

APPENDIX A-91

EXCEPTION INFORMATION CODES

1. Number of characters: One.
2. Type of code: Alpha/Numeric.
3. Explanation: This code, used on input Exception Data Requisitions, DIC A_5/A_E/A_2/A_B, will alert the mechanical process of the significance and purpose of the exception information. Exception Information Code 6 is also used on a Manager Backorder Action Card, DIC ZD7.
4. The following codes are assigned:

<u>CODE</u>	<u>DEFINITION</u>
A	Normal validation applies. (Perpetuate 5 or E on MRO.)
B	Identifies a MILSTRIP requisition having exception data in the Requisition Exception Data File.
U	Normal validation applies. (Do not perpetuate 5 or E on MRO.)
V	Do not violate due to Invalid Billing Address. (Do not perpetuate 5 or E on MRO.)
W	If Ship to Address is invalid, use area code in pos. 70-71. If valid, use area code in AADF.
X	Same as W regarding Ship to Data. Disregard invalid Bill to Address, continue process.
Y	Disregard area code in AADF and use area code cited in pos. 70-71.
Z	Same as Y for Ship to Data. Disregard invalid Bill to Address, continue process.
1	Exception relates to procurement only. Do not perpetuate 5 or E.
2	Same as Code W, also involves procurement.
3	Same as Code Y, also involves procurement data.
4	Same as Code X, also involves procurement data.

<u>CODE</u>	<u>DEFINITION</u>
5	Same as Code Z, also involves procurement data.
6	Applies to DIC ZD7 input only. Used with Action Code HL when mechanical PR is to be routed to the Item Manager for the purpose of diversion.
7	Direct Delivery - Item being manufactured in or by commercial manufacturer. Applies only to Special Measurement Clothing.
8	Direct Delivery - Item being manufactured in or by commercial manufacturer. Applies only to Flags, Guidons, and Battle Streamers.
9	Mechanically entered on Recommended Buy Record (caused by Manager Forced Action Code W on input DIC A__, or Manager Directed Action Code HD on input DIC ZLL/ZLM). Mechanical PR will be output to Item Manager for necessary action and manual processing.
