

APPENDIX A-16

SUPPLY CONDITION CODES

1. Number of characters: One.
2. Type of code: Alphabetic.
3. Source: DoD 4140.22-M, MILSTRAP.
4. Explanation: Classify materiel in terms of readiness for issue and use or to identify action underway to change the status of materiel. When materiel is determined to be in excess of approved stock levels and/or no longer serviceable, Condition Codes A through H and S will be utilized to reflect materiel condition prior to turn-in to the DRMO. Also the Supply Condition Code will be entered in pos. 71 of Interservice Supply Support Procedures (ISSP) requisitions. ISSP requisitions are identified by the appropriate code entry in pos. 40. Appendix F-148 summarizes assets and dollar values with Supply Condition Codes A through S owned by DLA and other services.
5. FIELD POSITION: 71/Block P.

<u>CODE</u>	<u>TITLE</u>	<u>DEFINITION</u>
A	SERVICEABLE (ISSUABLE WITHOUT QUALIFICATION)	New, used, repaired or reconditioned materiel which is serviceable and issuable to all customers without limitation or restriction. Includes materiel with more than six months shelf-life remaining.
B	SERVICEABLE (ISSUABLE WITH QUALIFICATION)	New, used, repaired, or reconditioned materiel which is serviceable and issuable for its intended purpose but which is restricted from issue to specific units, activities, or geographical areas by reason of its limited usefulness or short service life expectancy. Includes materiel with three through six months shelf-life remaining.

<u>CODE</u>	<u>TITLE</u>	<u>DEFINITION</u>
C	SERVICEABLE (PRIORITY ISSUE)	Items which are serviceable and issuable to selected customers, but which must be issued before Condition A and B materiel to avoid loss as a usable asset. Includes materiel with less than three months shelf-life remaining. (DSCP C&T only, Short Pieces of material).
D	SERVICEABLE (TEST/MODIFICATION)	Serviceable materiel which requires test, alteration, modification, technical data marking, conversion, or disassembly. This does not include items which must be inspected or tested immediately prior to issue.
E	UNSERVICEABLE (LIMITED RESTORATION)	Materiel which involves only limited expense or effort to restore to serviceable condition and which is accomplished in the storage activity where the stock is located.
F	UNSERVICEABLE (REPARABLE)	Economically repairable materiel which requires repair, overhaul, or reconditioning includes repairable items which are radioactively contaminated.
G	UNSERVICEABLE (INCOMPLETE)	Materiel requiring additional parts or components to complete the end item prior to issue.
H	UNSERVICEABLE	Materiel which has been determined to be unserviceable and does not meet repair criteria; includes condemned items which are radioactively contaminated (see note 2); Type I shelf-life materiel that has passed the expiration date; and Type II shelf-life materiel that has passed expiration date and cannot be extended. See note 1.

<u>CODE</u>	<u>TITLE</u>	<u>DEFINITION</u>
I	NOT ASSIGNED	Reserved for future assignment by DoD.
J	SUSPENDED (IN STOCK)	Materiel in stock which has been suspended from issue pending condition classification or analysis, where the true condition is not known. Includes shelf-life Type II materiel that has reached the expiration date pending inspection, test, or restoration. See note 1.
K	SUSPENDED (RETURNS)	Materiel returned from customers or users and awaiting condition classification.
L	SUSPENDED (LITIGATION)	Materiel held pending litigation or negotiation with contractors or common carriers.
M	SUSPENDED (IN WORK)	Materiel identified on inventory control record but which has been turned over to a maintenance facility or contractor for processing.
N	SUSPENDED (AMMUNITION SUITABLE FOR EMERGENCY COMBAT USE ONLY)	Ammunition stocks suspended from issue except for emergency combat use. (Code N not used by DLA.)
O	NOT ASSIGNED	Reserved for future assignment by DoD.
P	UNSERVICEABLE (RECLAMATION)	Materiel determined to be unserviceable, uneconomically repairable as a result of physical inspection, teardown or engineering decision. Item contains serviceable components or assemblies to be reclaimed. (Code P not used by DLA.)
Q	SUSPENDED (QUALITY DEFICIENT EXHIBITS)	Quality deficient exhibits returned by customers/users as directed by the IMM due to users as directed by the IMM due to technical deficiencies

<u>CODE</u>	<u>TITLE</u>	<u>DEFINITION</u>
		reported by Quality Deficiency Report. Exhibit requires technical engineering analysis to determine cause of failure to perform in accordance with specifications. This code is for intra-Air Force use only.
R	SUSPENDED (RECLAIMED ITEMS, AWAITING CONDITION DETERMINATION)	Assets turned in by reclamation activities which do not have the capability (e.g. skills, manpower, or test equipment) to determine the materiel condition. Actual condition will be determined prior to induction into maintenance activities for repair /modification. (Code R not used by DLA.)
S	UNSERVICEABLE (SCRAP)	Materiel that has no value except for its basic materiel content. No stock will be recorded as on-hand in Condition Code S. This code is used only on transactions involving shipments to DRMOs. Materiel will not be transferred to Condition Code S prior to turn-in to RMOs if materiel is recorded in Condition Code A through H at the time materiel is determined excess. Materiel identified by NSN will not be identified by this Condition Code.
T-Z	NOT ASSIGNED	Reserved for future assignment by DoD.

6. Reference: Appendix F-148, Weekly Condition Code Summary.

NOTE 1: Refer to DoD Instruction 4140.27 for serviceability timeframes associated with shelf-life items. Condition Codes J through P will not be used for materiel turn-ins to the DRMO.

NOTE 2: Classify obsolete and excess materiel to its proper condition before consigning to the DRMO. Do not classify materiel in Supply Condition Code H unless it is truly unserviceable and does not meet repair criteria.
