

APPENDIX E-159 P

OUTPUT ROUTING CODE TABLE UPDATE

1. TRANSACTION USED

Appendix B-159, Output Routing Code Table Update DIC ZEQ.

2. REASON FOR PREPARATION

To change or request a printout of the Output Routing Code Table.

3. RESPONSIBLE ORGANIZATION ELEMENT

a. This table is initially established under SAMMS File buildup by DSIO from specifications furnished by the functional managers. The DSIO SAMMS Subsystems are responsible for advising the DSC (MSO, ODS), when additions/deletions to this table are required as a result of further programming or system (mechanical) improvements.

b. Personnel of DSC, MSO, ODS, upon receipt of notification from DSIO that an addition or deletion to the DIC/VRC on the table is required, will notify counter-part personnel in the Plans and Programs Branch, MSO, DSO, to ensure data elements (ORC, Followup Frequency) are included, if required, on the input being made.

c. The Plans and Programs Branch, MSO, DSO at all DSCs except DSCP and/or its equivalent at DPSC, will:

(1) Determine the data required (ORC, Followup Frequency) on the additions/deletions to the table being input by ODS.

(2) Be responsible for preparation of the Output Routing Code Table Update to change/add the ORC, or Followup Frequency on a specific DIC and/or VRC, or to request a printout of the Output Routing Table. Updates to the Output Routing Table should be consolidated to the extent that is practical.

NOTE: DSCs do not have the automatic ability to change Type Output Option Codes (i.e., the controlled or uncontrolled status of a specific VRC). To effect Output Option Code changes, a recommendation with supporting facts must be forwarded to DLA-OPP for coordination and implementation with DSIO.

4. INSTRUCTIONS FOR PREPARATION OF ZEQ

This transaction will be prepared IAW appendix B-159. Transcript for Output Routing Code Table Update, DLA Form 954, will be used as a data entry guide.

5. REVIEW/RETENTION OF OUTPUT ROUTING CODE TABLE

a. Receive the Output Routing Code Table (appendix F-210) and assure that all input changes have been made.

b. Retain the Output Routing Code Table as a ready reference until replaced by a later version.

6. FLOWCHART

Flowchart not required.
