

APPENDIX A-90

MANAGER NOTIFICATION INFORMATION CODES

1. Number of characters: One.
2. Type of code: Alphanumeric.
3. Explanation: Provide a means to identify the reason mechanical action cannot be completed. These codes involve Manager Review, Manager Directed, and Manager Forced actions. Mechanical output will be identified by DIC ZLL IAW appendix B-127 or DIC ZLM IAW appendix B-151. Processing of those type documents, output, and reentry, will be accomplished as outlined in appendices E-127 P and E-127 V.

CODE DEFINITION

- A Request for Obsolete Item - To advise DSO of the following conditions:
- a. Request is for a SSC 6 or FSSC 6 item for which no assets are available on the requested item and the requisition does not cite Advice Codes 2C, 2J, 22, 31, 32 or 33; or
 - b. Requisition is for a SSC 6 or FSSC 6 item and contains Advice Code 2B, 24 or 26 with no available assets on-hand against the requested item and there is an I&S NSN recorded in the NIR.
 - c. Requisition is for a SSC 6 or FSSC 6 item and contains Advice Code 2F or 25 with no assets on hand against the requested item and there is an I&S NSN recorded in the NIR.
- B Output to DSO for Manager Review for one of the following conditions:
- a. Insufficient assets are available on the requested NSN which is recorded in the NIR with Key Code DL and the UI cannot be converted.
 - b. Item requested is coded in the NIR with a Manager Review Code B or D or the IM directed output as a result of processing initial input document with a MFDAC D in pos. 77.
 - c. The FEDSTRIP - FSC Support Table (appendix F-142) indicates that the FSC requisitioned is not authorized for supply to the FEDSTRIP activity reflected in pos. 30-31.
 - d. A FEDSTRIP requisition has been received for a DPSC - C&T item that has a Manager Review Code F entered in the NIR NSN restricted for automatic issue to a Federal Civil Agency.

CODEDEFINITION

- e. To advise the DSO that mechanical substitution of an NSN in an I&S family cannot be accomplished because the unit of issue on the NSN ordered and the unit of issue on the substitute NSN are different and both are not in the Definitive Unit of Issue Conversion Table.
- f. Requisition has been received for a controlled/regulated item based upon information contained in Selective Edit Control Table and is not authorized for automatic issue prior to Manager Review.
- g. To advise DSO that a requisition has been reinstated (MRQ check has been bypassed).
- C Quantity Requested Exceeds MRQ for: Provisioning Requests (Demand Code P) for quantities in excess of the established MRQ indicated in the NIR; or requisitions with Priority 01 or 02-08 which contain an N or 9 in pos. 62; or the requisition cites a linear UI and Advice Code 2N, 2P, or 28 and the total quantity is not available from one location; or requisition contains Advice Codes 2L, 21, 22, 23, 26, 27, 28, or 33; or funded requisition contains Project Code 3AA.
- D FMS requisition less than 330 days old containing priority 01-03 and N in pos. 62 is output for manual review.
- E Manager Review Reentry Document, DIC ZLL, has been reinput and represents a requisition type document which contains D or M Signal Code (pos. 51) or Advice Code 2E (pos. 65-66) and:
- a. Contains Project Code 3AA or another project code authorized for free issue but directs the transaction into backorder (BB) or direct delivery (BV) status (e.g., contains Manager Forced/Directed Action Code BV, HV, HD, BB, HC, or HB in pos. 69-70. See appendix A- 86.)
- b. Contains Advice Code 2C, 2J, 22, 31, 32 or 33 but directs the transaction into backorder (BB) or direct delivery (BV) status, (e.g., contains Manager Forced/Directed Action Code BV, HV, HD, BB, HC, or HB in pos. 69-70.)
- c. Contains alpha indicator J, K, L, or M (Inter-Service Supply Support Program) but directs the transaction into backorder (BB) or direct delivery (BV) status (e.g., contains Manager Forced/Directed Action Code BV, HV, HD, BB, HC, or HB in pos. 69-70.)
- F An Action Decision Code, appendix A-71, is recorded in the NIR of the requested NSN which restricts the search pattern for available assets to the same coast, (i.e., East or West Coast) as that of the consignee as determined by the Signal Code, pos. 51, and sufficient assets are not available on the same coast; or a Customer Zone Code, appendix A-128, is not recorded in the DoDAAD File for the consignee AAC.

<u>CODE</u>	<u>DEFINITION</u>
G	The computer will reject a document as a duplicate if the manager attempted to direct action on a requisition and that requisition is recorded as complete in the ARCSF; or the suffix code is already assigned; or the directed action contained a suffix and the open ZB record in the ARCSF has no suffix code.
H	To advise DSO of one of the following conditions: <ul style="list-style-type: none"> a. The requisition is for a 68-- or 9150 class item, Advice Code 2G, 23, 24, 29 or 31 is not present, and Condition Code C stock is available for shipment. b. The requisition is for CONUS, does not contain Advice Code 2G, 23, 24, 29, 2H or 31; the item is not managed by S9M; the item is a Shelf-Life item or Condition Code C materiel is available for issue. c. A priority 03 requisition with Service Code A, F, J, N, R, V or W in pos. 30 has been received for a Potency Dated Item and Condition Code C material is available for issue. d. An overseas requisition has been received and Ownership/Purpose A, Condition B stock is available for issue. e. A requisition with an advice code of 2G, 23, 24, 29 or 31 has been received and Ownership/Purpose A, Condition B stock is available for issue. <p>NOTE: The DIC ZLL, MNIC H may contain either the total or partial quantity based on the Action Decision Code of the item (other than AE).</p>
I	War Reserve Program Indicator. The requisition is for an NSN which has War Reserve Requirements and the Project Code WRP (War Reserve Program) has been activated. Process the requisition in accordance with instructions received from DLA-OS. The Administrative Percentages for each Service are shown in appendices F-327A, B and C.
J	Invalid NSN or FSC - To advise DSO that manager forced action has been attempted on an invalid NSN/FSC. Manager directed actions attempted against NSNs bearing a delete Key Code (D_); or Manager Directed backorder actions against items bearing a Pending Gain (PG) Key Code (appendix E-127 V).
K	To advise DSO that: <ul style="list-style-type: none"> a. The Storage Location (pos. 78-80) does not have sufficient quantity (pos. 25-29) in the O/P and Condition Codes cited (pos. 71 and 77, respectively); or b. The Storage Location (pos. 78-80) is valid but the O/P Code (pos. 71) and/or the Condition Code (pos. 77) is/are invalid or blank; or

<u>CODE</u>	<u>DEFINITION</u>
	c. The O/P and Condition Codes (pos. 71 and 77) are valid but the Storage Location (pos. 78-80) cited is not presently listed on NIR.
L	Attempted substitution or partial action using incorrect DIC.
M	To advise DSO that there are multiple NSNs assigned to requested P/N per TIR File Interrogation.
N	Issuable assets below ROP level, the UMMIPS level, or insufficient to support MAP (FMS) requisition for an SSC 6 or future SSC 6 item.
O	To advise DSO that a request has been received for an NSN that normally would be backordered (BB or BV) but the FESHF signal indicates that assets may be available to satisfy the requirement through the FES program.
P	Invalid Manager Forced/Directed Action Code, appendix A-86, cited on the Reentry Document.
Q	Service/Agency request for commingling with Advice Code 8D.
R	Not used.
S	FMS requisition received against an NSN which has assets recorded in Purpose Code N.
T	<p>a. Attempted direct delivery against a Free Issue Signal Code D or M or Advice Code 2E and the requisition did not contain a Manager Directed Action.</p> <p>b. To advise the Item Manager that the only issuable assets available are at OCONUS locations.</p> <p>c. To advise the Item Manager that there are only CONUS assets to issue to an OCONUS customer.</p>
U	To advise DSO that an attempt to revise GFM requisition data which is not authorized for revision has been made. This data includes NSN, UI, Quantity, Supplementary Address and Signal Code.
V	Item request is unavailable for issue and normally requires GFM for manufacture.
W	To advise DSO that: <p>a. Requisition contains a Project Code in pos. 57-59 which precedes the Announcement Date recorded in the Project Code Reference Table.</p> <p>b. DPSC-Medical use only. Marine Corps Maritime prepositioned Ships (MPS) requisitions have less than 36 months of shelf-life remaining.</p>

<u>CODE</u>	<u>DEFINITION</u>
X	Unauthorized Loan Request - A request has been received for the loan of DLA stocks without prior DSO approval.
Y	To advise DSO that a request has been received for a NSN item that is not recorded in the NIR and has multiple possible substitutes/replacements recorded in the IIF or the requisition is DLA originated and DLA/GSA is not recorded as Integrated Manager.
Z	Rejected for reason(s) other than as specified in this appendix; the document was reentered with Status Code CV and EDOS in pos. 73-76 is invalid; or total supply action(s) is in process but the DSO is unaware that a partial customer (AC_) cancellation has been received.
1	To Advise DSO that: <ul style="list-style-type: none"> a. A denial has been received against a manager directed action (DIC ZLD/ZLL/ZLM) which was recorded as an Issue Transportation DIC D7A, B, C, D, E, or P, or a denial has been received and a reedit cannot be performed because the Unit of Issue against the item has changed or there is no U/I conversion factor; or b. A direct delivery confirmation (DIC ZCM, appendix B-55) has been received from the Contracting Subsystem, the NSN furnished has an NIR which indicates a Unit of Issue other than that in the ZCM, and no reference Unit of Issue or conversion factor is contained in the NIR.
2	To advise DSO that a Manager Directed Action, DIC ZLL or ZLM, has been attempted against a Document Number that is not recorded in the RCSF or for which no supply section is available.
3	To advise DSO that a Manager Directed Action, DIC ZLM, has been attempted with invalid entries in Quantity fields; Split action was initiated with invalid suffix codes; or quantity on input to create passing order did not equal total quantity on ARCSF.
4	To advise DSO that a Manager Directed Action, DIC ZLL or ZLM, has been attempted with an invalid Ownership/Purpose Code or RIC.
5	To advise DSO that a Manager Directed Action, DIC ZLL or ZLM, has been attempted with an invalid Condition Code, and/or the DoDAAD Address Code is invalid or has been suspended from requisition processing; or reinstatement of a requisition as a result of a denial with other than Management Code 3 or 9 and the AAC, pos. 30-35, is suspended in the DoDAAD (Area Code DD); or internal processing of a DIC ZCM with Cancellation Reason Code ZB has been initiated and the AAC, pos. 30-35, is suspended in the DoDAAD (Area Code DD).

<u>CODE</u>	<u>DEFINITION</u>
6	DIC ZLM has been attempted with a Suffix Code in pos. 44 equal to or greater than the next Suffix Code to be assigned in pos. 65; or pos. 44 contains an invalid Suffix Code.
7	The IM requests output of Manager Review Reentry Document, DIC ZLL, for the purpose of initiating an alternate type of supply action.
8	To advise DSO that a Manager Directed Action, DIC ZLM, has been attempted with an invalid UI.
9	To advise DSO that a request has been received for an NSN that is not recorded in the NIR and the CAC to RIC Cross-Reference Table does not contain the CAC of the recorded Service/Agency ICP.
0	To advise DSO (ORC 94): <ul style="list-style-type: none"> a. An FMS requisition under 330 days old is being attempted to be released for issue against assets that are below the Reorder Point Level; or b. An FMS requisition with an extended RDD is being attempted to be released from backorder before it is eligible.
