MEMORANDUM FOR DOD ACTIVITY ADDRESS DIRECTORY (DODAAD)
PROCESS REVIEW COMMITTEE (PRC) MEMBERS

SUBJECT: Approved Defense Logistics Management System (DLMS) Change (ADC)
318, DOD Activity Address Directory (DODAAD) Country Codes in the
DODAAD (Staffed as PDC 325)

The attached change to Department of Defense (DOD) 4000.25-M, DLMS, is approved for implementation.

Addressees may direct questions to the DLMSO points of contact, Mr. Robert Hammond, DLMSO, DOD Activity Address Directory Process Review Committee Chair, 703-767-2117, DSN 427-2117 or email: robert.hammond@dla.mil. Others must contact their Component designated representative.

A handwritten signature in black ink, appearing to read "Donald C. Pipp", with a stylized flourish at the end.

DONALD C. PIPP
Director
Defense Logistics Management
Standards Office

Attachment

cc:

DUSD(L&MR)SCI

ADC 318 Country Codes in the DODAAD

1. ORIGINATING SERVICE/AGENCY AND POC INFORMATION:

- a. **Service/Agency:** Defense Logistics Management Standards Office (DLMSO)
- b. **Originator:** Mr. Robert Hammond, DLMSO, DOD Activity Address Directory Process Review Committee Chair, email Robert.Hammond@dla.mil

2. FUNCTIONAL AREA: DOD Activity Address Directory (DoDAAD)

3. REFERENCE:

- a. DoD 4000.25-M, Defense Logistics Management System (DLMS) DLMS Volume 6 (DoD Logistics Systems Interoperability Support Services), Chapter 2 - Department of Defense Activity Address Directory

4. REQUESTED CHANGE:

- a. **Description of Change:** This change documents the procedures that are applicable to the country code listing of the DoDAAD and procedures for notifying CSPs of country code changes. This change reiterates that CSPs are responsible for ensuring that their Component DODAAC information is current and that Component CSPs must take action to ensure DoDAAC country code information is validated whenever there is a change to the country code listing. This change also excludes activity codes applicable to programs and not to countries from being entered into the address field of the DODAAD.

b. **Background:**

- (1) The DoDAAD contains five different country and activity code fields: International Standards Office two digits (ISO-2), International Standards Office three digits (ISO-3), Federal Information Processing Standard (FIPS), Foreign Military Sales (FMS) and MILSTRIP, which are all used by different Components. Because one field must always be populated with a code for database purposes, the ISO-2 field will always be populated, even if DLMSO must assign a pseudo code. When a pseudo code is assigned for an ISO-2 value, a pseudo code is also assigned for the ISO-3 value. Pseudo codes are annotated in the Country Code database.
- (2) Pseudo codes are assigned in two cases. The first case is when FMS assigns an activity code applicable to a program and not to a country. This change proposal excludes these activity codes applicable to programs and not to countries from being entered into the address field

of the DODAAD.

- (3) The second case is when FIPS, FMS or MILSTRIP have assigned a code to a region that is not uniquely recognized by ISO. This topic was discussed at the DODAAD PRC on 10 March 2009, along with possible options for resolution. As this issue is more complex and would involve programming changes, it was agreed that this issue will be dealt with in a future change proposal, if needed. In the interim, DAASC will label the output screen of DAASINQ and eDAASINQ to indicate that the ISO-2 and ISO-3 fields contain pseudo codes.

c. **Procedures:** The following requirements outline the procedures required. Changes to DoDAAC procedures will be updated in the DoDAAD User Guide, and the updated guide will be published when the changes are moved to production.

- (1) **Update the DoDAAD Country Code listing.**
 - o DLMSO is responsible for updating the DoDAAD Country Code listing. Changes to the country code listing originate from several sources: ISO-2, ISO-3, FIPS, FMS or MILSTRIP. When a new country or activity is added, changed or deleted, DLMSO updates the DoDAAD country code listing.
- (2) **Notification of country code changes**
 - o The country code list is distributed as a complete list. DLMSO will highlight any changes from the prior version in blue and bold lettering. The complete listing will be sent to DAASC to replace the outdated version.
 - o DLMSO will make the country code listing available for download from the DLMSO website. DAASC will replicate the country code table to Army and Air Force. Both Army and Air Force have unique update requirements, and maintain separate DoDAAD applications. Updates from Army and Air Force are sent to DAASC to be included in the DoDAAD master database on a near real-time basis.
 - o MILSTRIP country and activity code changes are issued by DLMSO in the form of a memorandum. The memorandum will describe the change and will list all five country or activity codes (if applicable). Upon receipt of a country code memorandum, CSPs will screen their DoDAACs for any required changes.
- (3) **Country Code DoDAAC drop down list requirement**
 - o In addition to the exclusion of inactive codes from the Country Code drop down list, this proposal will also exclude those codes assigned for the identification of programs and organizations. By expanding the use of the “inactive” column (now called “Activity, Program or Inactive Country (no drop down)”) no programming changes will be required to any of the system that uses this table. However, activity codes assigned to programs and organizations

that should be excluded from use as physical country locations in the DODAAC address will not be available in the drop down list for updating/establishing DODAACs for the country code field.

(4) **DAASINQ/eDAASINQ.**

- o DAASC will add a label to the DAASINQ/eDAASINQ display indicating that the ISO-2 and ISO-3 columns contain pseudo codes.

5. REASON FOR CHANGE: The DoDAAD country code list currently contains activity codes which identify programs and organizations, which may be applicable to a specific country or multiple countries, but are not appropriate for use in identifying a physical country for shipping, billing, or other address types. This change excludes the inclusion of activity codes for the DoDAAD dropdown list while maintaining the entire set of country/activity code for internal validation within both the DoDAAD and MAPAD.

6. ADVANTAGES AND DISADVANTAGES:

a. Advantages: Clarifies the use of pseudo country/activity codes, and excludes activity codes from being selected in the drop down list for web update of DODAACs.

b. Disadvantages: None noted.

7. IMPACT:

a. Data Content/Procedures: This enhancement will not require any programming changes. The Inactive flag is already being used to exclude value from the country code dropdown listing.

b. DAASINQ and eDAASINQ. DAASC will label the output screen of DAASINQ and eDAASINQ to indicate that the ISO-2 and ISO-3 fields contain pseudo codes.

c. Unresolved Issues: The use of pseudo codes in the ISO-2 and ISO-3 fields will be addressed in a future change proposal, if needed.

d. Publication: This change will impact the DoDAAD User Guide maintained by DAASC.

Enclosures:
