

APPENDIX F-97

NATIONAL INVENTORY RECORD DELETED ITEM PURGE LISTING

1. PURPOSE

To provide visible identification of NIR Key Code D_ (deleted) NSNs (other than DL, DM, DP, DQ, and DR) at the time they are actually purged from the NIR. This listing represents the only center identification of deleted NSNs after the NIR purge action other than microfiche printouts that are available for purged NIR Key Code DW (Inactive) NSNs, F-97-A.

2. ORIGIN

The NIR is mechanically screened semiannually (at the Center's option) for NSNs recorded with NIR Key Codes D_ (delete) other than DL (Delete - Superseded by), DM (delete without replacement, supply by component), DP (delete without replacement, supply by next higher assembly), DQ (delete without replacement, fabricate) and DR (consolidate with/change to/transfer to). Deleted NSNs without assets, backorders and/or Dues-In that have effective dates for the deletion assignment in excess of 365 days ago in the past are eliminated from the NIR and the F-97 generated to visibly identify the NSNs being purged.

3. FREQUENCY

Semiannually.

4. DATA ELEMENTS

a. REPORT HEADER DATA - Header data will be repeated in its entirety on all overflow pages.

(1) REPORT TITLE - NIR deleted Item Purge Listing.

(2) REPORT NO. - F-97.

(3) ORC - Constant 89 (Management Support Office, DSO). See appendix A-56.

(4) PURGE DATE - Five position date of the NIR Purge Action being reported (two position year - three position day).

(5) PAGE - Self-explanatory.

b. DATA ORGANIZATION:

(1) NSN - National Stock Number.

(2) UI - Unit of Issue.

(3) KC - Key Code (appendix A-94).

REFERENCE DATA

- (4) NSN - National Stock Number of any replaced/replacing NSN, at time of purge.
- (5) UI - Unit of Issue of replaced/replacing NSN, if any.
- (6) UICVF - Unit of Issue Conversion Factor - A factor by which old quantity was multiplied to convert to new unit of issue (appendix C-154).
- (7) D - Decimal Indicator - Indicates position of decimal in Unit of Issue Conversion Factor (appendix B-69).
- (8) RIC - Routing Identifier Code of Gaining Inventory Manager (GIM) if logistic loss was to a single GIM. If more than one GIM, blank.
- (9) SS - Supply Status Code (appendix A-50) assigned at time of purge.
- (10) FS - Future Supply Status Code (appendix A-50). Code N indicates No Change was pending.
- (11) EFF DATE - Effective Date of Deletion Assignment Recorded in NIR at time of purge.
- (12) ACQN COST - Materiel Acquisition Unit Cost.
- (13) UNIT PACT - Quantity per Pack.
- (14) USERS - Catalog User Code.
- 0 Non-USER
 - 1 USER
 - *2 Navy Non-USER with DLA assets on hand
 - First position-Army
 - Second position-Air Force
 - Third position-Marines
 - Fourth position-Navy
 - Fifth position-Other
- *Mechanically triggers CMDM data from DLSC to Navy applicable to DLA-owned stocks at Navy locations whenever the Navy is NOT a DLA recorded USER.
- (15) MR - Manager Review Code (appendix A-70).
- (16) SP - Normal Source of Procurement (appendix A-48).
- (17) CS - Catalog Status Code - Applicable MILSTRIP Status Code Corresponding to last type of change code (appendix A-12).
- (18) AD - Action Decision Code (appendix A-71).
- (19) ORC - Output Routing Code of the Item Manager.

(20) C - Defense Supply Center Commodity Code (third position of DSCs RIC).

(21) OP - Overpack Code (appendix B-142).

(a) Code Y - Item could convert from domestic to export pack.

(b) Code N - Item could not be converted to export pack.

(22) RC - Resale Code (appendix B-142).

(a) Code Y - Item restricted for support of troop requirements.

(b) Code N - Item not restricted for support of troop requirements.

(23) WS - Weapon System Indicator.

(a) Code Y - A Weapon System Support Item, subject to procedures prescribed in chapter 51.

(b) Code N - Not a Weapon System Support Item.

(24) SI - Special Item Code (appendix A-111).

(25) PR - Price Reduction Indicator.

Code Y - Item available at reduced price (DLAM 7000.2, appendices E-6-11 and A-6-12) at time of purge.

(26) CONV FACT - Common Denominator Conversion Factor - established for issue substitute NSN not having a family relationship (chapter 27, appendix E-524 P).

(27) FC - Factor - A two-position alpha code indicating lowest unit of issue common to ALL NSNs used as substitutes (appendix E-524 P).

(28) VALUE - A six-position numeric code indicating lowest UI of NSN to be substituted (appendix E-524 P).

(29) D - Decimal Indicator - A one-position numeric code required when value was expressed as other than a whole number. Zero was entered when value was a whole number (appendix E-524 P).

(30) FAMILY NUMBER - NIIN (chapter 27).

5. DATA ORGANIZATION

a. By NSN as extracted from NIR at time of purge in same format produced for Catalog Section of F-109 NIR Printout.

b. Page break on overflow.

6. DISTRIBUTION

One copy to ORC 89, Management Support Office, Directorate of Supply Operations (appendix A-56), Plans and Programs Branch.

7. PROCEDURES FOR REVIEW AND PROCESSING

a. The F-97 is a one-time Printout generated to inform management of deleted NSNs that have been totally eliminated from the NIR during the semiannual NIR purge. After elimination, the Defense Logistics Control Center (DLSC), the DoD repository for deleted item data, is the source to be queried for information on deleted items should same be required. DLSC interrogation procedures (DIC LTI) are outlined in appendix E-429 P.

b. The F-97 should be retained as a management tool for resolving problems concerning receipt violations, logistic reassignments, etc., where the NSN has been deleted from the NIR. After review of the F-97, materiel can be directed to the DPDO, Gaining Inventory Manager, etc., as appropriate.

c. The F-97A is microfiche identification of inactive (DW) deleted items purged from the NIR DELETED ITEM SUSPENSE TAPE.

8. RETENTION PERIOD

Retention is at the discretion of the DSCs.
