FOREWORD

This manual is issued under the authority of DOD Directive 4140.1, DOD Materiel Management Policy. Its purpose is to prescribe uniform procedures, data elements and codes, formats, forms, and time standards for use in automated and manual data processing, involving both high-speed electronic and other media of communications employed in the requisitioning, issuing, lateral redistribution, returning, and disposal of DOD materiel.

The provisions of this manual are effective immediately¹ and apply to the Office of the Secretary of Defense, the Military Departments, the organization of the Joint Chiefs of Staff, the Defense Agencies, and by agreement, to other organizations such as, the General Services Administration, United States Coast Guard, National Security Agency, Federal Aviation Administration and others, participating in the Military Standard Requisitioning and Issue Procedures (MILSTRIP) (hereafter referred to collectively as "Components").

Procedures, forms, formats, data elements and codes, and time standards prescribed herein are based on the requirements of the Components.

This manual is mandatory for use by all Components participating in MILSTRIP. Heads of Component organizations may issue supplementary instructions only when necessary to provide for unique requirements within their respective organization.

Interim² and approved changes³ included in this reissue are posted on the Defense Logistics Management Standards Office (DLMSO) website.⁴

General editorial and administrative changes were made for compliance under DOD 5025.1-M, DOD Directives System; to accommodate formatting (and page numbering) requirements cited in the directives system manual.

This is the final issuance of the MILSTRIP manual based on regulatory guidance to end the Defense Logistics Standard Systems (DLSS) (those "MILS" manuals within the DOD 4000.25 series) effective on January 1, 2005. See DOD Directives 8190.1 and 8190.2.⁵ For more information on migrating from the DLSS to the Defense Logistics Management System, refer to information under "Hot Topics" on the DLMSO website.

¹ This DOD publication supersedes the basic MILSTRIP, November 8, 2000, Formal Change 1, Interim Changes 03-01 and 02-01 through 02-05.

Recommendations for revisions of requisitioning and issue procedures are encouraged under the forum of the Supply Process Review Committee. Submit all proposed change requests through your designated Component Supply Process Review Committee representative using the change proposal and submission requirements identified on the DLMSO website.⁶
