3 REQUESTED CHANGE

3.1 BRIEF OVERVIEW OF CHANGE

This Cataloging Data Change approves the addition of Army Materiel Category Codes EO, ES, and J7 to Cataloging Data and Transaction Standards, Volume 10, Table 65, Army Materiel Category Codes, Position 4 and 5, as requested by US Army.

3.2 REQUESTED CHANGE IN DETAIL

3.2.1

Found within Cataloging Data and Transaction Standards, Volume 10, Table 65, the Army Materiel Category Code is a five-position alphanumeric code that indicates the financial category of an item for Army accountability. Position 4 of the Army Materiel Category Code signifies special or specific groups of items on a generic basis. In conjunction with Position 4, Position 5 identifies a specific weapon system/end item or homogenous group of items.

US Army requested the addition of the Position 4 and 5 combinations EO, ES, and J7 with corresponding weapon system descriptions to Cataloging Data and Transaction Standards, Volume 10, Table 65.

3.2.2

This change requires the following additions to DB2 Table 172. Codes EO, ES, and J7 have already been implemented.

AR_MCC_SG_CD1_2167	AR_MCC_SG_TX1_2168
EO	GUIDED SECTION GUIDED MISSILE
ES	PRECISION STRIKE MISSILE
J7	ABRAMS FMS FAMILY OF VEHICLES

No changes are required to Volume 11 as the edit criteria cites Tables 65 and 121 overall instead of actual code edits of each table and subsequent requirements. No changes are required to Table 121.

3.3 REASON FOR CHANGE

This change allows US Army to identify and support three new specialty programs.

3.4 REVISIONS TO CATALOGING DATA AND TRANSACTION STANDARDS

The new Position 4 and 5 codes and corresponding weapon system descriptions will be added to Volume 10, Table 65, Position 4 and 5 section. See enclosure for detailed changes to Table 65.
