PROCEDURES
for
Ozone Depleting Substance (ODS)
Hydrofluorocarbons (HFCs)**

PROCEDURES

The Defense Logistics Agency (DLA) is responsible for managing the Department of Defense (DoD) Ozone Depleting Substances (ODS) and Hydrofluorocarbons (HFC) Reserve for weapon system support. The material manager of the Reserve is DLA Aviation with operational support and storage provided by the co-located DLA Distribution Richmond.

The ODS & HFC Reserve consists of various ODS refrigerants:

CFC – R11, R12, R114, R500, R502

HCFC – R22

Halons – 1211, 1301, 1202

Solvents – 1, 1, 1 Trichloroethane and CFC-113

The ODS & HFC Reserve is also the strategic static repository for specific Mission Critical Military End Use (MCMEU) HFC:

R125, R134a, R227ea, R236fa, R404a, R407a, R407c, R410a, R417c, R438a, R507a

HFC are issued through the Industrial Gas Program

<https://www.dla.mil/Aviation/Offers/Commodities/> currently, but this may transfer to the ODS & HFC Reserve in the future.

Empty ODS and HFC recovery cylinders can be requisitioned essentially free of charge by a DoD Activity (DLA System accounting requires a unit price at least two cents, \$.02), provided the ODS and cylinders are returned to the Reserve. A list of the NSNs for recovery cylinders is provided at Enclosure 1.

ODS (except for halon fire extinguishers and system cylinders) are also “almost” free issue (Enclosure 2); however, customers must be authorized by their Service to requisition ODS chemicals from the Reserve.

Army and Navy/USMC and Coast Guard provide DLA with an Authorized Users List (AUL), and requisitions are checked against the AUL to determine if the requisitioning activity is authorized to requisition ODS products.

Air Force does not require pre-approval for the following NSNs, if the quantity requisitioned is below the indicated threshold.

PRODUCT	CYLINDER CAPACITY (LBS)	NSN	MAXIMUM THRESHOLD (quantity of U/I)
Halon 1211 Fire Extinguisher	5	6830-01-128-1673	25
Halon 1211	200	6830-00-285-5887	3
Halon 1211	1,500	6830-01-219-8529	3
Halon 1301 Virgin Type II	150	6830-00-543-6623	2
CFC-12	45	6830-00-264-5913	3

Air Force users that need to requisition quantities higher than the maximum thresholds or require an ODS NSN that is not listed, must submit an email request to HQ AF and receive approval before DLA can process the requisition. Transmit email requests to the AF points of contact identified in Enclosure 3. **Do not submit multiple requisitions** to evade the thresholds listed above. HQ Air Force will follow up with MAJCOMs and installations that have unusual requisition patterns.

A Services' Point of Contact (POC) list is provided at Enclosure 3.

Each ODS NSN has an inventory system freeze in the DLA supply system and will require Manager's review before release. Requisitions (sales orders) submitted to DLA Aviation by non-authorized activities will be processed with Status Code "D8" (Rejected) to the requisitioner, indicating the material is a commodity requiring advance service authorization.

The Military Standard Requisition and Issue Procedure (MILSTRIP) is used to requisition ODS. The DLA preferred method to input a requisition (sales order) into the supply system is through FEDMALL, but requisitions can be phoned in to DLA Customer Interaction Center. The Center is available 24 hours a day at DSN 661-7766 or COMM toll free (877) 352-2255 (877-DLA-CALL) to answer questions concerning MILSTRIP and requisition status.

Contact the ODS Reserve for questions or concerns:
