ADC 440
Change to DoDAAC Authority Code Assignment Process

1. ORIGINATING SERVICE/AGENCY AND POC INFORMATION:

- a. **Service/Agency:** DLA Logistics Management Standards, DLA J627
- b. **Originator:** DLA Logistics Management Standards

2. FUNCTIONAL AREAS: DOD Activity Address Directory (DoDAAD)/Supply

3. REFERENCES:

- a. DoD 4000.25-M, Defense Logistics Management System (DLMS) Volume 6 (DoD Logistics Systems Interoperability Support Services), Chapter 2 - Department of Defense Activity Address Directory
- b. DOD 4000.25-1-M Military Standard Requisition and Issue Procedures (MILSTRIP)

4. REQUESTED CHANGES:

- a. **Description of Change:** This change is to require the user to make a decision about which Authority Code to assign when creating a new DoDAAC vice defaulting to Authority Code “00”.

- b. **Background:**

- (1) The Authority Code was added to the DoDAAC in March 2007 and established to restrict requisitioning, shipment and billing authority. The most comprehensive authority is “00”, which allows authority to requisition, ship-to or bill-to. All other Authority Codes limit authorized use (e.g., ship-to only or bill-to only).
- (2) DLA Transaction Services performs some edits on DLMS transactions, based on the DoDAAC authority code.
- (3) To minimize the impact on the Central Service Points (CSPs) of initiating the Authority Code into the DoDAAD database, the default value was set to “00” (full authority) during initial implementation.
- (4) The CSPs have had several years to review these initial default settings and change those Authority Codes that should be set to values other than “00”. This change is the next step in the progression.

(5) Authority Codes are shown in enclosure (1).

c. **Procedures:** The following procedures are approved:

(1) For the DLA Transaction Services DoDAAC web update application, the Authority Code will be set to null (no value) for new DoDAACs. Since the Authority code is a required field, this will require the CSP to select a valid Authority Code from a drop down menu before the newly created DoDAAC can be saved.

(2) Army and Air Force must make similar changes in their DoDAAC update applications. The Army's AESIP system must also change to require the Authority Code to be set by the CSP rather than default to "00". Authority Codes from Air Force will continue to follow the inference rules established at DLA Transaction Services in the near term. However, Air Force must add the Authority Code to their DoDAAC update application, so these codes may be set directly in the future.

(3) Change drop down description of Authority Code "04" in the table from "DRMS Only" to "DLA Disposition Services Only" to reflect the name change.

5. **REASON FOR CHANGE:** CSPs need to make a proactive choice to set the Authority Code.

6. **ADVANTAGES AND DISADVANTGES**

a. **Advantages:** This change will encourage the CSP to think about the purpose of the DoDAAC when it is created.

b. **Disadvantage:** None noted.

7. **IMPACT:**

a. **Implementation:** DLA Transaction Service will implement the change as soon as possible.

b. **Publication:**

(1) DoD 4000.25-M Volume 6, chapter 2, table reference C2.T1 (Authority Codes) must be replaced with Authority Code table shown in enclosure (1).

(2) DoD 4000.25-1-M, chapter 2, table reference Figure C2.F1 (DODAAC Authority Codes) must be replaced with Authority Code table shown in enclosure (1).

8. **ESTIMATED SAVINGS/COST AVOIDANCE ASSOCIATED WITH IMPLEMENTATION OF THIS CHANGE:** None noted.
