

APPENDIX A-65

TYPE OF ITEM CODES (TICs)

1. Number of character: One.
2. Type of code: Alpha.
3. Explanation: The purpose of this code in the NIR is to have the capability to identify NSNs within various special programs for reporting purposes.
4. Source: This code is maintained in the NIR via the Item Management Data Change Document, DIC ZJM, appendix B-142.
5. The following codes are assigned:

<u>CODE</u>	<u>DEFINITION</u>
A	Capital Equipment
B	Battle Dress
C	Chemical Protective
D	Bulk Item
E	Blank Flag (DPSC-C&T only)
J	COPAD Item
K	To identify items of supply with assets located at Navy SSPs that are to be redistributed.
N	To identify items of supply with assets only located at Navy SSPs that are to be redistributed.
P	Nonprocurable. Item is no longer produced by any known source and attempts to obtain item have failed. NOTE: This code should be input only upon notification from Technical/Contracting that the item is nonprocurable.
R	To identify items that are supplied from contractors' inventory, under specified contract conditions that result in these supplies being issued by the contractor as if they were being issued by a DoD depot; that is, shipped upon receipt of an order from on-hand contractor inventories.
S	NSN requiring Certified Sample.
X	No type of Item Code - Remove the current code.
