

APPENDIX A-114

INHIBIT CODES

1. Number of characters: One.
2. Type of code: Alpha.
3. Explanation: A code used to permit the following data elements to be controlled manually or mechanically at the option of the DSC:
  - a. PLT.
  - b. Return Forecast.
  - c. Safety Level.
  - d. Quarterly Forecast of Demand Quantity.
  - e. ALT.
  - f. Applicable ANRDP. (Applicable to High Value Demand Items only.)
  - g. DIIP. \*The DIIP Inhibit Code P will post to the IIR Code Field of the SCF and override Inactive Item Review Status Code N, R, or U only (appendix A-84).
  - h. SSD/DSSP Item Range Review. Code P disqualifies a NSN for stockage at a SSD/DSSP.
4. The following codes are assigned:

<u>CODE</u>	<u>DEFINITION</u>
C	Data in the SCR was mechanically computed and is under mechanical control.
P	Data in the SCR was established by the IM and is not to be mechanically computed at time of the next scheduled mechanical update process; or  *Inhibited from DIIP review, see paragraph g above.
T	Data in the SCR was established by the IM and will be used in forecasting until the next review. At that time, it will be mechanically recomputed and Inhibit Code will be automatically changed to C.

5. References:

- a. Chapters 9, 31, 32, 34, 50, 53, 56, and 57.
- b. Appendix B-64, Forecast Data Change Transaction, DIC ZSF, for datum element f.
- c. Appendix B-149, Supply Management Data Change Transaction, DIC ZR2, for data elements in paragraphs a through e, g, and h.
- d. Appendix E-149 P, Supply Management Data Change Transaction.
