

AP6. APPENDIX 6 – DEFENSE LOGISTICS MANAGEMENT STANDARDS CODE LISTS/QUALIFIERS

AP6.1. The Defense Logistics Management Standards (DLMS) Implementation Conventions (ICs), also known as DLMS supplements, frequently employ a specific combination of data segments and data elements to convey encoded information. The DLMS qualifiers represent a combination of DoD logistics functional data elements for which the authoritative source is Assistant Secretary of Defense (Logistics & Materiel Readiness) and data elements developed and maintained by other functional data administrators; but, are used in the DLMS, (e.g., procurement, finance, contract administration and personnel). Many of the listed data elements are registered under American National Standards Institute (ANSI) Accredited Standards Committee (ASC) X12 Data Element 1270 (Code List Qualifier Code) and are used in Data Segment LQ identifying the coded entry to its qualifier. The presence of an asterisk (*) in the qualifier code indicates either of the following conditions:

- The entry represents a conversion guide required or used in the legacy 80-record position Defense Logistics Standard Systems/DLMS translation process.
- The entry shows a secondary sequence of a data code within a qualifier (alphabetic/alphanumeric code sequence or clear-text name).
- The entry is a guide for cross-reference of DoD Document Identifier Codes to DLMS ICs.
- The entry identifies a DoD managed code list (qualifier not in 1270).

AP6.2. DLMS codes lists/qualifiers are available on the Defense Logistics Management Standards Program Office Website.
