

AP4. APPENDIX 4 – DoD/ASC X12 CONVERSION GUIDE

AP4.1. Three sets of conversion guides contain cross references between DoD domain codes (data item codes) and Accredited Standards Committee (ASC) X12 domain code values. DoD systems that store internal data in DoD format and exchange data in X12-based DLMS format must implement all three conversion guides to convert outbound DoD data values to the corresponding ASC X12 code values and vice versa for inbound data values. The applicable conversion guides are available under the quick links on the Defense Enterprise Data Standards Office Website.
