MEMORANDUM FOR: SEE DISTRIBUTION

SUBJECT: Approved DLMS Change (ADC) 73, Revision to DLMS Supplement (DS) 527R, Receipt, Inquiry, Response and MRA to provide for Current Functionality of the Materiel Receipt Acknowledgement Process (Supply/MILSTRAP)

This revision to the DoD 4000.25-M, Defense Logistics Management System (DLMS), modifies the DS 527R Receipt, Inquiry, Response and MRA as shown in the attachment. **This is a critical change to DS 527R necessary to correct a deficiency by providing for current functionality of the MRA process.** The updated DLMS Supplement will be posted to the DLMSO web site (<http://www.dla.mil/j-6/dlms/ICs/Default.htm>) within 30 days from the above date for implementation planning. DLMSO will concurrently pursue coordination/approval with the DoD Logistics Functional Working Group, the DoD Electronic Data Interchange Standards Management Committee (EDISMC), and the Federal EDI Standards Management Coordinating Committee (FESMCC) for Federal implementation conventions (IC) revisions.

The attached change to DLMS will be incorporated into the DLMS manual/supplement. NOTE: DAASC and DLA have advance authorization to employ these procedures during ongoing Business Systems Modernization (BSM) implementation; however configuration management/version control procedures must be observed allowing for sequential implementation to prevent rejection.

Addressees may direct questions to the DLMSO point of contact, Ms. Mary Jane Johnson, 703-767-0677, DSN 427-0677, or email: maryjane_johnson@hq.dla.mil. Others must contact their Service or Agency designated representative.

JAMES A. JOHNSON

**Approved DLMS Change (ADC) 73,
Revision to DLMS Supplement 527R
Receipt, Inquiry, Response and MRA to provide for Current Functionality of the Materiel
Receipt Acknowledgement Process (Supply/MILSTRAP)**

1. ORIGINATOR: MaryJane Johnson, DLA J-673, Defense Logistics Management Standards Office (DLMSO), 703-767-0677 (DSN 427), maryjane_johnson@hq.dla.mil

2. FUNCTIONAL AREA: Supply

3. REQUESTED CHANGE:

1. Title: Revision to DLMS Supplement 527R, Receipt, Inquiry, Response and MRA to Provide for Current Functionality of MILSTRAP Materiel Receipt Acknowledgement (MRA) Process.

2. Description of Change:

a. This change revises DS 527R to provide the capability to submit a MRA transaction without a stock or part number in support of current MRA requirements. This change will also allow for MILSTRAP MRA transactions (Document Identifier (DI) Code DRA/DRB), which are submitted with a blank stock/part number field, to process in DLMS during a mixed DLSS/DLMS environment.

b. This change also provides administrative note updates to allow flexibility for adding codes for DoD use.

3. Procedures: Revise DS 527R, Receipt, Inquiry, Response and MRA as follows:

	Location	Revision	Reason	Federal IC
1	2/LIN02/010	Add a Federal Note: "The following is a list of preferred codes."	To allow flexibility for adding codes for DoD use.	Federal IC revision recommended.
2		Add DLMS note #2: 2. For DLMS use, only the following codes are authorized.	This note is used in conjunction with Federal note added above, identifying preferred codes.	No change.

	Location	Revision	Reason	Federal IC
3	2/LIN02/010	Add qualifier 'PR', Process Number,	Supports current MRA functionality and supports DLSS/DLMS conversion.	Federal IC revision recommended.
4		Add DLMS note to new qualifier 'PR' as follows: " Use only with Materiel Receipt Acknowledgement transactions (1/BR02/020 Code TH) when stock or part number is unknown. Use: (1) when the item being acknowledged cannot be identified (must also cite Discrepancy Indicator Code 'A' in 2/LQ02/130) or (2) during DLSS to DLMS conversion when the stock or part number was blank in the associated DLSS Document Identifier Code DRA/DRB (this second use will be streamlined out once full DLMS implementation is reached)."	Supports current MRA functionality and supports DLSS/DLMS conversion.	No change.
5	2/LIN03/010	Add DLMS note: When LIN02 qualifier PR is used, cite 'Z' in LIN03 to satisfy ANSI syntax requirement.	Supports current MRA functionality and supports DLSS/DLMS conversion.	No change
6	2/LIN04/010	Add a Federal note: "The following is a list of preferred codes."	To allow flexibility for adding codes for DoD use.	Federal IC revision recommended.
7		Add DLMS note #2: 2. For DLMS use, only the following codes are authorized.	This note is used in conjunction with Federal note added above, identifying preferred codes.	No change.
8	2/G6201/050	Revise Federal and DLMS notes to read as follows: Add a Federal note: Following is a list of preferred codes.	To allow flexibility for adding codes for DoD use.	Federal IC revision recommended.

4. REASON FOR CHANGE:

a. This change is necessary to support intended DLMS functionality. DS 527R does not allow for the absence of a stock/part number. This conflicts with DoD 4000.25-2-M (MILSTRAP) MRA procedures which allow for leaving the stock/part number field blank as follows: "If the stock number/part number of the item received cannot be fully entered in record positions 8-22, leave blank. If item received exceeds stock number field and is wrong item or cannot be identified leave record positions 8-22 blank and enter Discrepancy Indicator Code A in record position 63." This revision to DS 527R is necessary to accommodate this provision for a blank stock or part number field in DS 527R MRA transaction.

b. This change is necessary to support DLMS/DLSS conversion. The MILSTRAP MRA transaction, DI Codes DRA and DRB submitted with a blank stock/part number field cannot be converted to DS 527R until this change is implemented.

5. ADVANTAGES AND DISADVANTAGES:

a. **Advantages:** Supports DLMS implementation

b. **Disadvantages:** None identified

6. IMPACT:

a. Publications. Federal Implementation Convention 527R and corresponding DoD 4000.25-M DLMS Supplement. All applicable revisions will be submitted to the Federal IC.

b. DAAS DLMS/DLSS conversion maps have been modified to incorporate above revision.
