

APPENDIX A-161

BASIC SERVICE CODES (BSCs)

1. Number of characters: Two.
2. Type of code: Alpha/Alpha; Numeric/Numeric.
3. Explanation: This code is derived from the MILSTRIP Service Assignment Codes (DoD 4140.17M, appendix B-2) and is used to accumulate demands by Military Service (hereinafter referred to as Service)/FEDSTRIP Activity. This code is also used in the Project Code Reference Table (appendix F-95) to indicate Service/Agency usage of an otherwise duplicate assignment of a Project Code. When used in this context, Code XO is used to identify a Project Code which is meaningful to DLA only; Code SO is used to identify a DLA monitored or DLA assigned Project Code which is used by any or all Services/Agencies.

NOTE: Should source document call for a one-position BSC/FEDSTRIP Code, use first position alpha BSC or first position zero for all FEDSTRIP activities (e.g., PPNR Table, appendix B-160).

4. The following codes are assigned:

<u>CODE</u>	<u>DEFINITION</u>
AO	Army - Service Code A, B, C, or W.
FO	Air Force - Service Code D, E, F, or J.
