

AP1. APPENDIX 1 – USTRANSCOM REFERENCE DATA MANAGEMENT REPOSITORY INFORMATION

AP1.1. USTRANSCOM Reference Data Management (TRDM) is a reference data repository operated by USTRANSCOM Air Mobility Command, which stores and manages both standardized and approved non-standard transportation reference data. It provides a one-stop shopping capability for transportation reference tables, the distribution of reference data, and the synchronization of managed transportation data with defined sources.

AP1.2. TRDM users can view data and associated metadata with the codes. The information provided also includes logical name, physical name, definitions, table and field descriptions, and authoritative source information.

AP1.3. TRDM uses data stewards to update the transportation data on prescribed schedules. The data, reference tables, and associated metadata are published on web pages and made available through subscriptions as well. The subscription service automatically sends the transportation data to subscribing automated information systems and authorized end-users.

AP1.4. A valid DoD issued common access card is required to access TRDM. The website for TRDM and user information is: trdmws.maf.ustranscom.mil/trdm/index.html.

AP1.5. To self-subscribe to TRDM, go to trdmws.maf.ustranscom.mil/files/DD2875_TRDM_System_Access_Request.pdf. Click the link to request registration. The registration page requests citizenship status, email address, and a commercial phone number. Once registered, returning to the TRDM page will automatically log you in.
