ADC 1384

Drop Numeric State Codes from DoDAAD

1. ORIGINATING SERVICE/AGENCY AND POC INFORMATION: Enterprise Business Standards Office (EBSO), DoDAAD PRC Chair, Richard Morrow, at 571-527-6692, email: EBSO.DoDAAD@dla.mil.

2. FUNCTIONAL AREA LOGISTICS AND TRANSACTION CHANGES: DoDAAD

3. REFERENCE: DLM 4000.25, Defense Logistics Management Standards (DLMS), Volume 6, Chapter 2, Department of Defense Activity Address Directory.

4. REQUESTED CHANGE(S): Remove the numeric state codes (i.e., T1_STATE_N, T2_STATE_N, and T3_STATE_N) from each of the Type Address Code (TAC) addresses in the DoDAAD.

a. Background:

(1) In June 1970, U.S. Federal Information Processing Standard Publication ("FIPS PUB") defined both numeric and two-letter alphabetic codes to identify U.S. States and the freely associated states, and trust territory (e.g., American Samoa, Guam, Puerto Rico, U.S. Minor outlying Islands). Based on that guidance from FIPS, DAAS added both the two-letter alphabetic and the two-numeric state codes to the DoDAAD.

(2) In May 1987, FIPS issued FIPS PUB 5-2, omitted the previously reserved numeric state codes for the American territories without comment.

(3) On September 2, 2008, NIST withdrew FIPS 5-2 (along with nine other standards) as a Federal Information Processing Standard. The FIPS country codes were dropped from the DoDAAD database and replaced with Geopolitical Entities, Names, and Codes (GENC), but the numeric state codes were overlooked. This change corrects that oversight.

b. Approved Change in Detail:

(1) DAAS. Remove the numeric state codes (i.e., elements T1_STATE_N, T2_STATE_N, and T3_STATE_N) from the DoDAAD database.

(2) DAAS. Remove the numeric state codes from DoDAAD update, DAASINQ, eDAASINQ, download files, XML, Oracle Replication, and any other application where numeric state codes are currently found.

(3) Currently, no other systems require the numeric state codes, so this change should not have an impact on any other system supported by the DoDAAD database.
