June 02, 2017

MEMORANDUM FOR SUPPLY PROCESS REVIEW COMMITTEE (PRC) MEMBERS

SUBJECT: Approved Defense Logistics Management Standards (DLMS) Change (ADC) 1227, Update DLMS 832N Catalog Data Support Transaction to Add Catalog Data Elements for Air Force Contractor Inventory Control Point (CICP) Use under Government-Furnished Property-Accountability (GFP-A) Capability Initiative (Supply)

We are forwarding the attached approved change to DLM 4000.25, Defense Logistics Management Standards (DLMS), for implementation. The Enterprise Business Standards Office will post the updated DLMS Implementation Convention (IC) to the Web at www.dlms.dla.mil/eLibrary/TransFormats/140_997.asp, within 10 days from the above date.

Addressees may direct questions to Ms. Ellen Hilert, DOD MILSTRIP Administrator and Mr. Eric Flanagan, DOD MILSTRIP Administrator (Alternate) at e-mail: DLMSsupply@dlal.mil. Others must contact their designated Supply PRC representative available at www.dlms.dla.mil/eLibrary/ServicePoints/allpoc.asp.

HEIDI M. DAVEREDE
Program Manager

Attachment to ADC 1227
**Update DLMS 832N Catalog Data Support Transaction to Add
Catalog Data Elements for Air Force Contractor Inventory Control
Point (CICP) Use under Government-Furnished Property-
Accountability (GFP-A) Capability Initiative**

1. ORIGINATING SERVICE/AGENCY AND POC INFORMATION:

a. **Technical POC:** Mr. John “Jack” Dillon, HAF/A4PT; 937-904-0815; DSN: 674-0815; or email: john.dillon.2.ctr@us.af.mil

b. **Functional POC:** Mr. Colquitt “Quitty” Lawrence, HAF/A4LR; 240-612-4220; DSN: 612-4220; or email: colquitt.lawrence.civ@mail.mil

2. FUNCTIONAL AREA:

a. **Primary/Secondary Functional Area:** Supply

b. **Primary/Secondary Functional Process:** GFP accountability

3. REFERENCES:

a. [DLM 4000.25](#), Defense Logistics Management Standards (DLMS), Volume 2, Supply Standards and Procedures

b. [DoDD 8190.01E](#), Defense Logistics Management Standards (DLMS)

c. [DoDI 5000.64](#), Accountability and Management of DOD Equipment and Other Accountable Property

4. APPROVED CHANGE(S): Substantive updates subsequent to PDC staffing are **highlighted in green.**

a. **Brief Overview of Change:** In order to establish Air Force GFP accountability, Air Force CICPs are now required to share inventory accounting transactions with the Air Force accountable property system of record (APSR). The APSR will maintain the Air Force accountable property record for all Air Force-owned contractor-managed and possessed materiel. This change authorizes and adds data elements to the DLMS 832N Catalog Data Support transaction to allow Air Force CICPs to transmit catalog data pertaining to non-cataloged property (equipment and materiel) identified by local stock number (LSN) to the GFP-A APSR (Defense Property Accountability System (DPAS)). The APSR will maintain the Air Force accountable property record for all Air Force owned contractor managed and possessed property.

b. Background:

(1) The term CICP is used to represent a contractor that is assigned the primary responsibility for the materiel management of a group of items, either for a particular Military Service or for the Department of Defense as a whole. In addition to integrated materiel manager (IMM) functions, a CICP may perform other logistics functions in support of a particular Military Service or for a particular end item (e.g. centralized computation of retail requirements levels and engineering tasks associated with weapon system components).

(2) For the purposes of DLMS logistics procedures, the term CICP is also used to identify Contractor Operated and Maintained Base Supply (COMBS) contractors whose support includes supply of aircraft, engine and support equipment components, materiel, and consumables as well as off-aircraft repair, overhaul, and replenishment. COMBS contractors are responsible for having parts on hand to perform off-aircraft maintenance and for repairing the turned in parts. COMBS contractors perform both wholesale and retail functions.

(3) CICPs, including COMBS contractors, are required to maintain and report accountability for Air Force owned contractor-managed and possessed property. However, Air Force GFP accountability is incomplete because the Air Force is unable to track end-to-end, logistics and financial transactions, provide total asset visibility, and report materiel inventory values in an accurate and timely manner. DODM 4140.01 Volume 5 (Reference 3.a.), Enclosure 3, subparagraph: 2.b.(4)(e), requires Services to “take applicable actions necessary to ensure that the physical on-hand quantity and the total item property record quantity are in agreement for all DoD materiel that is not in the physical custody of DoD storage activities.”

(4) The Air Force chartered the GFP-A Capability Initiative to provide property accountability/control of contractor-managed and possessed Air Force-owned property (inclusive of materiel and equipment) through implementation of standard and integrated Air Force logistics and contractor processes to address a material weakness on the Air Force financial statements. This capability will establish and maintain accountable inventory records for GFP that reflect current quantity, status, location, condition, and authorizing contract; and establish an audit trail to update and track end-to-end logistics and financial transactions.

(5) Contractor-managed and possessed GFP is the sole focus of this capability initiative. The above problem statement does not apply to the other types of GFP, as the Air Force has materiel solutions in place for the reporting of logistics and financial data. Only Air Force-owned property will be reported in the Air Force APSR established under the GFP-A Capability Initiative. Air Force CICPs often use commercially available inventory management systems (IMSSs) to manage Air Force-owned property and to record inventory affecting accounting transactions.

(6) The Air Force has selected the DPAS as its APSR for contractor-managed and possessed Air Force-owned GFP. Air Force CICPs, using their own inventory management systems, will provide catalog-like data to the Air Force APSR. The contractor is the source of this information, which is similar to standard catalog data. The Air Force APSR maintains the data fields used to track the contractor-provided catalog data. As the item manager, the Air Force CICP is responsible for identifying and providing the appropriate values to the Air Force APSR. The

asset master record in Air Force APSR must mirror the asset information in the CICIP's IMS at all times. Additional data elements must be authorized within DLMS transactions in order to maintain accurate records.

c. Approved Change in Detail: This change updates the DLMS 832N Catalog Data Support transaction to include a new information exchange requirement along with the supporting data elements. The new data elements will allow Air Force CICIPs to transmit LSN catalog data to the Air Force APSR. Enclosure 4 contains the new catalog data elements that are included in this change. Air Force CICIP inventory management systems and Air Force APSR asset detail information must mirror each other at all times to maintain accurate accountability.

d. Updates to DLM 4000.25 Manuals:

(1) Update DLM 4000.25, Volume 2, Chapter 23, as shown in Enclosure 1.

(2) Update DLMS 832N Catalog Data Support, as shown in Enclosure 3.

e. Approved Transaction Flow: See Enclosure 2 for the transaction flow diagram.

(1) The Air Force CICIP transmits a DLMS 832N to the Air Force APSR after updating LSN catalog data.

(2) The Air Force APSR receives the DLMS 832N and updates its master record so that it is a mirror image of the CICIP's inventory management system.

f. Alternatives: Without this interface, the Air Force Program Manager (PM) (or designee) must manually enter the data into the Air Force APSR, which could result in data and/or data reconciliation errors. Additionally, data reconciliation errors could occur if the Air Force PM and the Air Force CICIPs do not update the data on the same day. These errors would result in additional workload to determine the cause of the error, document the reason for error, and resolve the error.

5. REASON FOR CHANGE: This change supports the Air Force GFP-A Capability Initiative, Financial Improvement and Audit Readiness (FIAR), and addresses material weaknesses on Air Force financial statements. This change also allows Air Force CICIPs to communicate LSN catalog data changes to the Air Force APSR. Adding GFP-A LSN catalog data elements will ensure Air Force APSR asset accountability records reflect current item details as recorded in the Air Force CICIP IMS.

6. ADVANTAGES AND DISADVANTAGES:

a. Advantages: This change provides an automated method to update item details in the Air Force APSR, which does not currently exist.

b. Disadvantages: This change requires resources for system modifications to accommodate the Air Force's CICIP catalog data changes described in this change.

7. ADDITIONAL COMMENTS TO CONSIDER:

a. The Air Force GFP-A Capability Initiative relies on DLMS transactions from the Air Force CICPs to accurately record catalog data for LSN items. A manual workaround is required in the absence of the capability to use DLMS transactions to transmit LSN catalog data to the Air Force APSR, which increases the risk of misreporting the Air Force contractor-managed and possessed Air Force-owned assets on its financial statements.

b. Air Force CICPs are the sole source for the LSN catalog data for the assets they manage. The Air Force APSR will receive Air Force CICIP-managed NSN catalog data through a FLIS, which is outside of the scope of this change.

8. ADDITIONAL FUNCTIONAL REQUIREMENTS:

a. This change includes data elements that identify a requirement for serialized management for nonstandard (LSN) items. Unique item level traceability for nonstandard items is beyond the scope of the procedures currently authorized by the DOD Integrated Requirements Set (IRS) for item unique identification (IUID) or DLMS procedures for serialized item management/tracking. The exchange of LSN catalog data between the Air Force APSR and Air Force CICPs will enable interaction with the Army Logistics Information Warehouse (LIW). The Air Force APSR will update LIW based upon cataloged item characteristics for serial number tracking and applicable DLMS transactions received from the CICPs containing serial numbers. The Enterprise Business Standards Office will staff PDC 1230 (under development) to delineate which transactions will carry serial numbers when reporting logistics events applicable to the serially tracked LSNs.

b. Key data elements facilitating identification of the tracking requirement are:

- Product Description Code BKM (Item is Bulk Managed)*
- Product Description Code SSR (Secondary Serial Number Required)
- Product Description Code UVF (The Unique Item Identifier (UII) for this Item Requires Verification Against the IUID Registry)
- Reportable Item Control Code (RICC). See value listed in Enclosure 4.

Staffing Note for ODASD (SCI): Request coordination with the DOD IUID Working Group for development of overarching guidance applicable to serialized item management/tracking of nonstandard materiel.

9. ESTIMATED TIME LINE/IMPLEMENTATION TARGET: Target implementation date is May 2017.

10. ESTIMATED SAVINGS/COST AVOIDANCE ASSOCIATED WITH IMPLEMENTATION OF THIS CHANGE: The Air Force is unable to estimate at this time; and does not have adequate data to calculate cost of manual workaround.

* If an item is not bulk managed (i.e., BKM is set to "N,") the item is serially managed.

11. IMPACT:

a. **New DLMS Data Elements:** New DLMS data elements added under this change are shown below. See Enclosure 4, Air Force LSN Catalog Data, for data element definitions and characteristics.

- (1) Accounting Requirements Code
- (2) Additional Information
- (3) Asset Category Code
- (4) Asset Sub Category
- (5) Catalog
- (6) Controlled Item Code
- (7) Expendability, Recoverability, Reparability, Category Code
- (8) Fiduciary Depreciation Method Code
- (9) Line Item Number/Table of Authorized Material Control Number
- (10) National Item Identification Number Status Code
- (11) Product Description Code
- (12) Recommended Service Life
- (13) Recoverability Code
- (14) Reportable Commodity Type
- (15) Reportable Item Control Code
- (16) Security Commodity Type
- (17) Shelf Life Period
- (18) Storage Requirement Code
- (19) Temperature Controlled Code
- (20) Type Asset Code
- (21) Utilization Measure Code
- (22) Utilization Service Life

b. **Changes to DLMS Data Elements:** Code AP Accountable Property Book is added to 2/BCT01/0100 (Catalog Purpose Code).

c. **Automated Information Systems (AIS):** This change applies to the Air Force APSR (DPAS) and Air Force CICP systems. This change does not impact other Component AISs.

d. **DAAS:** DLMS 832N mapping updates are required.

e. **Non-DLM 4000.25 Series Publications:** Update DOD Component level procedures as necessary to document applicable requirements.

12. PDC 1227 Response/Comment Table:

| Component | Component Responses Received | DLMS Response |
|------------------|-------------------------------------|----------------------|
| Air Force | Concur without comment. | Noted. |
| Army | Concur without comment. | Noted. |
| USMC | Concur without comment. | Noted. |
| Navy | Concur without comment. | Noted. |
| DLA | Concur without comment. | Noted. |
| DAAS | Concur without comment. | Noted. |
| USTRANSCOM | Abstains | Noted. |

Enclosure 1, Update to DLM 4000.25, Volume 2, Chapter 23

The following paragraphs are updated as indicated. Insertions are identified by *red, bold, italics*. Deletions are identified by ~~double-strikethrough~~.

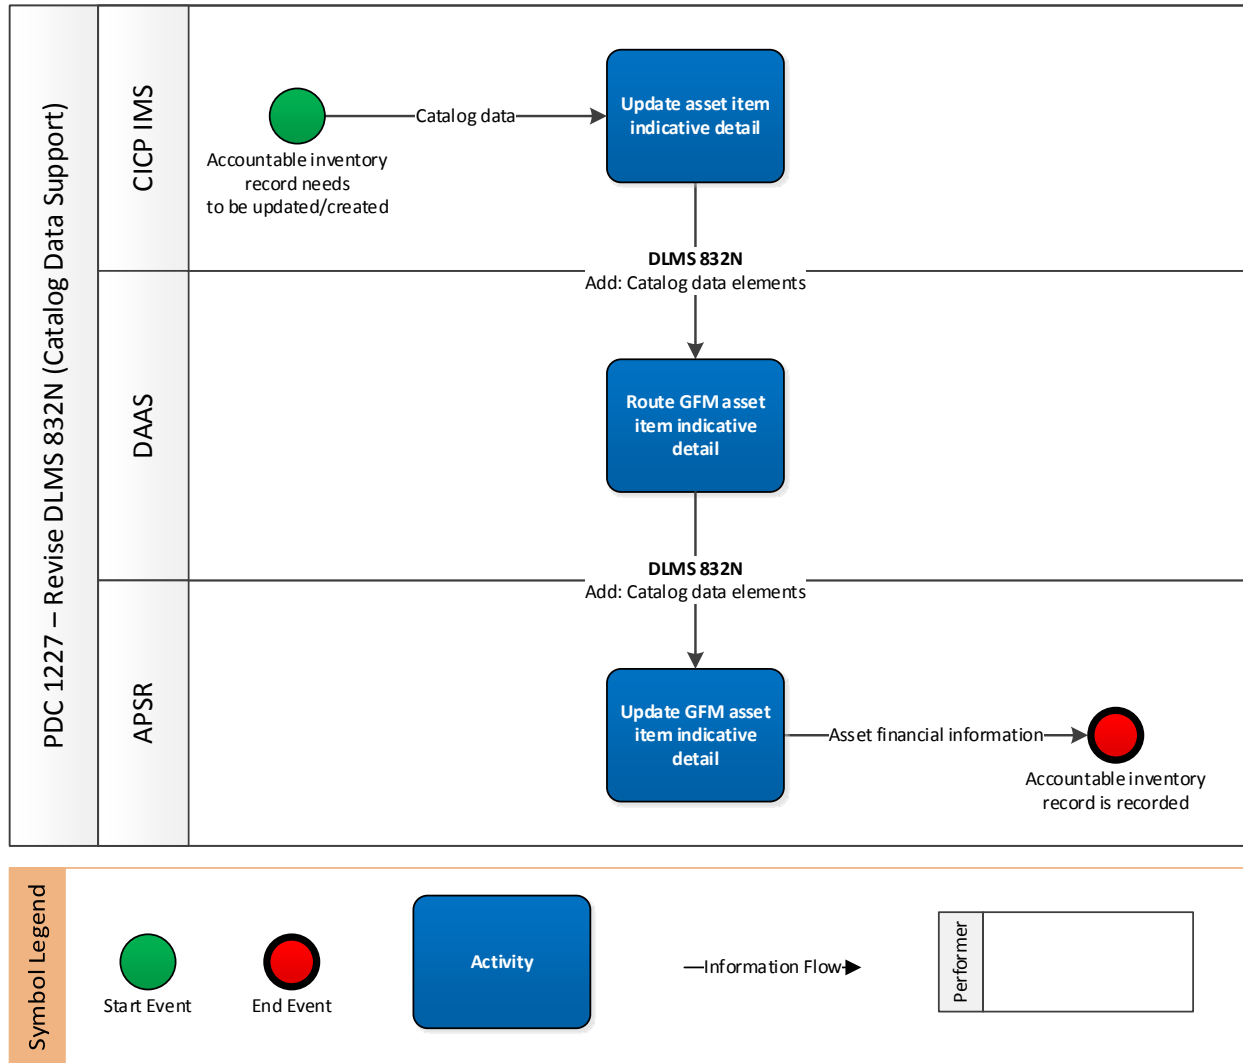

C23.5. Air Force Government Furnished Property Accountability

C23.5.1. Air Force Background: The Air Force chartered the Government Furnished Property-Accountability (GFP-A) Capability Initiative to provide property accountability/control of Air Force-owned, contractor-managed and possessed property by implementing standard and integrated processes. This capability establishes and maintains accountable inventory records for GFP assets managed by the Air Force contractor inventory control points (CICPs), and makes them visible in the Air Force accountable property system of record (APSR).

C23.5.1.1. Air Force CICPs will use their own inventory management systems to send catalog data for local stock number (LSN) items to the Air Force APSR. The contractor is the source of this information, which is similar to standard catalog data. The Air Force APSR maintains the data fields used to track the contractor-provided catalog data. As the item manager, the Air Force CICIP is responsible for identifying the appropriate values to be provided to the Air Force APSR. The Air Force APSR's asset master record must mirror the asset information in the CICIP's IMS at all times.

C23.5.1.1.1. The Air Force CICPs will send catalog data when a new LSN is added to its contractual requirements, or when information for a previously assigned LSN changes. The Air Force CICIP will transmit a DLMS 832N to the Air Force APSR after processing the update to reconcile the information between the two systems. The Air Force APSR will process the DLMS 832N and update its master record for the affected asset(s).

Enclosure 2 GFM-A LSN Catalog Data Support Transaction Flow Diagram

Enclosure 2 Narrative

| | | |
|---|--|--|
| 1 | Update asset item indicative detail | Air Force Contractor Inventory Control Point (CICP) determines that item catalog data must be entered or updated for an LSN. Air Force CICP updates the item indicative data in their Information Management System (IMS). Air Force CICP IMS sends DLMS 832N including item indicative detail through DAAS to Air Force APSR. |
| 2 | Route GFP asset item indicative detail. | DAAS receives DLMS 832N including item indicative detail and routes it to the Air Force APSR. |
| 3 | Update GFP asset item indicative detail. | Receives DLMS 832N including catalog-like data for LSNs and updates the asset's master record in the Air Force APSR. |

Enclosure 3, Updates to the DLMS 832N Catalog Data Support Transaction

Update the DLMS 832N implementation convention (IC) as shown:

| # | Location | DLMS 832N Catalog Data Support | Reason |
|----|----------------------------|--|--|
| 1. | DLMS IC Introductory Notes | <p><u>Add ADC 1227 to the list of applicable DLMS changes included in the DLMS IC introductory notes on the IC cover page:</u></p> <p>- ADC 1227, Revise DLMS 832N Catalog Data Support Transaction to Add Catalog Data Elements for intra-Air Force Use</p> | Identifies DLMS changes included in the IC. |
| 2. | DLMS IC Introductory Notes | <p><u>Revise Introductory DLMS Note 9</u></p> <p>9. | 21. | 2/LQ01/3400 | <p><u>Modify DLMS Note:</u></p> <p>90 Precious Metals Indicator Code DLMS Note: <i>1. Use to identify items that have precious metals as part of their content (FLIS DRN 0802).</i> <i>2. Must use for Air Force GFP-A. Refer to ADC 1227.</i></p> <p><u>Modify DLMS Note:</u></p> <p>91 Automated Data Processing Equipment Identification Code DLMS Note: 1. Use to indicate if an item contains automated data processing equipment (FLIS DRN 0810). <i>2. Must use for Air Force GFP-A. Refer to ADC 1227.</i></p> <p><u>Modify DLMS Note:</u></p> <p>EQ Controlled Item Inventory Code DLMS Note: <i>1. Indicates the security classification and/or security risk or pilferage controls for storage and transportation of DOD assets (FLIS DRN 2863).</i> <i>2. Must use for Air Force GFP-A. Refer to ADC 1227.</i></p> <p><u>Modify DLMS Note:</u></p> <p>FD Demilitarization Code DLMS Note: <i>1. Use to identify each item requiring demilitarization and the type of demilitarization required (FLIS DRN 0167).</i> <i>2. Must use for Air Force GFP-A. Refer to ADC 1227.</i></p> <p><u>Add Qualifier and DLMS Note:</u></p> <p>ACT Asset Category Code (ACC) DLMS Note: <i>1. Must use for Air Force GFP-A to identify the Air Force APSR's asset category for an item managed under a particular stock number. The ACC must correspond with the correct Type Asset Code. Refer to ADC 1227.</i> <i>2. Local code ACT is established for use in the 832N, version 4030. A data maintenance action will be submitted to establish 'ACT- Asset Category Code' in a future version.</i></p> <p><u>Add Qualifier and DLMS Note:</u></p> | Identifies the new LSN catalog data elements that will use DLMS qualifiers and associated code lists. |
|-----|-------------|--|---|

ACS Accounting Requirements Code

DLMS Note:

- 1. Must use for Air Force GFM-A to designate an asset as expendable, non-expendable, or durable. Refer to ADC 1227.*
- 2. Local code ACS is established for use in the 832N, version 4030. A data maintenance action will be submitted to establish 'ACS- Accounting Requirements Code ' in a future version.*

Add Qualifier and DLMS Note:

ACU Controlled Item Code

DLMS Note:

- 1. Use for Air Force GFP-A to indicate whether an item is a controlled asset. Refer to ADC 1227.*
- 2. Local code ACU is established for use in the 832N, version 4030. A data maintenance action will be submitted to establish 'ACU-Controlled Item Code' in a future version.*

Add Qualifier and DLMS Note:

**ACV Expendability, Recoverability, Reparability
Category (ERRC) Code**

DLMS Note:

- 1. Use to denote the expendability, recoverability, reparability category employed in management of an item of supply within the Air Force (FLIS DRN 2655).*
- 2. Use for Air Force GFP-A. Refer to ADC 1227.*
- 3. Local code ACV is established for use in the 832N, version 4030. A data maintenance action will be submitted to establish 'ACV- Expendability, Recoverability, Reparability Category (ERRC) Code' in a future version.*

Add Qualifier and DLMS Note:

ACW Fiduciary Depreciation Method Code

DLMS Note:

- 1. Must use for Air Force GFP-A to indicate the depreciation method for assets assigned to a particular stock number. Refer to ADC 1227.*
- 2. Local code ACW is established for use in the 832N, version 4030. A data maintenance action will be submitted to establish 'ACW- Fiduciary Depreciation Method Code' in a future version.*

Add Qualifier and DLMS Note:

ACX National Item Identification Number (NIIN) Status Code

DLMS Note:

- 1. Use for Air Force GFP-A to identify the current state of a national identification number (NIIN) (FLIS DRN 2670). Refer to ADC 1227.*
- 2. Local code ACX is established for use in the 832N, version 4030. A data maintenance action will be submitted to establish 'ACX- National Item Identification Number (NIIN) Status Code' in a future version.*

Add Qualifier and DLMS Note:

ACY Recoverability Code (Army)

DLMS Note:

- 1. Use for Air Force GFP-A to indicate that a transaction has been recovered for reprocessing (FLIS DRN 2892). Refer to ADC 1227.*
- 2. Local code ACY is established for use in the 832N, version 4030. A data maintenance action will be submitted to establish 'ACY- Recoverability Code' in a future version.*

Add Qualifier and DLMS Note:

ACZ Reportable Item Control Code (RICC)

DLMS Note:

- 1. Use for Air Force GFP to indicate that an item must be reported to the Army Logistics Information Warehouse (LIW) and/or the LSN serially managed/tracked. Refer to ADC 1227.*
- 2. Local code ACZ is established for use in the 832N, version 4030. A data maintenance action will be submitted to establish 'ACZ- Reportable Item Control Code (RICC)' in a future version.*

Add Qualifier and DLMS Note:

AD1 Storage Requirement Code

DLMS Note:

- 1. Must use for Air Force GFP-A to indicate if an item must be stored indoors or outdoors. Refer to ADC 1227.*
- 2. Local code AD1 is established for use in the 832N, version 4030. A data maintenance action will be submitted to establish 'AD1- Storage Requirement Code' in a future version.*
