4. REQUESTED CHANGE:

- a. **Title:** ADC 57B, Revisions to RDD Edit
- b. **Description of Change:**
 - (1) This change provides a temporary exemption from the ADC 57 RDD edits for intra-USAF lateral support requisitions (retail account DoDAACs that begin with FB and RICs that start with D) to another retail account (again, DoDAAC that begins with FB and RIC that starts with D). The exemption is provided until migration to the DLMS. Under the DLMS the USAF will transmit unique codes currently included in the RDD field as discretely identified data elements.
 - (2) In addition, this change expands the current Navy exemption for the 100-day restriction on RDDs to all Components requisitioning conventional ammunitions (FSC 1300).
 - (3) This change formally documents the suspension of BK status provided to the Army as a result of ADC 57 Priority Designator (PD)/RDD edits.

c. Procedures:

(1) Revise MILSTRIP Chapter 3, Figure C3.1, Requisition Processing and Related Actions, as indicated in the enclosure.

(2) Establish a new DLMS data element Forward Supply Location (FSL) Category Code (one-position, numeric). Reference AFMAN 23-110, V2, PT2, CHP 3. The FSL Category Code is used with the Urgency Justification Code (UJC) (ADC 76) to provide the FSL stock position.

(3) DAAS will not convert the USAF internal non-date RDD entries identified in this change for the DLMS. All possible entries are not clearly defined in terms of the DLMS (see below for other examples). If conversion is desired in the future, the USAF will provide procedures by which DAAS may programmatically distinguish each entry (e.g., FSL Category-UJC from F/AD-UJC).

d. Alternatives: No acceptable alternative.

5. REASON FOR CHANGE:

a. During implementation analysis for ADC 57, it was not recognized that there were additional Component unique data content carried in the RDD field for lateral support internal to the USAF. Modification of the RDD edit will accommodate multiple USAF unique data combinations in the MILSTRIP RDD field which must be retained for legacy transactions. Under internal USAF guidance the RDD multi-purpose field may contain unique coding. An example would be identification of the Air Mobility Command Forward Supply Locations (FSL) to their corresponding Primary Supply Points. The PSPs support the FSL's requisitions for stock replenishment requirements. The PSPs use these codes to determine which FSLs should have their requisitions filled first. Also, the first position of the RDD may equal the Force Activity Designator (F/AD) (numeric); the second and third positions equal the Urgency Justification Code (UJC) (both positions are alpha/numeric). Other specific entries [NAR or X03] may also be directed for entry in the RDD field.

b. An exemption requirement to the 100 day restriction was originally identified only by the Navy for requisitions for Naval Ammunitions Logistics Center (NALC). It is now recognized that this edit is overly restrictive for current processing for FSC 1300 stock classed (conventional ammunition) requisition transactions for other Services as well. Both Army and AF depots prioritize their shipments using the RDD rather than priority because they receive so many requisitions from each of the other services with the same priority that the RDD is more important in determining which requisitions to work first so they can arrive at the requesting organization by the RDD. Even if the RDD is within the scope of the priority, there are so many that the RDD is the more critical element to prioritizing shipments to meet the customer's timeline. Under full DLMS functionality, there will be greater flexibility for identifying the required date (including specific entry of 'delivery not before' and 'deliver not after' combinations).

c. The Army requested termination of the ADC 57 BK status shortly after implementation. The BK status triggered confusion and improper processing due to procedures under the Army single stock fund requisitioning. Data entries on the BK status no longer matched those on the

original requisition. In addition, the BK status resulted in some unnecessary cancellations of requisitions for urgently required material.

6. ADVANTAGES and DISADVANTAGES:

a. Advantages: Allows legacy system transactions to process and retain applicable Component unique data contents.

b. Disadvantages: Adds complexity to the standard edit.

7. IMPACT: Publication(s): DOD 4000.25-1-M, MILSTRIP; DOD 4000.25-M, DLMS, Component implementing instructions

If there is an N or E in rp 62 but PD 09-15 in rp 60-61, blank the entry in rp 62-64, furnish BK supply status and process using the priority. If there is an N or E in rp 62, blank any characters in rp 63-64 and furnish BK supply status. **Exception:** For Air Force requisitions, blank only numeric characters (01-99); do not blank special coding to fulfill an Air Force internal requirement for NMCS/MICAP justification. (Note: This eliminates short RDDs associated with NMCS/ANMCS and expressed as number of days from requisition date.)
2. If Expedited handling Signal 999 is present in rp 62-64 and requisition is not intended for U.S. forces, blank the expedited handling signal, furnish BK supply status, and process using the
