DLMS Summit May 2024 Action Items

4	

Items 1-7, 16, 18-20, 22-26, 28, and 29 will be combined.

No.	Description	Coordinating Office	Item Status
1	Develop a better BLUF for PDC/ADCs, including: required action, who it impacts, why it's being created/done, what transactions are impacted. Better indicate ADC type (admin, system change, policy, code update, critical priority, NFR, etc.) Better indicate impact of ADC amendments (A/B/C/D). In progress: *August 2024, DEDSO awarded a contract, procuring DocuSign CLM module and initiated design requirements discussions with DocuSign. *October 2024, DEDSO and ODASD(L) started a DLMS Change Process sprint with the LOG IT WG to discuss the change process and PDC/ADC templates with the specific intent to identify ways to increase the data collected and shared in the development and publishing of ADCs. *December 2024, DEDSO onboarded Service Integrator. DLMS change template development and other related requirements development underway.	DEDSO	In-Progress
2	Explore integrating a requirements doc within an ADC In progress: *August 2024, DEDSO awarded a contract, procuring DocuSign CLM module and initiated design requirements discussions with DocuSign. *October 2024, DEDSO and ODASD(L) started a DLMS Change Process sprint with the LOG IT WG to discuss the change process and PDC/ADC templates with the specific intent to identify ways to increase the data collected and shared in the development and publishing of ADCs. This action item will be subsumed by action item #1.	DEDSO	In-Progress
3	Explore update to DoD Component Official Response Form to add "N/A" type flag or "not going to implement" by Service (need room for specifics on why; waiver approval indicated) In progress:	DEDSO	In-Progress

requirements discussions with DocuSign. Updating the DLMS change coordination process is part of the use case requirements. This action item will be subsumed by action item #1. Explore how to better link existing and pending ADCs to DoD NFR master list In progress: *August 2024, DEDSO awarded a contract, procuring DocuSign CLM module and initiated design requirements discussions with DocuSign. *October 2024, DEDSO and ODASD(L) started a DLMS Change Process sprint with the LOG IT WG to discuss the change process and PDC/ADC templates with the specific intent to identify ways to increase the data collected and shared in the development and publishing of ADCs. This action item will be subsumed by action item #1 Update PDC/ADC template to ask what funding and planning cycles will be targeted for the change In progress: **October 2024, DEDSO and ODASD(L) started a DLMS Change Process sprint with the LOG IT WG to discuss the change process and PDC/ADC templates with the specific intent to identify ways to increase the data collected and shared in the development and publishing of ADCs. This action item will be subsumed by action item #1 Explore how to provide better DAAS POC/Testing coordination info into ADCs In progress: *August 2024, DEDSO awarded a contract, procuring DocuSign CLM module and initiated design requirements discussions with DocuSign. DEDSO In-Progress In-Progress In-Progress Is there a way to rank or weight ADCs on indicate priority/criticality? At the service level? In progress: *August 2024, DEDSO awarded a contract, procuring DocuSign CLM module and initiated design requirements discussions with DocuSign. DEDSO In-Progress In-Progress In-Progress *August 2024, DEDSO awarded a contract, procuring DocuSign CLM module and initiated design requirements discussions with DocuSign.		*August 2024, DEDSO awarded a contract, procuring DocuSign CLM module and initiated design		
This action item will be subsumed by action item #1. Explore how to better link existing and pending ADCs to DoD NFR master list In progress: *August 2024, DEDSO awarded a contract, procuring DocuSign CLM module and initiated design requirements discussions with DocuSign. *October 2024, DEDSO and ODASD(L) started a DLMS Change Process sprint with the LOG IT WG to discuss the change process and PDC/ADC templates with the specific intent to identify ways to increase the data collected and shared in the development and publishing of ADCs. This action item will be subsumed by action item #1 Update PDC/ADC template to ask what funding and planning cycles will be targeted for the change In progress: *October 2024, DEDSO and ODASD(L) started a DLMS Change Process sprint with the LOG IT WG to discuss the change process and PDC/ADC templates with the specific intent to identify ways to increase the data collected and shared in the development and publishing of ADCs. 	*October 2024, DEDSO and ODASD(L) started a DLMS Change Process sprint with the LOG IT WG to discuss the change process and PDC/ADC templates with the specific intent to identify ways to increase the data collected and shared in the development and publishing of ADCs.		
	This action item will be subsumed by action item #1.		
	Build the baseline; identify appropriate paths for socialization prior to publication		
8	In progress:	DEDSO	In-Progress
	DEDSO is collaborating with ODASD(L) to finalize the Baseline strategy		
	If Baseline is approved, explore how to execute a brownout/slowdown of DLMS changes and identify		
9	what are the logical exclusions (NFRs, WMS, GINV, admin ADCs)	DEDSO	In-Progress
	In progress:		
	DEDSO is collaborating with ODASD(L) to finalize the Baseline strategy		
	Establish DLMS implementation working group with DLMS program managers from each		
10	component participating to come up with "consensus" on implementation strategy	DEDSO	In-Progress
	In progress:		
	Pending approval of Baseline strategy by ODASD(L)		
11	Do "we" still own the data even though it is in the AWS cloud? The customer (Government in this case) owns the data which is hosted in the AWS cloud. Please refer to AWS FAQs at https://aws.amazon.com/compliance/data-privacy-faq/#:~:text=As%20a%20customer%2C%20you%20own,any%20purpose%20without%20your%20agreement for more information.	DAAS	Complete
	How does DAAS broadcast what's available for testing?		
12		DAAS	Complete
	DAAS currently alerts DEDSO when ADCs have been implemented.		
13	If each originating system is creating an UUID, how is it guaranteed to be unique (how else can that be done?) A Universally Unique Identifier (UUID) is a 128-bit label used for information in computer systems. The term Globally Unique Identifier (GUID) is also used, mostly in Microsoft systems. When generated according to the standard methods, UUIDs are, for practical purposes, unique. Their uniqueness does not depend on a central registration authority or coordination between the parties generating them, unlike most other numbering schemes. While the probability that a UUID will be duplicated is not zero, it is generally considered close enough to zero to be negligible.	DAAS	Complete

	A version 4 UUID is randomly generated. As in other UUIDs, 4 bits are used to indicate version 4, and 2 or 3 bits to indicate the variant (102 or 1102 for variants 1 and 2 respectively). Thus, for variant 1 (that is, most UUIDs) a random version-4 UUID will have 6 predetermined variant and version bits, leaving 122 bits for the randomly generated part, for a total of 2122, or 5.3×1036 (5.3 undecillion) possible version-4 variant-1 UUIDs. There are half as many possible version-4 variant-2 UUIDs (legacy GUIDs) because there is one less random bit available, 3 bits being consumed for the variant. Per RFC 9562, to communicate that a UUID is using the version 4 format, its third group always start with the number 4. Which is also known as the version field. Using this format xxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxx		
14	Where are the JBMS ORC minutes stored/how shared? There is no central location to post the JBMS meeting minutes as some of the topics could be considered sensitive.	DAAS	Complete
15	Can DAAS AIS (MILS/DLMS) report be made available outside OSD? Closed For now, components will need to obtain a copy of the report from OSD.	DAAS	Complete
16	Explore requirements for an ADC dashboard that lists the ADCs, date it's implemented in DAAS test, each service testing needs, and expected dates of the component testing In progress: *August 2024, DEDSO awarded a contract, procuring DocuSign CLM module and initiated design requirements discussions with DocuSign. Reporting capabilities of DocuSign CLM being assessed. This action item will be subsumed by action item #1.	DEDSO/ DAAS	In-Progress
17	Reporting: need visibility of service level applicability pushed to a reporting site (linked to pushing D/S reporting to Advana) In progress: ODASD(L) LOG PCat Tool is being designed to serve multiple reporting functions to increase access to implementation data	DEDSO	In-Progress
18	Explore how we may integrate service specific system change requests into PDC/ADC information for tracking? In progress: *August 2024, DEDSO awarded a contract, procuring DocuSign CLM module and initiated design requirements discussions with DocuSign.	DEDSO	In-Progress

	*October 2024, DEDSO and ODASD(L) started a DLMS Change Process sprint with the LOG IT WG to		
	discuss the change process and PDC/ADC templates with the specific intent to identify ways to		
	increase the data collected and shared in the development and publishing of ADCs.		
	This action item will be subsumed by action item #1.		
	Explore best way of adding all PRC reps to all PDC/ADC coordination; determine how to indicate		
	primary PRC and secondary PRC.		
	In progress.		
19	*August 2024, DEDSO awarded a contract, procuring DocuSign CLM module and initiated design	DEDSO	In-Progress
	requirements discussions with DocuSign. Requirements development include improve		
	coordination opportunities.		
	This action item will be subsumed by action item #1.		
	Explore tracking extension requests and create a report		
	In progress.		
20	*August 2024, DEDSO awarded a contract, procuring DocuSign CLM module and initiated design	DEDSO	In-Progress
20	requirements discussions with DocuSign.	DEDSO	111-1 10g1633
	Requirements development include improve reporting and feedback opportunities.		
	This action item will be subsumed by action item #1.		
	DEDSO to coordinate with Amber Propert and Lisa Kelly on NFR keywords, metadata tagging, and		
	any other data that needs included in new ADC template		
	In progress.		
21	*August 2024, DEDSO awarded a contract, procuring DocuSign CLM module and initiated design	DEDSO	In-Progress
21	requirements discussions with DocuSign.	DEDGO	III-I TOGICSS
	Requirements development include improve reporting and feedback opportunities.		
	*November 2024, DEDSO initiated metadata discussions with ODASD(L) POCs. Continues to		
	develop metadata tagging catalog.		
	Explore how we can link DocuSign to Service Now workflow, internal to DLA and with external		
	stakeholders		
22	In progress.	DEDSO	In-Progress
	*August 2024, DEDSO awarded a contract, procuring DocuSign CLM module and initiated design	DEDGO	III-I TOGICSS
	requirements discussions with DocuSign. Requirements development include improve		
	coordination opportunities.		

	This action item will be subsumed by action item #1.		
	Explore how to integrate DocuSign reporting into Advana DLMS metrics		
23	In progress.

	This action item will be subsumed by action item #1.		
	Better integrate funding/planning/implementation timeline tracking with PDC/ADCs and DocuSign.		
	In progress:		
	*August 2024, DEDSO awarded a contract, procuring DocuSign CLM module and initiated design		
24	requirements discussions with DocuSign.	DEDSO	In-Progress
24	*October 2024, DEDSO and ODASD(L) started a DLMS Change Process sprint with the LOG IT WG to	DLD3O	III-Fiogless
	discuss the change process and PDC/ADC templates with the specific intent to identify ways to		
	increase the data collected and shared in the development and publishing of ADCs.		
	This action item will be subsumed by action item #1.		
	DEDSO to coordinate with Lisa Kelly's team on what is needed data wise from ADCs (specific key		
25	words/meta data/ database building requirements)	DEDSO	In-Progress
	Combined with action item #21		
	Add testing and validations progress check ins and incorporate into reporting		
	In progress:		
	*August 2024, DEDSO awarded a contract, procuring DocuSign CLM module and initiated design		
26	requirements discussions with DocuSign.	DEDSO/	In-Progress
20	*October 2024, DEDSO and ODASD(L) started a DLMS Change Process sprint with the LOG IT WG to	DAAS	III-I Togless
	discuss the change process and PDC/ADC templates with the specific intent to identify ways to		
	increase the data collected and shared in the development and publishing of ADCs.		
	This action item will be subsumed by action item #1.		
	How does Advana security work to monitor for risk in data aggregation?		
	Per Advana: Advana is adopting the Attribute Based Access Control (ABAC) solution to enhance the granularity of our		
27	access controls within the data environment. Currently, our capabilities are limited to restricting access at the database	DLA EDM	Complete
	level. Additionally, data that has already been identified as sensitive or restricted is blocked from being written to a non-		
	sensitive data zone as outlined here: https://wiki.advana.data.mil/display/SDKB/DataOps+Governance%3A+S3+Paths		

	However, with the upcoming release of Advana 1.2, we anticipate the ability to apply restrictions down to individual columns or elements within a dataset. This finer level of control will largely depend on accurate identification by the source provider. CDAO's AO has acknowledged this dependency and is comfortable with the associated risks, allowing us to implement a less restrictive data access policy at this stage while the platform pursues an ABAC solution. Attached is the link to the slide decks presented at the recent Community Space summit, which outline Advana's plan for version 1.2: https://wiki.advana.data.mil/pages/viewpage.action?pageId=152930458		
28	Explore how to better get technical/policy/functional SME in the PRC WGs earlier in process In progress: *DEDSO PRC leads discussing this within their working groups *October 2024, DEDSO and ODASD(L) started a DLMS Change Process sprint with the LOG IT WG to discuss the change process and PDC/ADC templates with the specific intent to identify ways to increase the data collected and shared in the development and publishing of ADCs. This action item will be subsumed by action item #1.	DEDSO	In-Progress
