### 3 REQUESTED CHANGE

---

#### 3.1 BRIEF OVERVIEW OF CHANGE

This Administrative Approved Cataloging Data Change (ACDC) documents the addition of the new Navy Special Materiel Identification Code JT, (KC-130J/C-130T Common Airframe), as requested by USN.

#### 3.2 REQUESTED CHANGE IN DETAIL

##### 3.2.1 Background

Per Cataloging Data and Transactions Standards, Volume 10, Table 60, the Navy Special Materiel Identification Code (SMIC) is a “two-position alphanumeric code used by the Navy to categorize materiel on the basis of requirements for source or quality control; technical design or configuration control; procurement, stocking and issue control; special receipt, inspection, testing, storage, or handling.”

##### 3.2.2 US Navy Special Materiel Identification Code (SMIC) JT

US Navy requested the addition of Navy SMIC JT, (KC-130J/C-130T Common Airframe).

This new US Navy code, implemented on November 19, 2019, made the following addition to DB2 Table 254, NVY\_SPEC\_MTL\_ID\_CD:

<b>SMIC_NVY_2834</b>	<b>SP_MAT_APL_IK_3155</b>
JT	KC-130J/C-130T COMMON AIRFRAME

#### 3.3 REASON FOR CHANGE

This change documents the US Naval aviation requirement for SMIC identifier “KC-130J/C-130T Common Airframe” within Navy ERP. USN requires this new code to more closely monitor and control special stock related to the KC-130 J/C-130T missions.

### 3.4 REVISIONS TO CATALOGING DATA AND TRANSACTION STANDARDS

See enclosure for changes to Cataloging Data and Transaction Standards, Volume 10, Table 60, Navy Special Materiel Identification Code.
