

Attachment 11—Bin Deliveries

Attachment 12—Kits Staged

Attachment 11 is listed on the AF GEN IV Project website

<https://www.dla.mil/Aviation/Offers/Commodities/AF-IPV-Gen-IV-Project/>

Each file is a monthly file with all files showing bin deliveries from Jan 2022-Dec 2024.

Each file will show: ALC, RCC (which is the customer code that material is billed to), Group (maintenance group), BLDG, BSL (Bin Stock Location), Bin, NSN delivered, and Month Total Delivered.

Since each file shows the total delivery to a bin, Offerors will see duplicate rows if searching by NSN.

Also please note that NSNs on the Bin Delivery files include NSNs that are currently on GEN III and are not part of the GEN IV SOI. Only items on the GEN IV SOI should be pulled from the Bin Delivery files for the sake of quoting this GEN IV requirement.

Attachment 12 is listed on the AF GEN IV Project website

<https://www.dla.mil/Aviation/Offers/Commodities/AF-IPV-Gen-IV-Project/>

Each file is a monthly file with all files showing the total of material at NSN level placed into a kit and staged for future delivery. All files show this information from Jan 2022-Dec 2024.

Each file will show: ALC, RCC (which is the customer code that material is billed to), Group (maintenance group), KIT ID, NSN, NIIN, UOM (Unit of Measure), Qty filled (qty of material placed into a kit).

Offerors will notice that there are duplicate Kit IDs matching duplicate NSNs. This is due to more than one of those Kit IDs being staged in that particular month.

Also please note that NSNs on the Kits Staged files include NSNs that are currently on GEN III and are not part of the GEN IV SOI. Only items on the GEN IV SOI should be pulled from the Kits Staged files for sake of quoting this GEN IV requirement.
