MEMORANDUM FOR FEDERAL CATALOGING COMMITTEE (FCC)

SUBJECT: Administrative Approved Cataloging Data Change (ACDC) 0044, Addition of 3 New Data Record Numbers (DRNs), and Changes to Existing DRNs for XML NATO Use Only (NDER)

     We are forwarding the attached approved administrative change to Cataloging Data and Transaction Standards, Volume 12 for immediate implementation. The Enterprise Business Standards Office (EBSO) will post the actual implementation date of associated updates to the Federal Logistics Information System (FLIS) on the web once the FCC Chair/Secretariat provides the information. EBSO will publish the updated CDTS, Volume 12 upon completion of the next change cycle.

     Addressees may direct questions to the Cataloging Data Standards (CDS) Team at EBSO.CDS@dla.mil.

TERESA W. SMITH
Director, Strategic Data Services
DLA Information Operations

# Administrative ACDC 0044
# Addition of 3 New DRNs, and Changes to Existing DRNs for XML NATO Use Only (NDER)

## 1 ADMINISTRATIVE INFORMATION

### 1.1 ORIGINATING SERVICE/AGENCY:

Defense Logistics Agency (DLA) J34 North Atlantic Treaty Organization (NATO) Cataloging Allied Committee 135 (AC/135) - **Panel A tracking number:** LOGINFO-02-19-0050

### 1.2 POINT OF CONTACT:

- Woodrow (Woody) Haroff, DLA J3, Woodrow.Haroff@dla.mil
- Justin Emmons, J34, Justin.emmons@dla.mil

### 1.3 EXPEDITED HANDLING REQUIRED: YES

### 1.4 ADMINISTRATIVE CDC ELIGIBLE CODE TABLE CHANGES: N/A

## 2 IMPACT

### 2.1 SYSTEM IMPLEMENTATION MUST BE COMPLETED BY:

During the NATO Transformation Steering Working Group end of February 2020, one of two international IT providers supporting the majority of the NATO AC/135 Nations laid out its development timeline to complete their build. The IT provider requires the new XML NATO Only DRNs by 04/01/2020 to support the set timeline for testing in August 2020.

### 2.2 AFFECTED PUBLICATIONS AND/OR DB2 TABLES

| Publications/Transaction | Volume Table Number and Title | FLIS DB2 Table |
|---|---|---|
| Volume 12, Standard Federal Supply Class (FSC) Data | Chapter 5 and 7 | No DB2 Tables effected by this change |

## 2.3  AFFECTED SYSTEMS

This change impacts the Federal Logistics Information System (FLIS), XML Schema elements, the AC/135 Schema, and a FLIS Report for visibility of the aforementioned DRNs.

# 3  REQUESTED CHANGE

## 3.1  BRIEF OVERVIEW OF CHANGE

This change documents the addition of 3 new Data Record Number (DRNs) and changes to existing DRNs for XML NATO use only as requested by the National Directors on Codification Allied Committee 135 (AC/135) via Defense Logistics Agency (DLA) J3.

## 3.2  REASON FOR CHANGE

### 3.2.1  Background for NATO Data Exchange Redesign Project (NDER)

The North Atlantic Treaty Organization (NATO) Data Exchange Redesign (NDER) Project is an effort to modernize existing data exchange communications and business rules within the NATO Codification System (NCS). Led by NATO Allied Committee 135 (AC/135), the NDER project intends to not only adopt a standardized Extensible Markup Language (XML) for transmitting and receiving data, but also lays ground work within NCS for future functionality and growth. The XML schema also has fewer constraints, providing flexibility and opportunities for efficiency.  The projected implementation date is January 2022.

### 3.2.2  CDTS, Volume 12, Addition of New Data Record Numbers (DRNs)

The Allied Committee 135 (AC/135) requested the creation of 3 new Data Record Numbers (DRNs) to be used within the new XML Based Schema. The schema will convey information between FLIS and/or international or NATO Cataloging customers.

The Data Record Number (DRN) is a four position numeric code assigned to a data element in the Federal Logistics Information System (FLIS) or the FLIS Portfolio Workbench (FPW) Customer Data Schema.  The DRN is utilized for edits and validations of data within transactions or Hypertext Markup Language (XML) schemas, and allows the transmitted data to be both viewable and reportable within FLIS.

As the request for the 3 new DRNs was pre-coordinated and approved by AC/135, it meets the eligibility for Administrative ACDC processing.  This Administrative ACDC also serves as documentation of AC/135's approval.

The addition of the aforementioned DRNs allows international users to transmit required information via XML transactions.  Failure to add the 3 elements would result in validation issues and prevent required data from being conveyed back and forth.

### 3.2.3  CDTS, Volume 12, Changes to DRNs

Some previously established DRNs require changes. This includes the removal of verbiage that reads, 'NATO ONLY' where it appears in 'CLEAR TEXT DRN DEFINITION' column in Volume 12, Chapter 7. Chapter 7 -'XML NATO USE ONLY' Identifies the DRN title and definition in clear text form with other pertinent information on the DRN for NATO ONLY.

### 3.3  REVISIONS TO CATALOGING DATA AND TRANSACTION STANDARDS

Changes to CDTS Volume 12 are as follows:

| Enclosure | Updates |
|---|---|
| **Enclosure 1** | CDTS Volume 12, Chapter 7 Additions |
| **Enclosure 2** | CDTS Volume 12, Chapter 5 Additions |

# ENCLOSURE 1

## ADDITIONS AND CHANGES TO CATALOGING DATA AND TRANSACTION STANDARDS, VOLUME 12, CHAPTER 7

*Note: The DRNs listed below are Segment 8-XML and must be reportable within FLIS. J62H will provide this report to J34.*

**Bold red italics** denote additions.  Double Strike-through denote deletions.

| DRN | HOST/COBOL NAME | DB2 DATA ELEMENT NAME | FORMAT | | | CLEAR TEXT NAME OF THE HOST/COBOL NAME | CLEAR TEXT DRN DEFINITION |
| | | | FV | TYPE | LG | | |
