

APPENDIX A-81

NATIONAL INVENTORY RECORD LEVEL INHIBITOR CODES

1. Number of characters: One.
2. Type of code: Numeric.
3. Explanation: This code is used to indicate whether or not one established UMMIPS Control Level, Maximum Release Quantity, or Minimum Order Quantity should be bypassed in requisition processing; and whether these levels should be computed mechanically or manually.
4. Source: These codes and related manually computed levels are recorded in the NIR with an Item Management Data Change Document, DIC ZJM.

5. The following codes are assigned:

<u>CODE</u>	<u>EXPLANATION</u>
*0	Mechanically compute and use in requisition processing.
1	Manually compute and use in requisition processing.
*2	Mechanically compute and bypass in requisition processing.
3	Manually compute and bypass in requisition processing.
*Not used with Minimum Order Quantity.
