

APPENDIX A-97

FRONT-END SCREENING (FES) REENTRY CODES

1. Number of characters: One.
2. Type of code: Alpha.
3. Explanation: This code is used to designate the action to be taken against a FES (DIC JDP) transaction. This code results in the update of the FESHF Action Code field in the FES History Record.
4. The following codes are assigned:

| <u>CODE</u> | <u>DEFINITION</u>                                    | <u>FESHF ACTION CODE</u><br><u>UPDATED TO</u> |
|-------------|--|---|
| B           | Return assets to stock (no change to Consignee RIC). | BB  |
| C           | Return assets to stock (change Consignee RIC).       | BB  |
| E           | No action taken to recoup assets.                    | EE  |
| F           | Delete FESHF Record based on IM decision.            | FF  |
