Codes: All except B,D,K,P, and T	1 Jul 76 to Continuing	Used by overseas Service activities to designate part numbered or decentralized (nonstocked) NSN requisitions in support of overseas located commercially designed wheeled vehicles.	

Category D (OSD/JCS) Project Codes

<u>PROJECT CODE</u>	<u>DURATION</u>	<u>USE/REFERENCES</u>	<u>MONITOR/COORDINATOR</u>
<u>9AH</u>	23 Mar 84 to TBA	POST AHUAS TARA II	CPT. Troy D. Williams, USA AFLG-P00 AV 588-2293/2052
<u>9AI</u>	17 Mar 84 to TBA	EAGLE LOOK	USCENTOM-J4

<u>9XX</u>	2 Oct 80 to 30 Sep 86	ELF ONE	Office of the Joint Chiefs of Staff, POC CDR Paul Ward, USN Tel. AV 227-0510
<u>922</u>	6 Sep 84 to TBA	Project BGE/SGF	USAEMRA-SALEM Mr. Bill McCotter AV 249-6202
<u>931</u>	1 Mar 85 to TBA	Roiling Water	NA
<u>932</u>	1 Mar 85 to TBA	Ordeal Lancer	NA

NOTE: Category D Project codes apply to any Service/Agency Code authorized by OSD/JCS.

6. Project Codes will be established for use by DSC on request to HQ DLA.

7. Specific Project Codes have been assigned for use by all DSCs when the identity of a specified project or specific computer processing is required, to assure that the correct MILSTRAP DIC is posted or to link stocks set aside on the record for specific uses. These Project Codes will be used in conjunction with the Project Code Reference Table Action Codes listed in appendix A-121 and will not be duplicated. These specific Project Codes are:

<u>PROJECT CODE</u>	<u>PROJECT</u>
2GA	Repair/Test: DLA Maintenance Facility. Return to stock expected.
2GB	Assembly, Disassembly, Alteration, Conversion, or Modification by a DLA Maintenance Facility.
2GD	Set Assembly Standard System: Assets recovered from Disassembly which are available for Assembly.
2GE	Set Assembly Standard System: Assets recovered from Data Base changes/Restructure which are available for Assembly.
2G1	Issue to Foreign Governments.
2G2	Issue to State Governments.
2G3	Issue to municipalities.
2G4	Issue to private parties.
2G5	Issue to nonappropriated activities.
2G6	Loan of stock fund property to other than Services.
2G8	GFM: Government manufacturing facilities.
2G7	GFM: For manufacture commercial contractor.
2G9	Issue of non-DSC-managed materiel for the alteration, conversion, or modification of a set, kit, or assembly to other than DLA maintenance facility.
2G0	Issue of DSC-managed items for the alteration, conversion, or modification, of a set, kit, or assembly to other than DLA maintenance facility.
3AA	Prepositioned War Reserve document.
3G1	Repair: Commercial contractor.
3G2	Repair: Other than a DLA maintenance facility.
3G3	Issue for testing and as samples to other than DLA maintenance facility. Return to stock is expected.
3G4	Issue for testing and samples to be consumed. Item will not be returned to stock.
3G5	GFM: For alteration, conversion, and modification by other than a DLA maintenance facility.

<u>PROJECT CODE</u>	<u>PROJECT</u>
3G6	GFM: For repair - Commercial.
3G7	GFM: For repair - Government.
3G8	GLP: Government loaned property not consumed in the manufacture of end items.
3G9	Return of nonmanaged components to SOS for credit.
3G0	Return of nonmanaged components to SOS without credit.
4G1	Issue of set assembly for disassembly to other than a DLA maintenance facility.
HSI	Homeless Support Initiative. To identify requisitions and related documents. Project monitor is ESOC Chief.
MPS	Marine Corps Maritime Prepositioned Ships. To identify requisitions and related documents pertaining to MPS for which materiel requested has a Shelf-Life Code (Appendix A-47) of 36 months or longer, Management Code I is assigned to the MRO.
SDI	Secretary of Defense Initiative. To identify requisitions and related documents pertaining to taskings initiated by the Office of the Secretary of Defense. Requisitions citing this project code will be executed as issues without reimbursement and will be handled as priority 01 requisitions. Project monitor is ESOC Chief.
WHA	Director Humanitarian Assistance. To identify requisitions and related documents pertaining to taskings initiated by the Director of Humanitarian Assistance. Requisitions citing this project code will be authorized to draw DRMO assets following DoD screening with Priority 03 status but are not entitled to DRMO shipping without separate specific approval from DLA HQ. Project monitor is DEPMEDS.
WHI	White House Initiative. To identify requisitions and related documents pertaining to taskings initiated by the white house. Requisitions citing this project code will be issues without reimbursement and will be handled as priority 01 requisitions. Project monitor is ESOC Chief.

8. In addition to the above specific Project Codes within the DLA Project Code Assignment, the following codes will be used to identify materiel redistributed as indicated:

PROJECT  
CODE

PROJECT

1R2	Bulk redistribution of DLA materiel from attrition sites to DLA depots.
1R5	Military-owned assets (commingled) which are utilized by the DSC and credit is provided the Service (FTE Process).
1R6	Exchanged of outdated Serum Albumin with contractor (DPSC-Medical).
1R7	Redistribution order to SSP Norfolk, VA and/or Oakland, CA - Level A packaging required.

9. The below listed project code is unique to DLA processes.

PROJECT  
CODE

PROJECT

FLIS	When this Project Code is loaded to the Project Code Table, all requisitions which result in a FLIS Interface Document, DIC YA2 or YAV, will be bypassed and the requisitions automatically forwarded for direct delivery purchase action.
