Position	Code	Description
		<p>Note: In addition to the DODAAC, the Marine Corps uses other 5- and 6-position codes within its systems which are not inter-changeable. The following are the most commonly used of these unit identifiers:</p> <p>(1) Financial Unit Identification Code (UIC). A 6-position, numeric identifier which begins with a zero ("0"), used for financial reporting. All Department of the Navy (DON) financial UICs are assigned by the Defense Finance Accounting Service (DFAS) for the Navy Comptroller. The financial UIC is used for units at or above the Sub-Operating Budget (Sub-OpBud) level. In the Marine Corps, when a unit is created at this level of accounting, HQMC (LP) requests a UIC from DFAS for the unit. This UIC is then used to create the "M" DODAAC, which is then loaded to the USMC financial system (SABRS). When the unit is below this level, a DODAAC is created for that unit without first obtaining the UIC from DFAS, and the DODAAC is used within the financial system at a lower level than the SubOpBud, as applicable.</p> <p>(2) Total Force Structure Management System (TFSMS) UIC. A TFSMS UIC is a 6-position, alpha-numeric identifier which is created by HQMC (TFSD) for unit Tables of Organization/Equipment, per MCO 5311.1D. It is not the same as a financial UIC. The TFSMS UIC is used to report readiness in the Defense Readiness Reporting System (DRRS) for standing, reporting units.</p> <p>(3) DRRS-MC UIC. HQMC (POR) creates ad hoc/provisional UICs within DRRS-MC for readiness reporting of task-organized units; same construct as a TFSMS UIC.</p> <p>(4) Reporting Unit Code (RUC). A RUC is a 5-position, alpha-numeric identifier created by HQMC (M&RA) to identify a unit, activity, or sub-reporting unit for manpower reporting in Marine Corps Total Force System (MCTFS). RUCs are also assigned to identify echelons of commands that may not submit Unit Diaries (e.g., division, regiment, aircraft wing, and aircraft group). A RUC is not the same as a DODAAC or UIC.</p>

Deployable Units

The following outlines the rules used by the different Services to distinguish deployable DoDAACs. These rules are based on internal Service policies, and not all Services distinguish deployable DoDAACs.

Service	Rule
Army	Army reports no imbedded intelligence regarding deployed units.
Navy	Navy identifies deployable units, such as ships not in dry dock, with R for Pacific and V for Atlantic.
AF	A few years ago AF established the 5800-series for supplies/equipment/munitions (FB/FE/FV) accounts and the 6900-series for the medical activities (FM DoDAACs). AF believes the 5800- and 6900-series might be the 90% solution.
USMC	Marine Corps uses two constructs for deployable DoDAACs depending upon whether they are for exercises or overseas contingency operations (OCO). See MM and MX series on pages AP1.5-9 through AP1.5-11 above.
